THE REGENCY AUCTION 31

MARCH 21 | COSMOPOLITAN | LAS VEGAS

Greetings friends and welcome to Regency Auction 31!

It is with great pride that we present this amazing selection of rare coins. Anchored again by a selection of fantastic collections assembled by long time clients of our sister firm, Legend Numismatics, including:

The Grand Prix Collection—a set of Proof Buffalo nickels and selections of high-end Mercury dimes and Walking Liberty half dollars, all put together over the last 20-30 years ago. Some of the dimes come from the famed Bassano and Joshua Collections.

The Young-Dakota Collection—a selection of Superb Gem Proof type coins as well as original, matched Proof sets from 1859, 1860, 1886, 1893, 1894, 1900, 1907, and 1915. Each lot in this collection is a sale highlight, but the 1893-CC Branch Mint Proof dollar is a very rare coin that will excite even the most jaded Morgan dollar specialist.

The Intense Cameo Collection—a small but powerful group of Gem and Superb Gem Proof type coins, each hand selected for their amazing cameo contrast. Each coin is special in every way, and a highlight of the sale.

Other collections include the Prospect Collection and final selections from the Sand Hill Collection. The Prospect Collection includes some great Proof Gold coins that are fresh to the market.

Other highlights include:

Lot 8. L1C 1794 S-32. HEAD OF 1794. PCGS MS66 BN

Lot 99. 5C 1913-S TYPE 2. PCGS MS67+ CAC

Lot 167. 25C 1831 SMALL LETTERS. PCGS MS66

Lot 270. \$1 1893-CC BRANCH MINT PROOF. PCGS PR65+ CAC

Lot 292. \$1 1871 PCGS PR66 DCAM CAC

Lot 357. 1895-O PCGS MS66

Lot 372. 1927-D PCGS MS66+ CAC

Lot 381. G\$1 1866 PCGS MS67+ CAC

Lot 392. \$2.50 1847-O PCGS MS64 CAC

Lot 422. \$10 1795 13 Leaves. PCGS MS64+ CAC

With such amazing collections included in this sale, we know that there is something for everyone in the pages that follow. In all, the 497 lots present some of the finest coins available for collectors. We invite you to come to the PCGS Show March 19-21 to view lots. Our friends at PCGS put on a great show, totally unlike any other coin show you will ever attend, and the red carpet will be rolled out for you. If you cannot attend in Las Vegas, be sure to log on at legendauctions.com and bid prior to or live during the sale. If you have any questions, call us at the office 732-935-1168 or email at info@legendauctions.com

Best wishes,

Julie Abrams, President

Legend Rare Coin Auctions

TERMS AND CONDITIONS

This is a public auction, conducted in accordance with these Terms and Conditions of Sale, by Legend Rare Coin Auctions (hereinafter referred to as "LRCA"). By bidding on any lot offered by LRCA, the bidder indicates acceptance of the following Terms and Conditions of Sale. Bidders are to comply with the Terms and Conditions of Sale, posted on LegendAuctions.com, at the time of the auction in which they are participating.

BUYER'S PREMIUM

A 17.5% buyer's premium will be added to all successful bids, and is payable by the winning bidder as part of the total purchase cost.

SALES TAX

All sales are subject to applicable state and local taxes. Any lots that are picked up and/or delivered in the state of The Regency Auction are subject to applicable state and local taxes.

PAYMENT

All merchandise must be paid for within TEN (10) days of the date of sale. We reserve the right to cancel any unpaid order after that time and to ban the bidder from future sales. Credit cards (Visa, MasterCard and Discover) are accepted for auction payments up to \$2,500.00 per invoice. Invoices and/or balances over \$2,500.00 must be paid via personal or certified check, money order, or wired funds. Personal checks, money orders and cashier's checks may be held for up to 10 business days in order to allow time for them to clear appropriate banking channels. Please email info@legendauctions.com for bank-wiring instructions and/or to provide numismatic references.

E-CHECK PAYMENTS

E-check payments now available. Please email form to info@legendauctions.com

INTERNATIONAL BUYERS

Foreign buyers, unknown to us, are required to deposit 25% of their anticipated expenditures before bidding. Please contact us in advance of bidding for bank wiring instructions.

EXTENDED PAYMENT TERMS

For all items \$15,000.00 and over, LRCA is now offering Extended Payment Terms. Please advise us at least 48 hours before bidding or purchasing the item in question. Pre-approval is required.

RETURN POLICY

All lots are sold "as is." Lots graded by PCGS, NGC or other third-party grading services, or any lot viewed by the buyer or anyone on buyer's behalf prior to the auction, may not be returned. This is not an approval sale. All sales of lots to the highest bidder are final. Bidders are strongly advised and encouraged to research any lots upon which they plan to bid, and to determine bids, based upon their own evaluation. Bidders assume all risks concerning and related to the grade, quality, appearance, condition, history and origin of any lot. Bidders acknowledge that coin grading is not an exact science, that it can be subjective and inconsistent and that it is possible that two parties might assess or grade the same coin differently. LRCA makes every effort to accurately describe all items offered in its sales. All items will be available for preview prior to the auction.

SHIPPING

Shipping costs will be billed separately and are non-refundable. Items will usually ship within 5-10 business days after payment has been received and/or funds have cleared. Coins will be shipped via Fed Ex or USPS or transported via armored carrier. The shipping charge includes fees for our third-party insurance coverage, as well as any costs incurred through the USPS or Federal Express. Any shipments made via armored carrier (Brinks, Dunbar, etc.) will be calculated and assessed at the time of shipment.

INTERNATIONAL SHIPPING

It is not possible for LRCA to ship to some countries. Please email questions to info@legendauctions.com. Payment for all international orders is required in US funds. Please contact julie@legendauctions.com for bank wiring instructions. Customs requirements for each country are the responsibility of the buyer. All packages shipped outside of the United States will include

the required customs declaration and full value of the invoice.

BIDS VIA TELEPHONE

An absentee bidder may also participate live, during the auction, via telephone. Requests for phone bidding must be received at least three days prior to the auction date. Please fill out our phone bidding request form online or call 732-935-1168 to request a call from one of our representatives during the live auction. LRCA cannot guarantee phone lines, but will make every effort to accommodate those who wish to participate via this method.

RIGHTS & RESPONSIBILITIES

The auctioneer will determine the highest bidder. The auctioneer, alone, has the right to reopen the bidding for an item, if deemed necessary. LRCA and its representatives reserve the right to remove any attendees who impede the preview and/or the auction. Title to all merchandise shall pass to the winning bidder after receipt of good funds by LRCA. Bidders will be held responsible for their bids, including those bids placed incorrectly. PLEASE VERIFY BIDS BEFORE SUBMITTING THEM. In order to have a bid removed or corrected, bidder must contact LRCA prior to start of the auction. Bidder waives auctioneer's responsibility and holds LRCA harmless for failure to recognize, accept, receive or execute any lost or missing bids by internet, telephone, email, floor bid, fax, mail or other means. LRCA reserves the right to postpone or cancel an auction without notice. Lots may be withdrawn at LRCA's discretion, without prior notice. Lots may carry a reserve. A reserve is a price below which the auctioneer will not sell an item, or will re-purchase the item on behalf of the consignor or for LRCA. LRCA permits bids to be placed by the auctioneer, or an employee of the auctioneer, up to the pre-determined reserve set by the consignor. Legend Rare Coin Auctions' partner, Legend Numismatics, reserves the right to bid on items, for its own account and for the accounts of its clients.

DISCLAIMER AND WARRANTIES

No warranty of merchantability or fitness for a particular purpose is made or implied on any lot. No warranty, whether expressed or implied, is made with respect to any lot except for warranty of title, and in the case of title, auctioneer is selling only that right or title to the lot that the consignor may have as of the auction sale date. All lots are sold "as is" and with all faults. Purchaser hereby assumes all risks concerning and related to the grading, quality, description, condition, authenticity, and provenance of a lot.

- a. Coins and currency listed in this catalog graded by PCGS, NGC, or any other third party grading service or examined by the buyer prior to the auction sale may not be returned for any reason whatsoever by any buyer, except for claims related to authenticity.
- b. For non-certified coins that have not been examined by the Buyer prior to the Auction Sale: if it is determined in a review by LRCA that there is a material error in the catalog description of a non-certified coin or the LRCA no later than seventy-two (72) hours of delivery of the lots in question, and such lots are returned and received by LRCA, in their original, sealed containers, no later than fourteen (14) calendar days after delivery, in the same condition the lot(s) were delivered to the Buyer, time being of the essence.
- c. If an item or items are returned pursuant to the terms herein, they must be housed in their original, sealed and unopened container.
- d. Late remittance or removal of any item from its original container, or altering a coin constitutes just cause for revocation of all return privileges.
- e. Grading or condition of rare coins may have a material effect on the value of the item(s) purchased, and the opinion of others (including independent grading services) may differ with the independent grading services opinion or interpretation of LRCA. LRCA shall not be bound by any prior, or subsequent opinion, determination or certification by any independent grading service.
- f. Questions regarding the minting of a coin as a "proof" or as a "business strike" relate to the method of manufacture and not to authenticity.
- g. All oral and written statements made by LRCA and its employees or agents (including affiliated and related companies) are statements of opinion only, and are not warranties or representations of any kind, unless stated as a specific written warranty, and no employee or agent of LRCA has authority to vary or alter these Terms and Conditions of Auction Sale. LRCA reserves the right to vary or alter the Terms of Sale, either generally or with respect to specific persons or circumstances, in its sole discretion. Any variation or alteration shall

be effective only if in writing and signed by an officer of LRCA authorized to do so.

h. LRCA is acting as an auctioneer. Title to the lots purchased passes directly from the Consignor to the Buyer. Accordingly, LRCA is not making, and disclaims, any warranty of title.

i. Bidder acknowledges that the numismatic market is speculative, unregulated and volatile, and that coin prices may rise or fall over time. LRCA does not guarantee or represent that any customer buying for investment purposes will be able to sell for a profit in the future.

j. Bidder acknowledges and agrees that neither LRCA, nor its employees, affiliates, agents, third-party providers or consignors warrant that auctions will be unimpaired, uninterrupted or error free and accordingly shall not be liable for such events.

WAIVER AND RELEASE

Bidder, for himself, his heirs, agents, successors and assignees, generally and specifically waives and releases, and forever discharges LRCA, and its respective affiliates, parents, officers, directors, shareholders, agents, subsidiaries, employees, managers and members and each of them, and their respective successors and assignees from any and all claims, rights, demands and causes of actions and suits, of whatever kind or nature, including but not limited to claims based upon Auctioneer's negligence, whether in law or equity, tort or otherwise, whether known or unknown, suspected or unsuspected (a "Claim"), which Bidder may assert with respect to and/or arising out of, or in connection with any challenge to the title to or authenticity of any goods purchased, the sale itself, any lot bid upon or consigned, and/or the auction, except where such Claim is otherwise expressly authorized in these Terms of Sale. It is the intention of Bidder that this waiver and release shall be effective as a bar to each and every Claim that may arise hereunder or be related to the Auction Sale.

DISPUTES

If a dispute arises concerning ownership of a lot or concerning proceeds of any sale, LRCA reserves the right to commence a statutory inter-pleader proceeding at the expense of the Consignor and Buyer and any other applicable party, and in such event shall be entitled to its reasonable attorneys' fees and costs. LRCA reserves the right to cancel or postpone the Auction Sale or any session thereof for any reason whatsoever. No Bidder shall have any claim as a result thereof, including for incidental or consequential damages. Neither LRCA nor any affiliated or related company shall be responsible for incidental or consequential damages arising out of any failure of the Terms of Sale, the auction or the conduct thereof and in no event shall such liability exceed the purchase price, premium, or fees paid. Rights granted to Bidders under the within Terms and Conditions of Auction Sale are personal and apply only to the Bidder who initially purchases the lot(s) from LRCA. The rights may not be assigned or transferred to any other person or entity, whether by sale of the lot(s), operation of law or otherwise. Any attempt to assign or transfer any such rights shall be absolutely void and unenforceable. No third party may rely on any benefit or right conferred by these Terms and Conditions of Auction Sale.

Any dispute arising out of or related to these Terms of Sale, the Auction Sale or any lot, with the sole exception of actions by Legend Rare Coin Auctions to collect amounts owed to it and other damages, shall be submitted to binding arbitration pursuant to the commercial arbitration rules of the American Arbitration Association, with any arbitration hearing to occur in Monmouth County, New Jersey. Absent an agreement of the parties, the arbitrator shall limit discovery to that which is necessary to enable the hearing to proceed efficiently. The arbitrator shall not have the power to award punitive or consequential damages, nor alter, amend modify any of the terms of this Agreement. The award by the arbitrator, if any, may be entered in any court having jurisdiction thereof. Each party shall pay one-half the costs of the arbitration. Bidder acknowledges and agrees that the competent courts of the State of New Jersey shall have exclusive in personam jurisdiction, subject to the requirement to arbitrate, over any dispute(s) arising hereunder, regardless of any party's current or future residence or domicile. Bidder further agrees that venue of the arbitration proceeding shall be in Monmouth County, New Jersey; and any court proceeding shall be in the Monmouth County Superior Court, in the State of New Jersey, and in each case waive any claim of Forum Non Conveniens. Bidder agrees that any arbitration or legal action with respect to this Auction Sale is barred unless commenced within one (1) year of the date of this Auction Sale.

Auction participants expressly waive any right to trial by jury.

PRINCIPALS

Laura Sperber
Partner

Laura was raised in Highland Park, NJ. During high school, the coin bug hit her hard. Her trip to the 1976 NYC ANA left a lasting mark and huge desire for her to own and handle the greatest rarities. While attending Monmouth University, Laura attended coin shows more than classes. After college, she started LSS RCI, a wholesale coin company. In 1986, she realized the need for a "better" coin retailer and teamed up in 1986 with George Huang to form Legend Numismatics.

In 1996 Bruce Morelan became a partner and since then Legend has exclusively built or assisted in assembling this generation's greatest collections. In 2012 Laura saw the need for a smaller, boutique auction firm, and created Legend-Morphy with Dan Morphy, whom she split with in 2014. Today, Laura is also a leading consumer advocate for coins. The passion has never subsided, and she keeps a beautiful Proof Walker on her desk to this day.

Bruce Morelan
Partner

Bruce started collecting coins when he was only six years old and by the time he was in high school his dream was to be a coin dealer. But life intervened and instead, Bruce went into business. By chance, he became Legend Numismatics' financial backer in 1996. His great grandmother had given him three coins when he was young, one of which being a Trade Dollar, so he set out to build the finest Trade Dollar set. After a few years with ultra rarities, Bruce returned to his love of dollars and completed both a set of Gobrechts and a set of Seated Dollars.

After selling those sets, Bruce recently returned to dollars with a new Gobrecht set and a spectacular early dollar set capped by his dream coin, the Amon Carter 1794 Dollar. Not many collector's can say they have completed not only the finest 1794-1885 Dollar Sets and have over the years owned such coins as two 1913 Liberty Head Nickels, an 1894-S Dime, 1876-CC Twenty Cent piece, 1827 Original and Restrike Quarters, 1838-O Half Dollar, two 1885 Trade Dollars and four 1884 Trade Dollars!

Julie Abrams
President

Julie Abrams started in numismatics in 1986 when she joined up with Bernard Rome and launched Teletrade, the first computerized auction company. Teletrade developed a unique coin trading method, utilizing state-of-the-art digitized voice board technology to run live auctions before the advent of the internet. As President of Teletrade, Julie helped expand the company, increasing the frequency of auctions and expanding annual sales to \$24 million within a few years. In 1999, GMAI, a publicly traded company, purchased Teletrade and Ms. Abrams became Executive Vice President of Sales for the parent company. Her job responsibilities included continuing her role as CEO for Teletrade as well as marketing to buyers and consignors, with the goal of maintaining a balance between inventory and sales while growing the business.

In 2004 she joined Stacks-Bowers, an old world traditional auction house where she worked to expand their e-commerce presence, including the development of an online bidding platform for the firm. She also marketed Stacks' programs to secure consignments from dealers and institutions such as banks, museums and universities.

Julie is a member of the American Numismatic Association, the Central States Numismatic Association and Florida United Numismatists.

LOT 1

PINE TREE SHILLING 1652 PCGS MS64 CAC

An impressive example of this always popular colonial type. Among pre-Federal coins, there are certain types that are always in demand because of their historical importance, which transcend specialized collectors. All the Massachusetts silver issues (NE, Willow, Oak, and Pine) fit this category. The first two are exceptionally rare, the Oak Tree is scarce, and in relation to the others, the Pine Tree issues are "common." Not so in such fine condition.

This near-GEM example boasts a bold luster that shines from beneath rich pewter-slate-gold hues. Exceptionally well struck on a broad flan, every letter of the legend is essentially fully visible and the centers are fully and crisply struck up. Even the denticulation at the rims are bold and visible in many areas. For the type, the surfaces are as fine as you will ever see. The only defects are two planchet splits; one at 6:00 and one at 11:00 on the obverse. These are as made and are commonly seen on this variety. Only a few teeny ticks and lines are part of the minting process, and were not acquired after minting. There is some stretching to the letters and dentils towards 12:00 on the obverse which was also caused by the primitive rocker press minting process used at John Hull's Boston minting facility.

Weighing 72.4 grains, this Noe-5, Salmon 4-Di, W-720 is rated as R-4. Boasting an impressive provenance, this coin is ex: Virgil Brand, B.G. Johnson, T. James Clarke, F.C.C. Boyd, New Netherlands' 60th Sale, December 1968, lot 214; Donald Groves Partrick Collection, Heritage, January 2015, lot 5575. This coin also serves as the PCGS CoinFacts plate coin. The Massachusetts silver series are the first coins struck in what would be the United States of America. All dated coins show the year 1652, the first year of the British Commonwealth government, and they continued to bear this date even though some issues were struck in the 1660s and later. They are also among the most studied numismatic series, with several major reference works that date to the 1870s. The amount of interesting literature regarding the fascinating relics would take up a good portion of a book shelf.

PCGS 1, NGC 4, CAC 1. This is one of the finest known examples for the variety, if not the finest. This coin last sold over two years ago at time when two of the most extensive collections of Massachusetts silver EVER assembled came to market within a three month period. Those pieces are now finally absorbed into collections. This is an important opportunity to be able to add this major colonial type issue to your collection. The current Collector's Universe price is listed at \$67,500. With the extensive Partrick and Kendall Collections now dispersed, you will not see large concentrations of high end Pine Tree shillings come up for sale anytime soon. A near-Gem like this is a rare delight and we can see this coin bringing a strong price.

PCGS# 45372 | ESTIMATE: \$52,500+

LOT 2

TOKEN 1864 LINCOLN/O.K.. F-127/248. PCGS MS66 RB

This is a beautiful, GEM Patriotic Civil War token with a great portrait of President Lincoln. The reverse has the letters O.K. surrounded by a chain. Brilliant original RED clings to the peripheries, while the central devices are awash in a gorgeous icy-teal blue. The eye appeal is SUPERB!

PCGS 1, NGC 1. PCGS has graded just five examples of this die pair in all grades and metals and the only auction record we can find was for a MS62 BN that sold in an internet auction in 2017. That result has no bearing on the value of this STUNNING GEM!

PCGS# 603634 | ESTIMATE: \$1,000+

LOT 3

1/2C 1794 C-1A. LARGE EDGE LETTERS. PCGS XF45 CAC

A coin that deserves many WOWS! This would be a highlight in any collection of circulated grade early copper! To call this coin a "GEM" XF does not even begin to describe the quality; perhaps the only thing that will fully pass the message along is this: LAURA SPERBER LOVES THIS COIN! She is obsessed with it!

First off, the color is even and light brown with golden accents at the periphery. You do not need a vivid imagination to see hints of surviving gloss. The details were deeply rendered by a strong blow from the screw press. Ms. Liberty's tresses are boldly delineated as are the dentils, the letters, and the leaves on the reverse. The surfaces are hard and a very strong glass reveals only minor contact from circulation. There is no porosity, corrosion, or environmental damage that usually plagues these early copper coins. Needless to say this coin is PQ+++ and is a real stunner!

PCGS 27, NGC 10 CAC 6. Only one CAC-approved XF45 ever sold in auction, realizing \$7,475 way back in December 2010. Clearly these DO NOT appear with frequency, or with this kind of high end quality. We totally believe that this coin will force the folks at Collectors Universe to adjust their Price Guide value upward. Remember - an AU50 will cost \$10,000 or more!

PCGS# 1003 | ESTIMATE: \$6,500+

LOT 4
1/2C 1800 PCGS MS64 RB CAC
 Ex Missouri Cabinet.

Amazing quality and eye appeal for an 1800 half cent!

The faded GEM original Mint red is still quite evident and both sides are even and attractive with their faded mint color and bluish steel brown. Free of any troubling specks or spots, the color is a wholesome delight. Furthermore, the surfaces show only a few tiny nicks and handling marks, far fewer than one would expect for a half cent from this early era. A thin strikethrough line above the bust tip serves to identify this amazing coin. Middle die state, Manley states 3.0.

There was a small hoard of these that came out for the 1980 ANA Convention, but this coin was not from that group as it was in the Col. E. H. R. Green holdings in the 1930s. The quality of the planchets used to strike most 1800 half cents is high. The planchets were provided by Boulton & Watt, the famous English inventors and suppliers of planchets. Once struck most of the half cents were soon in circulation, so finding a Mint State coin, especially one with original Mint color is quite extraordinary. This particular one is pictured on the CoinFacts website with its extensive provenance noted as well. Notably from Howard Rounds Newcomb and sold to B. Max Mehl in 1935; to Col. E. H. R. Green Collection; appraised by F. C. C. Boyd in the Green Estate for \$5 on August 9, 1937; sold for \$4 in April 1943 to the Eric P. Newman and B.G. Johnson partnership; Eric P. Newman and his Education Foundation; Missouri Cabinet; Missouri Cabinet Collection Auction, Goldbergs, January, 2014, lot 49 at \$46,000.

PCGS 4, NGC 0, CAC 2. None are graded finer but there are two reported as MS63 RD by PCGS. This is certainly well up in the Condition Census for the date and technically one of the finest to survive, especially so with this much residual Mint red remaining. This coin realized \$46,000 in the 2014 Missouri Cabinet sale. The current Collectors Universe value is \$39,500. If you are building a great Half Cent or Type collection, this coin is a "must buy"! What a great coin!

PCGS# 1052 | ESTIMATE: \$40,000+

LOT 5

1/2C 1804 CROSSLET 4, STEMS. PCGS MS65+BN CAC

This is a very high-end and Condition Census example with SUPERB eye appeal!

Smooth and rich brown surfaces show very subtle hints of original mint red that still cling to the protected recesses of the devices, particularly on the reverse. Both sides display a warm satiny luster when rotated in a light, which is delightful for an early copper, especially one that has toned to a BN designation. Crisply struck, all of Liberty's hair curls and drapery folds are fully defined, as are the intricate leaf details on the wreath. Possessing eye appeal for days, this coin has no distracting carbon spots or meaningful surface distractions. This C-10, Br-9 is among the Condition Census for the variety. The Pogue Collection lacked an example of this major Red Book variety.

PCGS 5, NGC 0, CAC 5. There are 3 graded MS65+ BN. In the January 2014 Missouri Cabinet Sale, an MS65 CAC brought \$14,950 and a 65+ CAC brought \$28,750. Currently, the PCGS Price Guide suggests a value of \$21,500 in MS65. There are no coins at either service graded finer, numerically or in the RB or RD designations. Legend Rare Coin Auctions is pleased to offer this SUPERB coin, one that would be a great example for an advanced type set or in a GEM early copper cabinet. We anticipate strong bidding when this coin crosses the block!

PCGS# 1069 | ESTIMATE: \$24,000+

LOT 6
1/2C 1809/6 9 OVER INVERTED 9. PCGS
MS64 BN CAC

For a coin designated BN, this coin has an awfully large amount of underlying original mint red that clings to the fields among the devices. A strong satiny luster comes through the even, chocolate brown surfaces, giving it a warm eye appeal. The devices are sharply struck and tinges of a pleasing bluish hue. Only one or two tiny ticks are seen under strong magnification and they do not detract from this coin's totally original beauty.

C-5, B-5. A popular repunched mintmark variety that used to be referred to as 1809/6. The nomenclature has changed and is now called a 9 over inverted 9, where the engraver punched the 9 over the incorrectly punched upside down 9.

PCGS 10, NGC 5, CAC 3. Only two CAC coins have sold in auction, the most recent being the A.J. Vanderbilt Collection coin that realized \$13,200 in March 2018 and prior to that, there was one that sold for \$2,820 in February 2018. That difference was also seen on two PCGS coins that sold in 2015 one in September for \$2,585 and one for \$10,575. The current PCGS value is listed at \$5,500. A great coin for the type or date collector.

L1C 1793 CHAIN, AMERICA. PCGS F15 CAC

Sheldon-3, which is a low R-3 and the most “common” variety for the type. That does not mean these are common, especially when approved by CAC. Normally these come corroded, scratched, smoothed, or otherwise damaged.

While this example is lower grade, extensively circulated to the Fine range, the surfaces are remarkably smooth, and free of any kind of serious marks. The copper planchet was of good, hard metal before striking without fissures or imperfections that would attract environmental damage. The surfaces are devoid of all but the most insignificant contact marks from its time in early federal commerce. All the details are fully visible, though there are a few areas of weakness from the strike, which is normal. The central portions of the design: Henry Voigt’s flowing haired portrait of Liberty and the chain links are all bold.

The Chain cents were struck early in 1793, among the first coins coined in the first federal mint. A total of 36,103 were struck between February 27 and March 12, utilizing five distinct die pairings, all of which are scarce to so rare, Sheldon called it not collectible. As a coin with so much history, collectors have been drawn to the issue since the earliest days of coin collecting in the United States. Today, most collectors can only dream of owning one of the low grade and/or damaged pieces, which even barely identifiable, coins still command low four figure prices. A pleasing and generally problem free, though heavily circulated coin like this will see very strong bidding from collectors with good taste.

PCGS 35, NGC 4, CAC 2. Neither CAC coins have appeared in auction. PCGS-graded coins have sold in the \$15,600 to \$22,325 range between June 2014 and June 2018. In June 2008, one sold for \$29,900 and even a recent NGC coin sold in the 2018 ANA auction for \$19,200. This PCGS/CAC coin should see bidding that brings the final price realized close to the current Collector’s Universe value of \$24,000. Very scarce and in demand in all grades, the Chain cent is one of the true “blue chips” of American numismatics and this will make a great addition to any type set.

LOT 8

L1C 1794 S-32. HEAD OF 1794. PCGS MS66 BN

Legend Rare Coin Auctions is proud and honored to have been selected to sell the **FINEST KNOWN** Sheldon -32 cent.

This coin is a delight in every way to behold! This is a somewhat scarce variety, listed in the Breen Encyclopedia as Low R-3.

Liberty's portrait and the details were very nicely punched into the dies, so when the S-32 was struck, it created a variety that was deemed "most beautiful" according to a poll of EAC members conducted by Darwin B. Palmer, Jr. in the March 15, 1981 edition of Penny-Wise.

This handsome example was struck from Die State IV, with multiple major clashmarks, a bold die break on the reverse and a cud forming above LI. Despite these minting issues, the devices are fully struck up and wonderfully rendered. Beautifully, evenly toned in a medium brown hue that has a wonderful original gloss to the surfaces. As you rotate the coin in a light, some tinges of original orange-red is revealed, mostly relegated to the protected areas of the upper reverse design. Overall the surfaces are smooth and of very high end quality. Though there is some natural roughness to the copper planchet in front of Liberty's portrait, it is not at all obtrusive or distracting and does not have an effect on the **SUPERB** eye appeal that this classic **GEM** possesses! Taking a glass to the reverse and viewing the multitude of clashes and the sharp die break makes this **GEM** something very cool to look at, whether you are an advanced early copper collector or not.

Ex. Henry C. Miller Collection, Thomas Elder's April 1917 auction, lot 678; Henry Chapman; Dr. Christian A. Allenburger; B. Max Mehl's March 1948 auction, lot 339; R.E. "Ted" Naftzgher, Jr." sold on February 23, 1992 to Eric Streiner; Jay Parrino (The Mint); Anthony Terranova; Dr. Thomas Turissini Collection, 1998 to present. Both obverse and reverse are illustrated in the Noyes reference and is CC#1 in the Noyes Census.

PCGS 5, NGC 0. Boasting an illustrious provenance and ranks among the **FINEST** 1794 large cents that exists of all varieties. This is a very historic offering. Do not let this opportunity pass you by! A hearty congratulations to the winning bidder, you have just added a world class coin to your cabinet. There has not been a PCGS MS66 BN of any variety sold since 2014, and the current PCGS value is listed at \$160,000. Keep in mind we sold a PCGS MS66+ BN CAC for \$246,750 in our July 2018 Regency Auction. We are proud to offer this numismatic treasure, a coin that will be a centerpiece in any amazing type set!

PCGS# 901374 | ESTIMATE: \$125,000+

LOT 9

L1C 1801 S-219, 3 ERRORS. PCGS AU53 CAC

Legend Rare Coin Auctions is proud to offer this VERY IMPORTANT EAC treasure! Among the absolute finest graded at PCGS for this popular Red Book type, this S-219 is within the PCGS Condition Census and finest graded at PCGS, with just three coins graded finer, AU58, MS60 BN and MS62 BN.

Ultra smooth surfaces for an early Large Cent show off a very pleasing medium brown color with some hints of mahogany and olive that come out when rotated in a light. The surfaces offer a glossy finish with some surviving mint luster clinging to the protected areas of the devices. A close inspection with a strong glass reveals a few very minor lines and ticks, but nothing that is singularly detracting with the naked eye. The quality is very high end for the grade, and you really cannot beat the eye appeal.

The 3 Errors reverse are very interesting, clearly the engraver at the mint was rushing or otherwise not paying attention as he punched the devices into the die. The most evident error is the fraction, written as 1/000 rather than the proper 1/100. Second, either the engraver could not find the U punch or it was broken, regardless, UNITED is spelled out IINITED. The final of the three errors is that there is only 1 stem on the wreath, not two. This reverse die was matched to two different obverses, used in the VERY RARE S-218, and on this more "common" S-219. Since this is a later usage of the reverse die, it does show multiple major die cracks and clash marks, all artifacts of the early minting process, adding allure to the look.

PCGS 2, NGC 0, CAC 1. This coin, as best as we can tell is totally fresh to the market and we cannot find a previous appearance in auction. This does not appear to match any of the coins listed in Breen's census. We can tell it is not the NN64 coin, which was struck from an unbroken reverse die, nor does it match the Bareford-Halpern coin, which is currently graded PCGS MS62 BN and sold in February 2017 for \$108,688. The "EF45" from Auction '79 found its way to the Tom Reynolds Collection as PCGS AU58 CAC that sold for \$73,438. The "EF40, sharpness of AU50 but cleaned and recolored" is the PCGS AU53 ex Husack, Holmes, and Mervis, which realized \$54,344 in January 2014. As the third finest PCGS-graded example and the second finest approved by CAC, we know there will be intense bidding from all sorts of early copper enthusiasts when this one crosses the block. This coin is truly bound for a WORLD CLASS collection of early U.S. Large cents and we know it will bring a very strong realization. Congratulations in advance for adding such an important coin to your collection!

PCGS# 36272 | ESTIMATE: \$42,000+

LOT 10

L1C 1811 PCGS MS64 BN CAC

S-287, the only non-overdate variety of the year. A common enough variety, Breen rated it R-2, but in this high grade, it is indeed rare and is one of the **FINEST** graded by PCGS in the BN color classification. It is **EXTREMELY RARE** with any kind of original RED color.

The present near-GEM is very high end and very handsome. Smooth, even chocolate brown surfaces have some steely blue overtones and hints of very faded clay-brick tones that cling to the reverse devices. Sharply struck save for the stars on the left side. While Breen notes, "Often found with dark and rough surfaces," that statement is nowhere close to describing the outstanding color and surfaces. The technical and aesthetic qualities are exceptional, and if not for a tiny mark on the obverse field, this coin would have graded higher.

PCGS 4, NGC 3, CAC 1. Only one example has ever sold in auction, selling twice in the last decade, a non-CAC that was part of the Cardinal Collection, selling for \$23,500 in January 2013. More recently the Reynolds coin, with an important and extensive pedigree going back 70 years, graded PCGS MS63+ BN CAC realized \$35,250. The presently offered coin has fewer marks, and a richer color. The eye appeal is very high end and should see bidding easily surpass the \$32,000 PCGS Price Guide value! A real prize for the EAC specialist or type collector!

PCGS# 1555 | ESTIMATE: \$30,000+

that often are seen even on high grade Coronet trace of toning in places, but these are not distracting and help identify this as the PCGS CoinFacts plate coin. This is a very handsome example, with crisply defined devices - all of Liberty's hair curls and lines are fully defined. A few tiny die lines at Liberty's neck identify this as Newcomb-12.

PCGS 1, NGC 0. There are NO records for a RED example, though PCGS estimates a value of \$10,000, which seems cheap for a coin that is UNIQUE in the color designation. No other 1843 variety has ever graded in the red category either. All examples of the Braided Hair type in RED that have sold in auction appear to be from the 1850s, mostly 1853 and 1855. This impressive 1843 in MS64 RD presents a VERY IMPORTANT opportunity for the advanced collector of Large Cents. We can see it bringing a record price for the date. Be prepared for fierce bidding and good luck!

L1C 1851 PCGS MS65 RD

A bold GEM with brilliant mint RED surfaces that blaze all over. A bold luster radiates on both sides, amplifying the totally original RED surfaces. A few old specks testify to the originality. The devices are well struck and the surfaces are nice and smooth, free of any distracting marks or ticks. The eye appeal is very pleasing overall.

PCGS 18, NGC 6. The current PCGS value is listed at \$4,250 and the two most recent APRs are \$2,100 (November 2017) and \$3,000 (June 2018). Just a single MS66 RD has been graded finer at PCGS and it has never sold in auction. This coin will delight any late date large cent collector.

L1C 1852 NEWCOMB-8. PCGS MS65 RD

Ex Naftzger Collection.

Blazing, fiery mint RED luster is strong and brilliant on both sides. Aside from a few minor toning dots and some delicate iridescence, this coin retains 90% or more of its ORIGINAL RED surfaces. Sharply struck from a middle die state.

Ex Sam J. Kabealo Auction, January 1947, lot 696. Considered Condition Census #1 on the Noyes Census (Noyes # 30751) and tied for #1 on the Grellman Census.

PCGS 20, NGC 5 (all varieties). This coin realized \$7,763 in Goldberg's September 2009 sale of the Ted Naftzger Collection, Part 3, lot 1107, on an estimate of \$2,000+. That was nearly a decade ago! Today, Collector's Universe lists a value of \$4,500 and it is possible that this one will bring that or more. A great coin with one of the most important EAC pedigrees of all time!

LOT 14**11C 1853 PCGS MS66 RB CAC**

Newcomb-1. Anyone who has followed our auctions knows that our principals are huge fans of high grade early copper, and they LOVE coins that are Ex Ted Naftzger!

This high Condition Census GEM N-1 retains a copious amount of original mint red that accents the otherwise mellowing hues of olive-brown. A wonderful glowing satin luster brings out the high end surface quality that shows only the slightest of microscopic ticks that you need a strong loupe to find.

This lovely coin, whose pedigree traces back to Milferd Bolender's February 1947 auction (lot 687) ranks very high in the various Censuses. Bill Noyes calls it tied for CC#1, while Bob Grellman ranks it CC#2 in the 2009 Naftzger sale. Ted Naftzger purchased this coin from the above mentioned Bolender Auction. Sold in the September 2009 Goldberg's Auction of the Naftzger Collection, lot 1141, where it was purchased by D. Brent Pogue. Sold in the fifth and final section of the Pogue Collection, March 2017, lot 5221. For the collector of GEM large cents, what a great provenance! Ted Naftzger-Brent Pogue!

PCGS 23, NGC 27, CAC 11. This GEM brought a record price for the grade in the Pogue sale, which speaks volumes to the quality of the coin! We expect strong bidding for this beauty again now. A great type coin or for a wonderful set of late date large cents!

Newcomb-25, Ex Naftzger Collection.

If you know us, then you know what our all time favorite pedigree is Naftzger! Of course this coin lives up to the expectations of the name!

Overall, for an 1853 large cent this coin has exceptional surfaces. There is a small planchet issue hidden in the right obverse field. A strong luster beams from all over. The color is a slightly faded GEM Original Mint Red. There is a slight touch of toning (no, this coin is NOT changing color). Miss Liberty and the details are sharply struck-although there is some slight weakness in the stars. Overall, this is a great coin with a great eye appeal!

PCGS 73, NGC 40, CAC 9. A GEM Mint State red Large Cent PCGS CAC is nearly IMPOSSIBLE to find. We never see them coming to market. Legend purchased this coin directly from a collector to whom we sold it to years ago. It is not a retread for sure! Opportunity knocks loud here!

A boldly lustrous GEM with stunning mint fresh looking copper-nickel luster. A few microscopic flecks can be seen on both sides, but none distract. This coin is totally original and unmolested, a very nice exception to a lot of others out there.

PCGS 103, NGC 72. The most recent one to sell was CAC approved, in our November 2018 Regency Auction for \$4,113 and the current PCGS Price Guide value is \$4,000. This one, though not CAC approved has a great look and should sell for a premium bid.

1C 1858 SMALL LETTERS. PCGS MS66+ CAC

As HIGH END and as close to an MS67 as you probably will find. One HIDDEN line keeps this coin from an MS67 designation.

Outstanding surfaces are sleek and clean overall. Only when using a strong glass and looking really hard can you find a single line and a tiny fleck. Take those away, and the coin is a lock MS67! A MONSTER intense blazing luster can be seen from across the room. The color is a totally original copper/gold. Every detail is razor sharp in strike and stands out. The eye appeal is both memorable and gorgeous!

PCGS 13, NGC 15, CAC 4. PCGS has graded 6 in MS66+. There are NONE higher anywhere. Collectors Universe Value is \$37,500. NOTE: A PCGS CAC MS67 would be \$75,000-\$100,000 easy! Think about this, here you have a SUPERB GEM 161-year-old copper coin. Just amazing. This coin has defied all odds to exist! Regardless, the quality and eye appeal of this coin are all there and then some. If you collect the FINEST, this coin is a "must have".

FROM THE PROSPECT COLLECTION

We are thrilled to have this high end and beautifully toned example of the first small cent struck by the US mint.

This is a very CHOICE Proof example that if raw would likely be called a GEM. The exquisite surfaces have a delicate, even tone over the highly reflective mirrored fields. The mirrors offer a flashier than normal appearance. Both sides have an even coating of totally original brown/pale golden brown/pale blue colors. Every detail is pinpoint sharp in strike and boldly stands out. The eye appeal really is totally original and very pleasing!

PCGS 220, NGC 121, CAC 55. The two most recent examples to sell in auction were sold in our October 2018 Premier Session for \$17,600 and in our November 2018 Regency Auction for \$18,800. In this cataloger's opinion, this coin has a better look than those two. The current PCGS Price Guide value is listed at \$20,500. This near-GEM is expected to see very strong bidding from the type or date collector. Keep in mind any PCGS PR65 CAC is worth \$30,000+. This impressive coin will bring a strong price when the hammer falls.

**LOT 19****1C 1859 PCGS MS65 CAC**

A totally original and pleasing GEM. From the first year of the Indian cent, this coin has a brilliant copper-nickel luster with olive-tan patina. The devices are sharp and there are just a few stray ticks that can be seen in places with the aid of a strong glass but do not detract from the very nice eye appeal.

PCGS 201, NGC 150, CAC 49. The most recent PCGS/CAC example sold for \$2,640 in September 2018, prior to that, one sold in the ANA auction in 2018 for \$3,840. The current Collectors Universe value is listed at \$2,500 and this one should bring a price around that when the hammer falls.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 23

1C 1877 PCGS MS66 RB CAC

An impressive, beautiful GEM with stunning amounts of original RED color on the surfaces. Tied for FINEST graded in the RB designation, this coin is one of just two MS66 RB to have been awarded a green CAC bean.

The 1877 had only 852,500 struck for circulation and these went directly into everyday commerce, where they would stay for many years. The typical survivor is apt to be XF or lower. Mint State coins are always in demand, and GEM Mint State coins like the presently offered coin are highly prized by serious collectors.

A strong, vibrant mint luster glows all over both sides with a stunning vibrance. Richly toned with brown, olive, and violet hues on both sides that accent the satiny smooth surfaces and sharply embossed reliefs. The eye appeal is exceptional and very high end-even if you are very picky collector, you will LOVE this GEM!

PCGS 6, NGC 7, CAC 2. The other example sold in an online auction in September 2018, realizing \$36,750. Prior to that, the last PCGS MS66 RB sold back in February 2001! Even in the famously weak 2015 FUN auction, an NGC MS66 RB sold for \$32,900. Housed in an older blue tag PCGS holder, this important GEM presents a great opportunity for the collector. Remember a full RED in MS66 (Pop. 7) would cost over \$150,000! Good luck!

This is a wonderful semi-KEY date example in GEM grades. Golden-RED color blooms with a velvety brilliance. Sharply struck and pleasingly smooth surfaces show few distracting marks, though we do note a couple of tiny flecks hidden on the obverse but they do not detract. The eye appeal is excellent.

In 1908, for the first time since coinage commenced, a cent was struck somewhere other than Philadelphia. In all 1,115,000 were struck and it was enough of a curiosity that there are a decent number of Mint State survivors for collectors today. HOWEVER, in this high grade, they are indeed RARE, excessively so any finer.

PCGS 62, NGC 25. There is a wide range of auction prices; going back to 2001, the average of the 42 non-CAC PCGS coins comes to \$5,567 and the current PCGS value is \$5,800. The most recent one we sold realized \$3,643 in our recent Regency Auction 30. Only 10 coins are graded finer, making this a great choice for the advanced collector.

The devices are crisply struck up and have razor sharp definition. Medium, mahogany brown surfaces underlie the hints of olive, blue, teal, and peach toning. The eye appeal is spectacular and this coin, for the BN designation, cannot be exceeded in terms of technical and aesthetic qualities.

PCGS 9, NGC 4, CAC 3. NONE are graded finer in the designation! ONLY a single PCGS/CAC coin has ever sold in auction, realizing \$6,463 in April 2015. We sold a non-CAC coin for \$4,465 in January 2018, a coin that did not have the stunning eye appeal of this immaculate SUPERB GEM.  devices are razor sharp and
 fully frosted, providing a
 stunning contrast on both

sides. The eye appeal is beyond adjectives, it is that super high-end!

PCGS 8, NGC 4, CAC 3. There are just 2 in PR67+ RD and neither has ever sold in auction. The most recent PR67 RD was a non-CAC coin that realized \$10,800 in a February 2018 auction - that was the first one to sell in eight years. The current PCGS Price Guide value is listed at \$18,500 and with TOP POP Proof Indian cents breaking records recently, it would not shock us at all if that level was surpassed. Bound for the FINEST of Proof Indian cent collections! Good luck!

1C 1909 V.D.B. PCGS MS67+ RD CAC

An AMAZING example of this very popular first year of issue, and clearly this one is among the FINEST examples that survives! Vivid and stunning fiery original RED copper color is magnificently brought to life with a glowing ember-like blazing luster. Boasting superlative eye appeal, this uber-GEM features fully struck devices and pristine surfaces.

PCGS 242, NGC 89, CAC 61. There are 44 graded MS67+ RD, and there just two coins graded higher. There is a very wide range of APRs with two just selling in the 2019 FUN auction at \$4,320 and \$1,920; we have sold three recently in the \$3,600-\$4,100 range and the current Collectors Universe value is \$6,000. Neither of the MS68 RDs have sold in auction, making this a great opportunity for the advanced collector to add one of the FINEST to their sets. Good luck!

1C 1909-S V.D.B. PCGS MS65 RD CAC

A gorgeous and totally ORIGINAL RED GEM example of this ultra popular and famous KEY Lincoln cent. Remarkably lustrous with a stunning vivacity and sharply struck, the eye appeal is exceptional in every way. There are a few ancient toning flecks that can be seen with the aid of a strong glass, none that detract from the SUPERB eye appeal of this old green tag holdered GEM.

PCGS 917, NGC 170, CAC 112. The two most recent examples to sell in auction realized \$4,800 and \$5,500 (January 2019 and November 2018 respectively). Don't let that quick succession fool you, prior to that there hadn't been a PCGS/CAC coin sold since March 2017. This coin will be a highlight of the next set it graces and will see strong bidding to get there.

1C 1909-S LINCOLN. PCGS MS66+ RD CAC

Ex. Ron Bozarth Collection as noted on the PCGS insert.

A satiny and fully RED 09-S Lincoln cent that is as fresh, lustrous, and RED as the day it came off the dies. Well struck for the issue, the details are nicely defined. There are a few minor ticks that limit the grade to the current MS66+ RD grade, but they do not detract from the outstanding eye appeal.

PCGS 198, NGC 64, CAC 49. PCGS has graded 22 examples in MS66+ RD. We sold two recently: one in October 2018 for \$4,950 and one in September 2018 for \$5,053. The current PCGS value is listed at \$5,000. PCGS has graded just 10 coins finer, making this an ideal coin for the collector of GEM RED CAC Lincoln cents, we know this coin will end up in a fantastic collection!

1C 1911 PCGS MS65 BN GOLD CAC

WHOA! This coin is a marvel of what can happen when mother nature gets her hands on ultra smooth GEM copper! Toning like this on a Mint State copper coin is EXTREMELY RARE. Not only is this coin superbly toned, but it is also very high end and conservatively graded.

The both sides have awesome cobalt, teal, and violet overtones; the toning is especially vibrant on the reverse, but both sides are stunningly beautiful. Really words cannot fully describe the stunning eye appeal--only your eyes can do that!

PCGS 32, NGC 36, CAC 5. This is the ONLY Gold CAC listed for the date. The only auction comp is the NON-CAC PCGS MS66 BN that we sold in our June 2017 Premier Session for \$963. This coin is way better! Bound for an amazing toned type set or date set of Lincoln cents!

LOT 37

1C 1914-S PCGS MS65+ RD CAC

Tied for second FINEST graded at PCGS, this 14-S is a great example of this conditionally very rare date. Despite a mintage of 4,137,000, the 14-S is much rarer in GEM Red grades than the more famous 14-D that has a mintage of 1,193,000.

This Premium Quality GEM is very high-end and beautiful for a MS65+ RD. Sharply struck on both sides, the devices are enhanced by a brilliant and fiery satin red luster that is totally original.

The surface quality stands up to intense scrutiny, even under the aid of a strong glass. This coin really is close to being a full MS66 RD and being tied for FINEST graded, that strong glass shows just one or two tiny ticks which account for the assigned grade. This is a magnificent coin that is one of the PCGS CoinFacts Plate coins.

PCGS 48, NGC 6, CAC 6. There are just FIVE in MS65+ RD. There are three auction records in the past two years, none of which were for CAC-approved examples. Those three coins ranged from \$12,000 to \$20,563 and the current Collectors Universe value is listed at \$17,500. This CAC-approved GEM will near the high end of that range and keep in mind that the last MS66 RD, Pop 3, sold for \$83,375 over a decade ago! A really impressive and important coin for the advanced Lincoln cent collector. We know this coin will be fiercely bid on by the Registry Set collector and worthy of a world class set!

1C 1924 PCGS MS67+ RD

An amazing 1924 cent-even if it was not graded, you would instantly tell it was high-end.

PCGS's grade of MS67+ RD confirms that this coin is tied for FINEST graded with just a single coin. This is a real prize for the advanced collector!

Fiery, ORIGINAL mint RED luster blazes brilliantly all over. Accents of iridescent overtone add to the overall

SUPERB eye appeal. The devices are sharply struck and they stand out against FLAWLESS fields. The reverse die was crumbling leaving a

pebbled texture that is wonderfully satiny and lustrous. This coin is as fresh today as it was when it came off the dies in 1924. This is a SUPERB coin for the FINEST of Lincoln cent collections!

PCGS 2, NGC 0. Neither coin has ever sold via auction but the current Collectors Universe value is listed at \$18,500. In MS67 RD, prices realized range between \$9,400 and \$19,550 going back to 2010. As a 67+ RD this coin is bound to spark an intense bidding war among the collectors of the finest Lincoln cents. We can see this beauty bringing a runaway price!

PCGS 241, NGC 164, CAC 99. The most recent coin to sell in auction brought \$3,600 in the 2019 FUN auction and the current PCGS Price Guide value is \$3,950. This coin is definitely in line quality wise with that one. This would be a great addition to any set of Lincoln cents with bold eye appeal!

**LOT 42****1C 1910 PCGS PR66+ RD CAC**

Truly a beautiful and condition census quality 1910 Matte Proof cent. This coin is as lovely and high end as pretty much any that we have had the pleasure of handling in the last few years (just the PR67+ RD that we sold for a record \$41,125 was better.)

Full satiny red copper surfaces are original and very clean. There is a radial glow around the sharply struck devices that brings out the depth of the strike and subtle accents of richer red and orange highlights. The reverse shows a few minor flecks that are only visible with a strong glass, none of which distract and they attest to the originality of this SUPERB GEM. The eye appeal is exceptional in every way!

PCGS 26, NGC 9, CAC 6. PCGS has graded only 3 in PR66+ RD and just six finer in the color category. The last PR66+ RD realized \$9,106 in September 2016. More recently a PR66 RD CAC sold for \$13,200 in the recent 2019 FUN auction. This one will bring a strong bid for sure, perhaps surpassing the current \$11,000 PCGS Price Guide value. EXTREMELY RARE any finer, no PCGS PR67 RD has sold since 2004! This is truly a coin worthy of a very high end set of Matte Proof Lincolns, and will see very strong bidding.

**LOT 43****1C 1913 PCGS PR66 RD CAC**

A superb looking GEM! Bold matte surfaces border on sheer perfection with an intense red, satiny luster. Both sides awash in original GEM MINT RED color. The reverse does have a light hint of some toning-it is not fading (it probably sat on felt for a very short time). Lincoln and every detail are pinpoint sharp in strike. The eye appeal is phenomenal!

PCGS 41, NGC 8, CAC 15. The most recent example to sell was in our October 2018 Premier Session which realized \$2,640, but that one did not have the vibrance that this one does. Prior to that, the most recent example to sell in auction realized \$3,600 in the 2018 ANA auction. The current Collectors Universe value is listed at \$3,000, but this one should bring in excess of that amount! Good luck!

A truly marvelous SUPERB Proof 1937 cent! Deep, blazing, beaming RED copper mirrors beam from all over and contrast dramatically against the nicely frosted devices. Devoid of any distracting marks, spots, or any toning that would detract from the remarkable and beautiful eye appeal.

PCGS 27, NGC 15, CAC 18. The current PCGS Price Guide value is listed at \$4,250 and the most recent example sold in our May 2018 Regency Auction for \$3,408, while there was one in the 2018 FUN auction for \$3,840 and in September 2017 one sold for \$3,600. We expect this beauty to bring somewhere in that range as well. A 66+ RD CAM sold in December 2015 for \$8,813, so at the present grade, this is good value to be sure.

2C 1864 SMALL MOTTO. PCGS MS65 RB CAC

This is a beautifully toned GEM example of the scarce Small Motto 1864 2C. Bold luster radiates with ample tinges of original red that gleams in the fields and protected areas. The "Brown" is more like faded red/violet iridescent toning that really comes to life in a light. Sharply struck devices stand out against smooth, GEM quality fields. This lovely coin is great for any collector.

PCGS 57, NGC 52, CAC 33. The last one to sell in auction realized \$3,600 and was NGC-graded. The last two PCGS/CAC coins sold back in 2016 and 2015 for \$3,055. No question this coin is SUPER HIGH -END. PCGS really showed it no mercy when it was graded!

Bold and SUPERB quality mirrors beam wildly from all over. They have great clarity, cleanliness, and of course are highly reflective. Only with a really strong glass and some looking around can you find a microscopic toning dot or two (there are no flecks or problems). When you twirl the coin, the mirrors look like a freshly made sheet of glass. Both sides are a GEM original Mint red/pale gold color. There is just a touch of light toning. Every detail is fully struck and has strong frost. We do consider this coin borderline cameo as there is some light contrast. The eye appeal is gorgeous!

ONLY 725 Proofs were minted. PCGS 27, NGC 15, CAC 21. PCGS has graded only 5 coins in PR66+. The current Collectors Universe Value is \$9,000. This coin belongs in a HIGH-END GEM set. One look and you will agree it has all the bells and whistles!

One thing we know, due to our sister company Legend Numismatics being the #1 dealer in GEM Mint State 3CS pieces, is how rare every date and grade are. This coin is not only SUPERB, but it is extremely high-end and beautiful!

Wonderful surfaces are clean, smooth, and satiny with a wealth of underlying luster. There are NO hits or problems. A surprising strong luster beams from all over. Totally original album like toning of blue, teal, and pale green swirl all over with hints of orange-gold. Every detail is sharply struck and actually does stand out. We note a few minor clash marks seen with a glass, as made at the mint. The eye appeal is really great!

PCGS 13, NGC 12, CAC 9. PCGS has graded only 4 coins higher. The current Collectors Universe value is only \$6,250, but we sold the last PCGS MS66 CAC for \$10,281 in our July 2018 Regency Auction. This coin, with its great visual allure will sell for a similarly impressive sum! Good luck!

One series that we know and understand better than pretty much everyone is the three cent silver series. Having built the top three Mint State sets and top two all time Proof collections, we know how each and every date comes. We know how challenging this date can be in top grades, and this is the ONLY MS66+ graded by PCGS and there is just a single MS67 graded higher.

Offering a dazzling array of blue, aqua, and rose patina on both sides, this lovely GEM is as high end as it is colorful. The luster is frosty under the wonderful toning. A robust strike shows full definition on both sides, we note only a single shallow line on the reverse which is probably what keeps it from attaining a CAC sticker. Regardless, the quality is high-end and very pleasing.

PCGS 1, NGC 1. Nothing finer than PCGS MS66 has ever sold in auction, the most recent being a CAC coin from the Ipswich Collection we sold in our Regency Auction 25 in January 2018. This is a great coin for any advanced collector looking to take their set to the next level. Good luck.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

This earth quaking coin is a duplicate from the Legend Collection of PR 3CS-not only the #1 set, but a Hall of Fame set! All the hard work has been done for you in finding what must rank as one of the wildest toned PR 3CS in existence!

Deep and explosive mirrors beam from all over. They have extreme clarity and are loaded with powerful reflection. Overall, the mirrors are clean-however with a strong glass you can detect a light scattered line or two (that's all that keeps this coin from a PR67+). The color ranks an 11 on our famous 1-10 scale (10 is the best) we used for the wild Northern Lights Morgan Collection. Neon like shades of blue/royal blue/green/gold/violet wildly shine from both sides. Every detail is needle sharp in strike. The eye appeal is not only jaw dropping but is one you NEVER will forget!

LOT 61**3CS 1873 PCGS PR66+ CAM CAC**

What a stunning, flashy headlight! Bold, beaming mirrored surfaces offer a highly reflective brilliance in the icy smooth fields. Frosted, fully struck devices are white and contrast against the deep reflection, producing a wonderful eye appealing cameo effect. A touch of toning adds dimension and the visual allure is SUPERB!

Only 600 were minted. PCGS 12, NGC 10, CAC 12. This is the ONLY PR66+ CAM graded at either service, and is topped by just five PR67 CAMS at PCGS. The current PCGS value is \$6,500 and keep in mind that only PR67 CAM that ever sold in auction realized \$12,220 in February 2015. This coin presents a great value for the advanced collector of this obsolete denomination!

**LOT 62****3CN 1866 PCGS PR66 DCAM CAC**

Sleek deep mirrors offer a bold contrast to the sharply struck and frosty devices. The definition is bold and the design elements are fully and crisply struck. The GEM quality mirrors are PQ and have a gentle dusting of delicate iridescent gold. The eye appeal is SUPERB!

Only 725 proofs were minted the first year of the type. PCGS 8, NGC 7, CAC 13. This was one of the most recent examples to sell, bringing \$2,820 in April 2017 and we sold one in December 2016 for \$3,525.

PCGS# 93762 | ESTIMATE: \$2,800+

LOT 63**3CS 1872 PCGS PR66 CAM CAC**

Here is a SUPERB example of this early Proof 3CN! A remarkable DCAM with fully frosted devices that stand out in extraordinary contrast to the deep, bold, clean reflective mirrors. A dusting of icy-blue, silvery steel tone adds to the amazing eye appeal.

PCGS 9, NGC 8, CAC 13. This is the ONLY PR66+ DCAM graded by either service. Apparently this coin realized \$5,040 in November 2017 and considering that in January 2017, we sold a PR67 DCAM for \$17,038, this seems like a very good value. Worthy of the finest set! Good luck!

PCGS# 93762 | ESTIMATE: \$4,800+

LOT 64

3CN 1868 PCGS PR67 CAM CAC

No question this coin is seriously borderline PR67 Ultra Cameo. We can not imagine a finer 1868!

Superior deep mirrors beam intensely from all over. The mirrors are not only bold, but they also have incredible clarity and are outrageously clean. If you turn the lights off, you can still see the flash. If you twirl the coin, the mirrors look like a freshly formed sheet of ice. The contrast is bold. Miss Liberty and every detail are thickly frosted and are fully struck. The eye appeal is totally jaw dropping!

ONLY 600 were minted. PCGS 3, NGC 10, 2018, the last one to sell in auction brought \$9,106 in April 2017. The current PCGS Price Guide value is listed at \$8,500, we expect strong bidding on this fabulous piece. We can not stress enough how rare and UNDER valued these coins are. It is a top GEM from an obsolete Mint. There are only 600 graded, it is 150 years old, etc. You're simply NOT going to see many others ever offered!

CAC 3. Prior to the one we sold in July

PCGS# 83764 | ESTIMATE: \$7,000+

LOT 65

3CN 1868 PCGS PR65+ DCAM CAC

A bold, reflective, highly contrasted GEM with an amazing look for the assigned grade. The mirrors beam with intense clarity and depth that contrast against the frosted reliefs. Only a single tiny mark on the obverse keeps this gem from an even higher grade.

Only 600 were struck. PCGS 11, NGC 3, CAC 8. There are three coins graded PR65+ DCAM and none of these have ever sold in auction. The current Collectors Universe value is listed at \$1,700. It has been nearly four years since the last PCGS/CAC PR65 DCAM sold in auction, a coin that sold for \$1,528 in June 2014. As a PR65+ DCAM, this GEM should sell for more!

LOT 66

3CN 1872 PCGS PR66 DCAM CAC

A sparkling GEM that is among the absolute FINEST graded for the date. Stark contrast between the boldly struck, frosted devices and the flashy, deep, clearly reflective mirrored fields. While the obverse is mostly devoid of color, the reverse has a blanket of clear gold that adds to the allure.

PCGS 3, NGC 0, CAC 4. Clearly there is duplication in the CAC pop report, and one of these is PR66+ DCAM - the finest of the five DCAMs graded by PCGS. This was the first PR66 DCAM to appear in auction, selling for \$11,750 back in 2015 when it was the ONLY one graded. More recently these have sold in the \$3,600 - \$4,230 range, but Collectors Universe still has a \$6,500 valuation. The sole PR66+ DCAM has not appeared in auction - leaving this the finest available to collectors. Good luck!

PCGS# 93768 | ESTIMATE: \$3,500+

LOT 67**3CN 1876 PCGS PR66+ DCAM CAC**

A spectacular Proof 3 cent nickel, tied for FINEST graded at PCGS. We love this coin's great look!

Superior deep mirrors beam boldly from all over. The mirrors are super clean, have great pure clarity, and are highly reflective. Only with a super strong glass can you see a few die polishing lines (Mint made). If you twirl the coin, the mirrors look like a freshly formed sheet of ice glistening in the sun on a winters day. The contrast is bold. Miss Liberty and the details are thickly frosted and are fully struck. The eye appeal is tremendous!

PCGS 8, NGC 8, CAC 9 (seems like one coin went in several times). PCGS has graded only 3 PR66+ DCAMs with NONE higher. The last one to sell in auction brought \$5,523 in our January 2018 Regency Auction. For what this coin is, we can't see why it is not worth at least \$7,500+. We believe time will take care of that. Opportunity sure knocks loud here!

LOT 68**3CN 1877 PCGS PR66 CAC**

A KEY Proof Only date in this series, and from a small mintage of 510 to boot!

This is a very eye appealing and original looking PQ GEM with flashy reflective mirrors that delight the eye and the frosted reliefs stand out boldly from the fields. A light dusting of clear gold attests to the originality and adds to the eye appeal.

PCGS 60, NGC 60, CAC 29. The last one to sell in auction realized \$3,374 in the 2018 ANA auction and before that one sold for \$3,600 in the 2018 FUN auction. The current PCGS Price Guide value is listed at \$5,200. This is an important KEY issue that is needed for ANY collection of 3 cent nickels!

PCGS# 3773 | ESTIMATE: \$3,000+

LOT 69**3CN 1883 PCGS PR67+ CAM CAC**

An absolutely beautifully reflective SUPERB GEM! The mirrors have a deep, chrome-like flash that beams from every angle. The bright frosty nickel-silver surfaces are well struck and stand out with a bold contrast. The surfaces are smooth and clean, we cannot find even a single stray line anywhere, even with a powerful glass. The eye appeal is amazing and the quality is genuinely superb!

PCGS 60, NGC 23, CAC 42. There are only 11 coins graded PR67+ CAM at PCGS, and just a single PR68 CAM finer. The last one sold for \$2,468 in our September 2018 Regency Auction and before that, one realized \$3,240 in March 2018. The current PCGS Price Guide value is listed at \$3,750. Keep in mind, the SOLE PR68 CAM sold for \$9,694 in our December 2017 Regency Auction. Worthy of an amazing set of 3 cent nickels and will see strong bidding for sure!

3CN 1884 PCGS PR68 CAM
 We are honored to have been consigned one of the finest examples of this long overlooked obsolete series.

Stunning in every way! Spectacularly deep mirrors beam from all over! The contrast is extremely bold, offering a borderline DCAM contrast. As expected in this lofty state of preservation, the surfaces are completely without flaw; even using a strong glass, you will not find a single mark, line, or fleck. The eye appeal is superb, as you might expect for one of the highest graded examples in the entire series.

PCGS 4, NGC 6. The most recent example sold in January 2017 for \$7,638. The current PCGS value is listed at \$8,500. If you are building a top ranking set of three cent nickels, a coin like this cannot be ignored. This is another amazing example that will end up in another superb set!

3CN 1887/6 STRONG PCGS PR67 CAM CAC
 One of the FINEST CAMEO 1887/6 3 cent nickels we have had the pleasure of offering! Here is a very high end SUPERB GEM example of this scarce overdate. The under-digit is visible to the naked eye. A strong reflection in the fields contrasts wonderfully against the heavily frosted design elements. This coin really does possess a very strong visual allure.

PCGS 12, NGC 9, CAC 11. There are only two coins graded PR67+ CAM finer. The current PCGS value is listed at \$7,450. The most recent example we have sold was for \$7,931 in our May 2018 Regency Auction. Keep in mind a 67+ CAM will cost upwards of \$9,000! A great coin for any collector looking to build a set of this obsolete series.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

WHOA! A stunning, ultra high-end SUPERB GEM coin!

Tied for the ABSOLUTE FINEST GRADED at PCGS. Words almost cannot capture the amazing quality and eye appeal! Crisply and fully struck devices have a bright, nickel-silver frost. Deep, reflective mirrors beam with ultra brilliant clarity. The icy-smooth texture to the mirrors are flawless and the eye appeal cannot be improved. The reflection is near blinding!

PCGS 3, NGC 2, CAC 2. The most recent example to sell in auction brought \$18,800 in February 2017. Prior to that, this one sold in the 2007 FUN auction for \$21,850. The current PCGS Price Guide value is listed at \$19,500. There are NONE FINER--this is the FINEST you can ever hope to own! Opportunity knocks very loudly here for the collector who demands the FINEST!

5C 1881 PCGS PR67+ CAM CAC

A POP TOP! Tied for FINEST graded CAMEO Proof 1881 nickel at PCGS, this gorgeous SUPERB GEM has stunningly deep mirrors that are blindingly flashy and reflective. The mirrors are icy smooth and totally PRISTINE and very clean, with no lines, marks, discolorations, or anything that would make this appear any less than perfect to the naked eye and the quality stands up to intense scrutiny with a strong glass.

PCGS 33, NGC 24, CAC 29. PCGS has graded five in PR67+ CAM with NONE FINER. NONE have ever sold in auction but the PCGS Price Guide does suggest a value of \$4,500. An NGC PR68 CAM sold in 2011 for \$9,775. Bound for the FINEST of sets, this coin will see fierce bidding when it crosses the block!

5C 1898 PCGS MS66+ CAC

One of the FINEST graded, just two MS67 examples are graded finer at PCGS. Boldly lustrous nickel-silver surfaces have wonderful golden accents that come out when rotated in a light, as do some lilac-silver hues. Sharply struck devices stand out with full definition.

PCGS 45, NGC 15, CAC 27. The most recent example was a regular MS66 (no +) that sold for \$1,920 in the recent 2019 FUN auction. The current PCGS Price Guide value is listed at \$2,750 and this coin should bring somewhere around that amount, as the eye appeal is very high end! Neither of the two MS67s have ever sold in auction, but would likely cost five figures if one ever came to market.

5C 1912-S PCGS MS64 CAC

The final Liberty Head nickel in the series was also the first nickel struck at the San Francisco mint. Only 238,000 were struck, and they are moderately scarce in Mint State grades, more so as you creep up the grading scale. The present near-GEM has a bold nickel luster that glows through icy lilac and blue with a halo of gold and emerald on the obverse. The reverse is more dramatically toned with rich orange-gold at the right rim, fading to the similar tones as on the obverse. A strong glass will detect a few scattered ticks that limit the grade, but are appropriate for the assigned grade. The eye appeal is amazing despite the tiny tick and totally unlike your typical MS64 1912-S nickel.

PCGS 372, NGC 292, CAC 68. According to the database, there are 23 auction records, ranging from \$1,560 to \$3,450 and the current Collector's Universe value is listed at \$2,250. This awesomely toned coin will see bidding bring it above that level by the toned coin specialist.

THE GRAND PRIX COLLECTION

This group of coins is from a life long collector. There are certain series he always adored and always bought the finest coins when they presented themselves. He is doing a little house cleaning while still adding pieces to his collection (not that many collectors can have a duplicate 10C 1920-D PCGS MS67FB CAC or a gorgeous 5C 1916 PCGS PR68)!.

We can't imagine anyone not being impressed with this group of PR Buffalos, Mercury Dimes, and Walkers. ALL of these coins have been off the market for well over a decade-some as many as 20 years! You'll find these coins are far from average and all are original. The majority are super high end for the grades. We can see these coins heading to high grade top pop collections.

The Grand Prix Collector has been a good friend to Legend Auctions and Legend Numismatics for many years. We thank him and will honor his wish that all of these coins go to good homes. We expect strong bidding on his coins, so be prepared!

5C 1913 TYPE 1. PCGS PR67+ CAC
FROM THE GRAND PRIX COLLECTION

Magnificent! No question this amazing SUPERB GEM has been tucked away since its early life. We more than agree with the +.

Immaculate surfaces reveal no flaws. The surfaces have a thick matte texture. The super sharp luster beams from all over. The obverse has gorgeous original colors of pastel lilac/gold/pale purple. The reverse has slightly deeper (NOT dark) shades of gold/pale lilac/pale reddish gold/blue. There are NO spots or discolorations anywhere. Every detail is needle sharp in strike and stands out. The eye appeal is terrific!

PCGS 55, NGC 37, CAC 41. PCGS has graded only 14 coins PR67+. The last PCGS CAC piece to sell in auction brought \$15,275 in September 2018. Yet again, we want to remind everyone this coin has been off the market for many years (do not let the new holder fool you). This will be a great addition to any GEM set.

Yet another immaculate coin. The surfaces are the epitome of perfection.

A strong matte like texture adorns the surfaces all over. There are NO problems to be found anywhere. A soft, glowing luster beams from all over. Both sides are a GEM nickel/pale lilac color. All the details are fully struck and do stand out. The eye appeal is wonderful!

PCGS 66, NGC 38, CAC 34 (obviously many resubmissions). The last PCGS CAC piece to sell in auction brought \$7,500. We have long known this date and grade can be the "silent stopper". We expect many collectors to try to buy this outstanding GEM-be prepared!

OMG! WOW! UNBELIEVABLE! BETTER THAN THE BEST!
These are just a few ways to begin to describe this monster coin. We do also consider it to be VERY HIGH END.

Picture perfect surfaces are spread all over. Even using a strong glass, you will find zero imperfections. A blazing search light powered luster booms from all over. Stunning shades of totally original pale plum/gold/amber are evenly spread all over. The colors are boldly iridescent. Every detail stands out with a crisp full strike. The eye appeal is so strong your eyes will pop out and roll around! Really!

PCGS 12, NGC 14, CAC 5. There are NO auction records for any PR68 ever selling. The last PCGS CAC piece that we sold was for \$27,500 back in August 2013. It is also critical to note this coin has been off the market for many years. The freshness, quality and color are mind boggling! DO not be fooled by the pops here, these are impossible to come by. We expect beyond strong bidding here. Good luck!

VERY HIGH-END quality. This coin is seriously above average for the date and grade.

Virtually perfect surfaces adorn both sides. The surfaces are of full matte texture. Even using a strong glass there are no major spots. A huge, glowing luster beams boldly from all over. The color is rich nickel with hints of gold. There are no spots or discolorations anywhere. Every detail is pinpoint sharp in strike. The eye appeal is beautiful!

PCGS 62, NGC 33, CAC 41. The last PCGS CAC piece to sell

5C 1916 PCGS PR67 CAC

FROM THE GRAND PRIX COLLECTION

This is one extremely HIGH-END GEM. A little more color and it could be a PR68!

Absolutely incredible GEM matte surfaces are as clean as you will ever find. You can look all day with a microscope and find no tiny problems anywhere. A moderate glowing luster radiates well from all over. Both sides enjoy a beautiful mix of light to moderate original gold/pale lilac colors. There are NO spots or stains anywhere. Every detail is sharply struck and stands out. The eye appeal is terrific!

PCGS 35, NGC 23, CAC 21 (we'd bet there are a few resubmissions here). The last PCGS CAC piece to sell in auction brought \$9,000 in December 2018. We can tell you our sister company Legend Numismatics just paid \$9,500 for one wholesale. It's all a matter of how pretty the coin is and this coin is not only pretty but has been off the market forever!

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

What an eye popping incredible SUPERB GEM! We never see 1916's Proofs this awesome. This coin has been to CAC and we do NOT agree with the NO bean. We fully proclaim this coin to be a monster!

Immaculate surfaces, no, make that totally perfect surfaces are visible all over. The surfaces are a full matte texture. No imagination needed. A full booming headlight luster is all over and really makes the coin stand out. Both sides have delicious colors of gold/lilac/faint green/baby blue that are in a semi-circular form. There are no spots or discolorations. Every detail is pinpoint sharp in strike. The eye appeal is out of this world!

PCGS 8, NGC 1. The last one to sell in auction brought \$25,850 in August 2016. This coin is from the famed Tom McCarroll collection which was purchased intact by the Grand Prix Collection owner. Included in that monster collection were many finest graded pieces and many MONSTER toned coins. It is important to note; this coin has been off the market for over 20 years! We expect major bidding here. Good luck!

As with all the other coins in the Grand Prix PR Buffalo collection, this coin has perfect surfaces. We looked and looked a long time and found zero problems. There is a good luster emitting from all over. Both sides enjoy original moderate gold color. There are NO spots or stains. Every detail is needle sharp in strike. The eye appeal is fantastic!

PCGS 321, NGC 142, CAC 129. A VERY high-end coin like this one just sold in auction for \$4,080. Remember, this coin has been off the market for many years. There is no way anyone cannot love this SUPERB GEM!

SUPER HIGH-END! We wish we had resubmitted (we make no promises of any upgrades). This coin is amazing!

Superior deep mirrors seem endless while offering extreme clarity and cleanliness. The flash of brilliance will nearly blind you. Even using a strong glass there is NOTHING of any size to find anywhere. Both sides enjoy that original pearl-like nickel/pale gold/pale icy blue look. Of course, every detail is fully struck and stands out. The eye appeal is awesome!

PCGS 172, NGC 99, CAC 99. The last PCGS CAC piece to sell in auction brought \$3,643 in November 2018; bet it did not look as good as this one! Keep in mind, this is a very fresh coin too.

Not only is this coin SUPER HIGH END, we swear it has light cameo contrast. WOW!

Deep and icy mirrors beam from all over. The mirrors are a lesson in purity, clarity, and of course cleanliness. When you twirl the coin, you see a ton of flash. Both sides enjoy a light vibrant hint of lilac/nickel/pale gold. This coin is NOT hazy or dull by any stretch. There are NO spots. Every detail is sharply struck. The eye appeal is phenomenal!

PCGS 40, NGC 59, CAC 17. The last PCGS CAC piece to sell in auction brought only \$6,600 which was too cheap (it was not a killer coin like this.) Keep in mind, the Collectors Universe value is \$7,250. This coin has not been seen on the market for over 15 years. It is just phenomenal. Seeing is believing!

5C 1913 TYPE 1. PCGS MS67 CAC

One of the most spectacularly toned 1913 Buffalo nickels we have ever had the pleasure of offering, and that includes the Angel Dee's coin!

A blazing nickel-silver luster provides an awesome back light to the pastel blue, teal, peach, and vivid gold toning that delightfully graces both sides of this SUPERB GEM. The strike is complete from a forceful blow from the dies and the surfaces are immaculate. You could search for years before you find another with this spectacular look!

PCGS 613, NGC 286, CAC 252. This coin's value is contained in the special nature of the eye appeal. Prior auction records and price guide values cannot take that into account so you may as well ignore them. This coin will inspire strong bidding and perhaps a near record bid for the date!

Here is something you don't see everyday--a Buffalo nickel with a dramatically rotated reverse--about 45° rotation.

Aside from that minting anomaly, this is a great looking coin! Icy mint luster glows all over on both sides. Delicate iridescent blue and clear gold toning accents the glorious smooth surfaces and sharply struck design elements. The eye appeal is awesome.

PCGS 702, NGC 295, CAC 251. There are 90 coins graded MS67+ at PCGS, the most recent with CAC approval sold in October 2018 for \$1,380 and we sold one in July 2018 for \$1,763. The current PCGS Price Guide value is listed at \$1,750 and this date is quite RARE any finer! Good luck!

Close your eyes and dream about the most perfect Buffalo nickel you can; now open your eyes and here it is! Why PCGS did not grade this coin a "+", we just can't figure.

Immaculate and perfect surfaces adorn both sides and a bold luster blazes from all over. Both sides have great natural colors of nickel blue/pale purple/faint blue. Every detail is needle sharp in strike. The eye appeal is incredible!

PCGS 27, NGC 13, CAC 9. The last coin we sold was the most recent PCGS/CAC coin for \$20,563 in our May 2018

Regency Auction; and the one before that was the Angel Dee's coin that we sold for \$28,200 in December 2016. Toss out the price guides for a CAC-approved coin, we can see this coin bringing much more! There are Type 1 Buffaloes, then there is this, a MONSTER! Perfect for any type or set of Buffaloes! This is a beautiful example of this scarce first year of issue Buffalo nickel. Sharply struck devices stand out against the smooth and lustrous fields. Pretty pastel blue, peach, and gold iridescent toning graces both sides. Well preserved surfaces are totally devoid of any distracting marks, lines, or ticks. Totally original and very pleasing, this SUPERB GEM is among the highest graded examples at PCGS, bested by just five coins.

PCGS 27, NGC 16, CAC 14. We sold one in our November 2018 Regency Auction for \$6,169 and more recently one sold for \$5,520 in the 2019 FUN auction.

5C 1913-S TYPE 2. PCGS MS67+ CAC
THE FINEST 1913-S TYPE 2 GRADED!

Without a doubt, this is most likely the **FINEST KNOWN** example, as it is the only one in MS67 that has been awarded a CAC-approval. First off, this coin is clearly very special! You can tell that from the first casual glance.

The first thing that hits your eye is the bold, beautiful, and brilliant luster that glows with a stunning vibrance on both sides. The obverse and reverse have full definition to the devices, imparted by a forceful blow from the dies. The nickel-silver surfaces are gently dusted over with icy, powder-steel blue and clear gold, that is especially vivid on the reverse. The eye appeal is truly spectacular! Good luck ever finding another one that looks anywhere close to this **AMAZING SUPERB GEM!**

PCGS 6, NGC 4, CAC 1. This is the only MS67+ at either service, and is the **ONLY ONE** that is CAC. The most recent regular MS67 example sold for only \$28,200 in April 2014, but prior to that one sold in February 2013 for \$49,938 and one sold in October 2012 for \$47,000. The current PCGS Price Guide value is listed at \$50,000, but if you are working on the highest ranking PCGS Registry Set, you need this immaculate **SUPERB GEM!** We can see this coin bringing a world record price to be added to a world class cabinet!

A SUPERB example of this early date Buffalo nickel. While not rare in an absolute sense, they are rare in such a lofty state of preservation. A vibrant luster glows in the fields, accenting the sharply struck up design elements and bringing the pastel peach and teal tones to life, imparting a wonderful, original eye appeal.

PCGS 217, NGC 49, CAC 45. There are 18 graded in MS66+ and the last CAC-approved example realized \$1,450 in a December 2018 online only auction and prior to that, one bright \$1,560 in the 2018 FUN auction. Just two dozen graded finer, the current PCGS value in 66+ is \$1,550.

5C 1919-D PCGS MS64+ CAC

This is a tough date in any Mint State grade, and becomes RARE any finer than MS64.

Satiny, nickel-gray luster gleams around sharply struck devices. Indeed this coin is quite well struck for the date. Delicate golden tone can be seen on both sides in the fields. There is a single tiny tick on the obverse and a microfleck or two on the reverse, which account for the assigned grade. The eye appeal is quite high end for the grade.

PCGS 254, NGC 125, CAC 30. There are 9 graded at the current level at PCGS. Only one PCGS/CAC example has ever sold in auction, realizing \$2,520 in the 2018 ANA auction. Prior to that, a non-CAC coin sold for \$3,290 in June 2017. Collector's Universe lists a \$3,850 value in this grade, and the last PCGS/CAC MS65 CAC sold for \$7,800 in December 2018.

5C 1927-S PCGS MS64+ CAC

The 27-S is a condition rarity with precious few that were saved in GEM Mint State. As such, a look at the population figures shows a large cluster at MS64, which likely accounts for many duplicate submissions of the same coin hoping for a 64+ or 65 grade.

Wonderfully lustrous surfaces have a strong brilliance in the fields. Showing a typical strike for the date with some weakness of the Indian's braid. Delicate pastel tone can be seen on the surfaces adding life to the visual allure.

PCGS 299, NGC 168, CAC 20. The last one to sell realized \$3,643 in our July 2017 Regency Auction and the current PCGS Price Guide value is listed at \$4,750. Keep in mind a 65 (Population 39) is a five figure coin without CAC. Good luck.

5C 1928-D PCGS MS66+ CAC

WOW! This 28-D is SUPERB in every way, no wonder it is tied for second finest graded at PCGS! Impressively brilliant mint frost shows off with a satiny bloom. The peripheries have a soft peach iridescent hue that fades to an icy, pale blue. Generally nicely struck for the issue with nearly complete definition of the entire design type. There are no serious signs of contact on either side and the eye appeal is exceptional, befitting a coin that ranks so high on the Population Report.

PCGS 62, NGC 6, CAC 19. There are ONLY THREE MS66+s graded at PCGS, with a single coin graded finer. The only example to ever sell in auction realized \$8,519 in September 2015. The current PCGS Price Guide value is listed at \$5,500. The single MS67 has never sold in auction and is likely impounded in a major collection, making the presently offered SUPERB coin one of the FINEST you are likely ever to be able to own. Tied for FINEST GRADED and with its CAC endorsement, may well be the finest known example. Both obverse and reverse are well struck and awash in iridescent shades of pink, green, blue, orange, violet, and gold. The luster is strong and bold. The surfaces are clean and free of any distracting marks. You certainly will have a hard time finding another 35-S nickel that looks like this!

PCGS 48, NGC 11, CAC 12.

PCGS has graded just five in 67+ as FINEST. The only two examples to sell were NOT CAC and include the wildly toned Angel Dee's coin we sold in December 2016 for \$11,456. A lovely, originally toned CHOICE 3 Legged nickel. Rose and gold accents are dusted over pleasing frosted surfaces. Nicely struck for one of these. An always popular and well known variety, it was created when a mint employee filed off some clash marks from the die, accidentally removing the front leg of the bison.

PCGS 346, NGC 296, CAC 68. We cannot find a record of an NGC/CAC coin having been sold in auction since June 2014 for \$3,819. The current PCGS Price Guide value is \$3,800. This key date issue is bound for a fine set.

**LOT 109****5C 1937 PCGS PR67 GOLD CAC**

Clearly this is NOT your typical Proof Buffalo! This SUPERB example is virtual PERFECTION! The quality is verified by the coveted GOLD CAC sticker, meaning they would "green bean" it at the next grade up. Housed in an old green tag holder, this remarkable coin has beamingly brilliant mirrors that reflect with a bold, vibrant flash. The peripheries are framed by a stunning iridescent rainbow that adds dramatically to the exceptional eye appeal. This coin is exceptional in every way!

PCGS 508, NGC 319, CAC 318. CAC has awarded just NINE gold stickers. Since the gold sticker indicates that CAC believes this coin is undergraded by a point at least, the last PR68s graded by PCGS sold in our July and September 2018 auctions, in the \$5,000-\$5,200 range (not CAC); a CAC example sold in April 2018 for \$6,600. The current Collector's Universe value is \$7,250. This coin is exceptional and very high end and will attract stiff bidding competition from anyone looking for a very special Proof Buffalo nickel. Good luck!

This is the **FINEST** certified example of this important repunched mintmark variety. Not only is it the highest graded, but its eye appeal is spectacular! Sharply struck devices show off full separation of the steps on Monticello and the D/D feature is crisp and bold, visible to the naked eye. A brilliant nickel-silver luster blooms with a stunning vibrance on both sides, accenting the amazing gold, blue, and apricot rose color. Even under the careful inspection with a strong glass, there are no singularly distracting ticks or marks. Needless to say, this is an impressive and important early date Jefferson nickel with a bold visual allure!

PCGS 1, NGC 0. There are **NONE GRADED FINER** at either service. Indeed, PCGS has only graded four in MS66 FS (no+). We can't say enough WOW's to describe this monster WOW coin! We are shocked that PCGS did NOT + this piece.

Sensational mirrors beam boldly from all over. The mirrors are crystal clear and have zero impairments. When you twirl the coin, you see an electric rolling liquid mercury look. This coin has tremendous flash. Jefferson and all of the details are thickly frosted and are fully struck. Coins like this are few and far between. The eye appeal crazy!

PCGS 9, NGC 1, CAC 7. The current Collector's Universe value is \$2,000. Prior to this one, we sold one in our May 2018 Regency Auction for \$3,173. In PR67 CAM CAC one sold for \$14,100 in 2014 and probably would bring \$20,000 today. In our very strong opinion, these are vastly UNDER-valued (especially looking like this)!

PCGS# 84180 | ESTIMATE: \$1,700+

LOT 120**10C 1796 PCGS MS63 CAC**

A lovely CHOICE Mint State example from the first year of dime production. Frosty and semi-reflective surfaces surround crisply struck devices. Every detail is rendered to full definition in Liberty's hair and essentially complete in the eagle's breast feathers. Only the slightest weakness is noted in the centers of stars 12 and 13. Pale gold blends with rich silver and dove accents. An earlier die state with just a crack at TA in STATES, not a full fledged cud. Despite the MS63 grade, there are no singularly significant marks to describe. The JR-3 variety is rated as R-5 and is the second rarest variety for the year behind the JR-5.

This impressive coin is ex John Whitney Walter Collection, Stack's, May 1999, lot 1768. John Whitney assembled an essentially complete collection of the coins of 1796 by die variety, half cent through \$10 gold, and he was dubbed "Mr. 1796." He purchased this coin from the Stack's April 1988 sale of the F. Dabney Caldwell Collection, lot 2324. There are two other examples of this R-5 variety graded MS63 by NGC, these include the terminal die state that sold one lot before this one in the Whitney Sale, lot 1767 (this piece had an extensive pedigree going back to the early 20th century). The other is from the Haig Koshkarian Collection, ANR, March 2004, lot 46 (purchased from Ed Milas in May 1987). Though not noted in the ANR catalog, the Koshkarian coin is the "MS63" that appeared in RARCOA's session of Auction #81 listed in the census in the JR book. We can say for certain that this coin is tied for finest for the variety. John Whitney Walter's Collection was sold in May 1999.

PCGS 15, NGC 20, CAC 6. A highly important coin, for the early dime specialist. With its impressive qualities, this choice BU coin will be a centerpiece for any U.S. type set or early dime set. A PCGS/CAC JR-1 (rarity-3) sold in the 2017 ANA auction for \$41,125. The current PCGS Price Guide value is listed at \$42,500. Very RARE any finer, with a PCGS MS64 being worth over \$70,000. This is an important opportunity to buy a well pedigreed, RARE 1796 Mint State dime that should not be taken lightly or missed! Good luck!

 Only 35,480 dimes were struck at Carson City in 1872, and these circulated extensively. Today, between PCGS and NGC only a SINGLE coin survives in Mint State (the James A. Stack-Waldo Bolen-Battle Born- Gene Gardner Coin, graded MS63 by PCGS). The PCGS CoinFacts condition census drops to XF45.

Lightly worn surfaces from a relatively short stay in wild west commerce. Boldly defined on both sides, the eye appeal is very nice overall with dove patina and shades of gold and lilac in the protected areas. We note, only with the aid of a powerful glass, a few ancient circulation marks, nothing distracting and the eye appeal is very nice.

PCGS 5, NGC 4. Looking at PCGS CoinFacts and the auction price database, only 1 PCGS-graded XF40 coin has EVER sold in auction, and that was way back in November 2003 - a 15+ year old APR is obsolete (it realized \$7,188; also note the last NGC XF40 sold in May 2000!). Doesn't anyone realize how cheap these have become??? As time goes on, it will only be harder to find PCGS CAC pieces as demand is growing for sure.

A lovely SUPERB Proof example of the first year of issue of the Barber Dime type. Fully struck and sharply detailed devices stand out against the highly reflective mirrored fields. A deep red, gold, blue patina flows over both sides, imparting a great visual allure.

PCGS 12, NGC 16, CAC 8. The current PCGS Price Guide value is \$2,250. Last auction record was \$2,585 in September 2018. Historical price records range from \$3,000-4,000, so paying at or above recent prices makes sense to acquire a very pretty and high-end coin that is one of the FINEST in the designation!

A superlative quality beauty, one of the prettiest examples of this date we have had the pleasure of handling in a long time! Both sides are drenched in a aqua-blue and amber-rose toning that is brought out by the deeply reflective, brilliant vibrance of the mirrored fields. The devices boldly stand out, giving this amazing SUPERB GEM a great CAMEO contrast that adds to the pristine visual allure.

Only 792 Proofs were struck. PCGS 13, NGC 9, CAC 17. The most recent example to sell in auction was in the 2017 ANA auction, realizing \$3,290; prior to that, one sold in the 2014 FUN auction for \$8,225. The current Collectors Universe value is listed at \$3,500. A truly amazing coin that will sell for a very strong bid when it crosses the block! Worthy of a world class cabinet of Barber dime Proofs!

Truly a marvelous coin! Cover the PCGS tag and you would think this blindingly reflective GEM is a DCAM! Brilliant, untuned surfaces are as reflective and flashy as the day this GEM was carefully removed from the dies. The sharply impressed devices are highly frosted and present great contrast against the deeply mirrored fields. The eye appeal is superb.

Only 735 Proofs were struck. PCGS 10, NGC 14, CAC 10. The current Collectors Universe value is listed at \$1,250 and the most recent CAC-approved example sold nearly four years ago, realizing \$1,175 in April 2015. This impressive coin is worthy of a very strong bid when it crosses the block! Barber proofs have gotten too cheap, the market has unfairly beaten these down! It would be a great set to begin at today's levels.

One of the FINEST graded examples of this low mintage proof date. AMAZING watery mirrors have a quicksilver look to them, dancing under wonderful and totally original iridescent teal, lilac, sea-green, orange-gold, and rose toning. The eye appeal and technical qualities are all beyond what you would expect, even for a coin of this lofty grade! We are not exactly sure why CAC did not sticker this SUPERB GEM, it certainly looks worthy of CAC approval!

Only 543 were struck. PCGS 5, NGC 7. The last two examples we sold brought between \$10,000 and \$11,000 but they were both CAC. Regardless, this MONSTER GEM should bring a price close to the current PCGS value of \$10,000. NONE ARE FINER in the designation, making this a real prize for the collector of Proof Barber dimes!

Ex Bassano Collection.

Hailing from one of the greatest specialized collections of Mercury dimes ever sold, the Louis Bassano Collection, this remarkable GEM is a truly special coin. Back in 2000 when it was last sold publicly it was tied for FINEST graded. In the subsequent 18+ years, just three coins have graded higher, all MS66+ FB.

Rich orange and crimson-red patina blend with steely-blue pastel iridescence on both sides, blanketing the smooth, GEM quality surfaces. A vibrant luster is not impeded by the bold toning, and has a SUPERB brilliance that glows from below the layers of wonderful color. The devices are very sharp with crisply defined details, especially for the issue. The central bands are fully split and rounded and all the other devices are fully rendered by a complete strike. Offering such a great combination of high grade, superior eye appeal, total originality, freshness, and pedigree, this 17-D dime has it all for the specialist collector.

PCGS 12, NGC 5, CAC 6. This was the first MS66 FB listed as having sold in auction, realizing \$14,950 in the 2000 ANA auction. There has not been a CAC-approved coin sold since April 2012. Only three MS66+ FBs have been graded by PCGS and this coin likely is on par with those in terms of eye appeal. A great coin for the most advanced Mercury dime Registry Set and worthy of a premium bid!

This coin is so close to being an MS68 FB. We can't imagine a better 1920-D!

The surfaces are virtually perfect. Only using a super strong glass can you see a few microscopic ticks/frost breaks. Regardless, they take nothing away from this coin being a well deserved MS67FB. The surfaces appear satiny smooth. A really strong luster glows from all over. A thin peripheral band of original light green/reddish gold frames the rims on both sides. The centers are a pale lavender color. Miss Liberty and every detail are so sharply struck you do not need a glass to see the split and rounded bands. The eye appeal is memorable and tremendous!

FROM THE GRAND PRIX COLLECTION

Tied with perhaps as many as four coins for second FINEST seen by PCGS of this important KEY date!

Glorious and elegant, the luster blooms with a bold vibrance. The strike is almost razor sharp in nature, with no hints of softness to be found. Traces of golden iridescent tone and a touch of icy blue and clear rose add to the SUPERB look. We note a single, stray contact mark and minor spot in the right reverse field for the sake of full disclosure.

The American economy took a short but sharp stumble in 1921 as the businesses converted back from producing war goods to more peacetime activities. Farm prices fluctuated downward. These economic machinations dropped the demand for new coins so several dates saw much lower mintages than commonly seen in this era. This Denver Mint 1921 dime is destined to be a major highlight of an advanced collection and will certainly well represent this elusive issue as close to perfection as can be imagined.

PCGS 27, NGC 13. There are five coins listed as graded MS66+ FB at PCGS, and just a single MS67 FB finer. The three auction records we can find for the grade are for all CAC approved coins. The most recent was in the 2019 FUN auction where an example realized a record \$50,400; prior to that one sold in March 2017 for \$18,800 and we sold one in September 2015 for \$14,688. The current Collectors Universe Price Guide value is listed at \$32,500. A coin that is bound for a WORLD CLASS collection of Mercury dimes and will see extremely intense bidding. Good luck!

An incredible SUPERB GEM example of this date, and conservatively graded at that! Housed in an Old Green Holder, this marvel has a bold, strong, minty fresh luster that beams from all over on both sides. The surfaces are creamy white and totally untuned, looking as fresh today as it did when it fell from the dies in 1926. A strong glass reveals nothing but a tiny, insignificant tick or two, none of which impose on the exceptional eye appeal. More brilliant than the MS66+ FB we sold in the Hallett Collection and has a SUPERB look.

PCGS 27, NGC 9, CAC 19. Just a dozen coins are graded higher. This coin is fresh to the market and likely undergraded (no guarantees, but the eye appeal is spectacular). Wow! This is an amazing example of this important KEY date Mercury dime! Bright and brilliant silver luster radiates all over on both sides. Sharply struck throughout, the central bands are fully split and separated which is a rare feature for this date that is often weakly struck.

The San Francisco mint issues of 1926 were not well produced, nor were they saved in any quantity at the time of issue. Red cents, Gem nickels and dimes, and full head quarters are all very rare and in high demand. This GEM dime is a great example of the date, tied for second FINEST graded by either service.

OUR ESTIMATES

The estimates you see published in this catalog are based on HAMMER. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

Brilliantly lustrous on both sides, the fields have a rich, flashy sheen that glows with a stunning vibrance. The devices are sharply struck and have a wonderful glossy texture to them that gleams with a seductive glow that contrasts against the delicately dusted gold iridescent toning. This is an amazing survivor of the date. Every detail is very well struck and fully formed, with crisp, full definition.

As the nation sank deeper into the Depression, the need for coinage fell dramatically, the mintage of dimes fell to 1.8 million and because a dime did mean something to so many people suffering from the ravages of the economic situation, precious few were saved at the time of issue. That an example in such a lofty state of preservation still survives is just by chance!

10C 1926-D PCGS MS66+ FB CAC

A totally ORIGINAL GEM. Boldly lustrous surfaces have a brilliant satin sheen that accents the multi-hued dappled shades on both sides. Gold, olive, pewter, and tan combine throughout the peripheries. The surfaces are smooth and the details are especially crisp and sharp. The eye appeal is great.

PCGS 34, NGC 9, CAC 19. There are seven listed in 66+ FB and a mere five coins in 67 FB finer. The most recent MS66+ FB to sell in auction was the white, CAC approved coin in our sale of the Hallett Collection in our September 2018 Regency Auction and the current PCGS Price Guide value is listed at \$4,250. Keep in mind that the most recent PCGS/CAC MS67 FB sold for \$60,000 in the 2019 FUN auction. This beautiful and totally ORIGINAL GEM is worthy of a very strong bid!

10C 1927 PCGS MS65 FB GOLD CAC

An absolutely GORGEOUS GEM 1927 dime! Housed in a first generation PCGS slab and conservatively graded as proven by the coveted GOLD CAC bean, and we could see this coin grading at LEAST MS67 FB (no guarantees)! Whether or not it upgrades to a 67, is just a small part of what makes this coin special and worthy of a premium bid. The obverse is fully toned and spectacular! A full, booming luster brings out the shades of crimson, magenta, and gold dominate with accents of violet and emerald in places about the rim. We rate the toning a 9.5+ on our 10 point scale and the eye appeal is beyond anything you would imagine for a 1927 dime. Sharply struck and very clean on both sides.

PCGS 271, NGC 94, CAC 30 (only TWO are GOLD beans). Toss out your price guides and don't bother looking at APRs and just realize what a UNIQUE 1927 dime this is and bid accordingly. Our estimate may well prove to be too low when the hammer drops! Good luck!

 TIED FOR FINEST KNOWN!

Incredible quality! This immaculate GEM is not accurately described as being SUPERB--the word just does not convey the stunning eye appeal!

A rich, frosty luster blooms on both sides, accenting a band of crimson and gold tone at the peripheries. The devices are crisply struck up, even in the centers. The bands are all fully split and rounded as expected for the FB designation. Everything about this beauty is exceptional. Like us, you will likely be unable to put this jewel down!

PCGS 23, NGC 10, CAC 7. Only three examples have graded MS68+ FB, only one of which has sold in auction, realizing \$5,289 in June 2014. The current PCGS Price Guide value is listed at a ridiculously low level. We calculated a much more appropriate estimate. Bound for a world class set!

Ranking at the top of the Population Report, this stunning, SUPERB GEM is an amazing coin that is among the FINEST KNOWN to PCGS.

Stunning high end luster blooms from all over. The surfaces show a vivacity to the frosty, satin, brilliant, shimmering luster. The lustrous surfaces really gleam in the light and are accented by very colorful, original toning at the peripheries, especially on the reverse. Shades of gold, aubergine, emerald, olive, amber, and crimson patina are brought out by the brilliance. Sharply struck devices stand out wonderfully against the surrounding, smooth, problem free surfaces. The eye appeal is fantastic and unimprovable!

PCGS 10, NGC 1. There are NONE graded finer at either service. We sold the untuned Hallett coin in our September 2018 Regency Auction for \$6,169. The current Collectors Universe value is listed at \$6,500. This stunner has a great toned look that will delight the collector and is worthy of placement in a world class set!

10C 1940 PCGS MS68+ FB CAC

This is just an AMAZING 1940 dime in every way possible! Tied for the **FINEST** certified and a truly magnificent coin.

Were it not for a hint of pastel iridescent toning, you would think this coin was struck moments ago and carefully taken off the press with cloth gloves. Exceptionally radiant mint bloom captivates the viewer's attention, accenting the bold devices and delicate iridescent hues. Even under the most intense inspection with a strong glass, not a single flaw can be found. It is truly a 20th century numismatic marvel.

PCGS 34, NGC 6, CAC 7. There are just three coins graded MS68+ FB and NONE FINER. The last one to sell realized \$7,050 in February 2014 five and a half long years ago! The current PCGS value is listed at \$7,500. We suspect this coin will realize a strong price before being added to a world class collection of Mercury dimes.

WHOA! This is an amazing, virtually PERFECT Mercury dime with an absolutely stunning look! Really it looks more like a 39-D than a 43-D. Razor sharp in strike, every detail is fully and crisply defined by an exacting and precise blow from the dies. The lustrous surfaces are pristine with no visible imperfections anywhere! Sprays of color, like a Jackson Pollock painting adorn both sides, offering wonderful red, violet, gold, orange and green hues that make the original silver areas appear more brilliant. The eye appeal truly is marvelous and is a beauty to behold! This is the PCGS CoinFacts Plate coin as well as being tied for **FINEST** graded!

PCGS 3, NGC 3. The only example to ever sell was another toned beauty that was CAC approved and sold in our June 2015 Regency Auction for \$12,925. Tied for FINEST graded 1945 Micro S dime. A SUPERB coin that brought a record price in our December 2016 Regency Auction, where it was described as:

"Among the very FINEST examples of this popular variety, the presently offered jewel is well struck and lustrous. The bold mint bloom makes the lemon, olive, lavender, apricot, and subtle aubergine hues come to life. The color and luster combine to accentuate the sharply defined details in Ms. Liberty's winged cap as well as on the fasces."

To that we will add that it is a very memorable SUPERB Mercury dime, and will be a highlight in any short set or complete set.

PCGS 4, NGC 1, CAC 2. As mentioned, this coin sold for a RECORD \$18,800 in our December 2016 Regency Auction. Prior to that, one sold in March 2013 for \$17,038. Today, PCGS lists a \$21,000 value in its current Price Guide and it may well sell in excess of that amount when it crosses the block in Regency Auction 31. 25C 1831 SMALL LETTERS. PCGS MS66

A Condition Census B-4 that ranks at the top of both the Rea et al and Tompkins listings of finest known examples. This one is NOT mentioned on either list.

This is a SUPERB and impressive GEM Bust quarter. Everything about this beautiful type coin screams quality and originality. The fields are flashy and have a nearly prooflike reflection in the obverse and reverse fields. The bold luster catches the light and brings out all the variegated iridescent hues, ranging from champagne-tinged silver gray in the centers, then deepening to amber-gold, rose, olive-russet, and teal-blue toward the rims. Every detail is essentially full and razor sharp in definition and they are frosty, standing out nicely against the lightly mirrored fields.

PCGS 8, NGC 4. The James W. Lull coin that ranks at the top of the Rea, et al listing was later sold in the Pogue Collection for \$55,813. This is a more recent addition to the census, selling for \$52,875 in July 2013. The current PCGS Price Guide value is listed at \$42,500. As one of the FINEST graded examples, it should see very strong bidding from not just Bust quarter collectors, but would make an inspired addition to any cabinet of GEM type coins.

25C 1838 NO DRAPERY. PCGS MS65+ CAC

When we first saw this SUPERB GEM, our hearts raced. It is one of the BEST pieces we have ever seen for the Type! The quality is clearly VERY high-end! In fact, we unhesitatingly state this coin is BETTER than the MS66 that sold in Pogue for only \$54,050 (and was NOT CAC). Had the Pogue coin been nice and CAC-it easily would have brought \$65,000+.

Exquisite surfaces are a collector's delight. Only if you use a strong glass and look really hard will find a pinpoint tick or two and that is it. Overall, the surfaces are clean and satiny smooth. A glowing type luster illuminates the beautiful toning. Moderate and very pretty shades of totally original purple/gold/pale blue/deep champagne swirl all over. Miss Liberty and the details are frosty and are boldly struck. The eye appeal is seriously gorgeous!

PCGS 3, NGC 6, CAC 3. PCGS has only graded THIS coin a MS65+. It is nearly impossible to find this date really nice like this. The last PCGS MS65 CAC sold in auction for \$32,900 in June 2014. Even though PCGS has graded 3 higher-only ONE is CAC. We cannot stress enough the beauty and superior quality of this piece. Hard to believe, this amazing out of this world GEM is a DUPLICATE from the #1 all-time MS Barber Set-the RSD Collection. Legend Numismatics is extremely proud of this set, and the fact it is 100% CAC. In addition, our sister company exclusively built it. Coins like this just do NOT exist.

At first glance this coin reminds you of a Proof. Not only are the surfaces the ultimate in perfection, they are boldly semi-prooflike. You can use the strongest glass and there are NO impairments to be found. The flash of the mirrors combined with a strong luster really show off the world class colors. Phenomenal shades of pearl green/moderate forest green/gold/blue/reddish gold/violet swirl all over in such an incredible way that any world class artist will smile and sigh. Miss Liberty and every detail are frosted and are fully struck. EVERYTHING (including the eye appeal) about this SUPERB GEM is just beyond stunning!

WOW! This is truly a SPECTACULAR GEM survivor. As a date, the 93-S is uncommon in all grades, but especially so in lofty Mint State grades. Not only is this coin high end in terms of technical quality, it is STUNNING in terms of eye appeal! A bold cartwheel luster rolls smoothly along the superb surfaces. The obverse is boldly toned in beautiful blueberry and tangerine shades, the patina really sparkles in the light. The reverse is mostly untuned with a touch of gold at the rim that really accents the flashy, semi-prooflike luster. Both sides have full, dynamic strikes with complete, crisp definition.

A SPECTACULAR, SUPERB GEM example that is arguably the **FINEST KNOWN 1911-S** quarter that exists!

Immaculate surfaces are the epitome of sheer perfection. Clearly this coin was lovingly cared for by whoever collected it before ending up in the Eliasberg Collection (likely John Clapp, who would have purchased it directly from the San Francisco Mint). The surfaces are free of any marks, indeed, there are no visible imperfections even using a powerful glass. Delicate, pearly iridescent patina graces both sides and is brought out by a bold, satiny luster that truly glows. The eye appeal is very high-end for sure!

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

The mintage of 40,000 quarters was the lowest in the entire Barber quarter series. News of the low mintage spread quickly and while VERY RARE, there are some Gem Mint State survivors.

This GEM has a superior, glowing mint luster that beams all over on both sides, underlying the sparkling golden tone. Accents of icy blue and richer peach iridescent toning bursts from the fields and on the devices. Sharply struck and frosty devices are quite impressive and stand out. There are only a couple of minor ticks that can be found with the aid of a strong glass and none are distracting to the naked eye. The eye appeal is superlative in every way!

PCGS 17, NGC 4, CAC 2. There has not been an example sold in five years, not since this GEM sold for \$28,200 in the 2014 FUN auction. The current PCGS value is \$32,500 and this coin is worthy of a strong bid indeed. There has not been a PCGS/CAC MS66 sold in over eight years, making this an excellent choice for a GEM set. This is a great looking SUPERB GEM Type 1 Standing Liberty quarter. From the chiseled strike, satiny mint luster, delicately toned, clean surfaces, this coin has a lot to offer.

Soft, pastel periwinkle toning dominates the centers, while a frame of greenish-gold patina circles the reverse. A strong satiny luster blooms on both sides, bringing out the slight differences of the iridescent toning. The sharply struck devices show full definition on both sides. A couple of hidden ticks account for the assigned grade but do not detract from the outstanding eye appeal of this SUPERB beauty.

PCGS 85, NGC 62, CAC 38. The most recent example to sell in auction realized \$5,760 in the 2018 ANA auction; but there really is a huge range of values from \$2,820 to \$13,200! This lovely coin should fall toward the midpoint of that range. This is a great coin for any collector of Standing quarters or type coins. EXTREMELY RARE any finer, with just eight coins currently graded MS67+ FH as finest.

25C 1953-S PCGS MS67 CAC

To call the superb toning on this GEM amazing would be an understatement. It is also unfortunate that the toning schemes are not the other way around; the reverse toning is very similar to that on the famed \$129,500 Franklin half dollar we sold in September 2018.

Deep crimson and ultra deep purple tones dominate while portions of Washington's bust are brilliant silver with tinges of icy-emerald green that comes out at certain angles. The reverse, likewise has similar hues, but evenly distributed across the surfaces with a more iridescent depth of color, allowing the bold luster to bring out the subtleties of the patina.

PCGS 114, NGC 310, CAC 74. There are 31 MS67+s graded finer at PCGS. Ignore the APRs and Price guides, you will be hard pressed to find another monster toned 53-S quarter. Clearly this beauty sat undisturbed for 65 years in the original cardboard holder.

Not only is the SUPERB example among the FINEST graded for the date at PCGS (none have graded higher), it is also a MONSTER toner! Totally original and beautifully toned from storage in the same old mint set holder. As the other 53-S coins in this sale. Brilliant luster beams through the rich orange, crimson, royal purple, and subtle emerald-teal green hues. The eye appeal is off the charts bold! The surfaces are immaculate and pristine.

PCGS 145, NGC 313, CAC 74. Here is another coin that the APRs and price guide values cannot capture the eye appeal. This coin will sell for a record price when the gavel finally falls on it. This is an opportunity of the utmost importance for the advanced Washington quarter set collector that should not be overlooked!

A splendid SUPERB GEM with an impressive look! Boldly reflective, watery mirrored fields beam through a totally original touch of gold and iridescent toning from storage in the original mint cellophane.

PCGS 148, NGC 93, CAC 44. There are 29 coins graded PR67+ with only a half dozen PR68s sitting at the apex of the Pop Report. The last three records are all from January and February 2018, in the \$2,468 to \$2,880 range and the current PCGS value is \$2,500. Keep in mind that one of the PR68s, if one was to come on the market, would cost somewhere in the \$7,000-\$9,000 range. We think this GEM is a great relative value!

50C 1794 PCGS VF35 CAC

O-101. This is one of the highlights of the present sale, a perfect collector grade example of this first year of issue of the half dollar denomination. Rich dove gray shows soft accents of pewter and russet-tan on the reliefs. Smooth problem free circulation on both sides. Even under strong magnification, the surfaces are free of any serious marks, signs of cleaning, environmental damage or any other post minting flaws. The eye appeal is very high end for the grade, and we have seen XF40s that do not have the outstanding visual allure that this totally original "gem" VF has.

PCGS 24, NGC 18, CAC 10. The last PCGS/CAC example sold back in November 2012 for \$28,175. More recently an NGC/CAC coin sold for \$24,675 in the 2017 ANA auction. Clearly the current Collectors Universe value of \$22,500 does not take into account the high end quality of this one.

O-101. Multiple WOW factors here! This coin is such a SUPERB GEM AU we believe it is God's gift to all 1794 50C (except for Simpson's which is MS64). Of course PCGS grades these coins ridiculously too tight. We can assure you this monster of an AU is not one of those you have to question "is this an XF or an AU?" It absolutely is one of the BEST. AU's we have ever seen or handled. For a 1794 50C, this piece has mind boggling surfaces. Not only are they incredibly clean, but they actually have a fair amount of ORIGINAL luster. We sold an MS61 that did not have anywhere near the "pop" this coin has. There are NO adjustment marks (that is huge). The luster brings out the best of the gorgeous and even totally ORIGINAL toning of deep pewter/gold/pale navy/pale purple colors. Miss Liberty and the details are exceptionally struck and show strong detail. There is NO rubbing on the high points and the wear is light and even. The eye appeal is tremendous!

PCGS 2, NGC 8, CAC 1. This coin has NEVER been in auction. In fact it has been away with an incredibly picky Early Bust coin specialist collector. You will too! The Newman AU 55's were all weak or cleaned and do not come close to this coin's quality. We cannot stress enough what a wicked cool opportunity this is for any Early Bust Half Collector or cool coin lover!

Imagine the stories this coin could tell! Evenly worn with just some minor marks scattered about, none of which are individually distracting to the naked eye (we make note of a single scratch near star 9 that curves around the lower points). Lovely tan-gray color has accents of pale slate-blue and russet-tan. The reverse is rotated about 80° where the eagle's head nearly points to 3:00. Very similar to the Overton Plate coin.

 So many superlatives could be used to hype the amazing quality and eye appeal of this "GEM" XF! However, its numismatic credentials more than speak for themselves!

A condition census O-119. Exceptional quality for the date and grade with hints of luster that glow through pearly dove and gold iridescent toning on both sides. Sharply struck and nothing but light problem free wear. There are a few inconspicuous adjustment marks that blend into the hair details. The Overton-Parsley condition census is 55,40,30,25,25 for this R-4 die marriage.

PCGS 50, NGC 36, CAC 13. The most recent PCGS/CAC example to sell in auction brought \$12,000 in the 2018 FUN auction, and before that, the most recent to sell brought \$11,500 in the 2012 ANA auction. LOT 189

50C 1796 15 STARS. PCGS XF40

O-101, Rarity-5. What a wonderfully wholesome and original coin that has long been known to be one of the most difficult type coins to obtain in any grade. Only 3,918 pieces of the Draped Bust, Small Eagle two-year TYPE were struck in both 1796 and 1797, and survival rates were tiny. Research by numismatist Jon Amato has documented only 74 distinct examples of the 1796 15 Star variety and of that meager number approximately 30% are damaged with tooling, scratches, or cleaning that keeps them from being graded. That puts even more pressure on the few coins like this that offer attractive surfaces, color, and are trouble free. The strike is well balanced, and the wear is even and light on the highest points of the Robert Scot and John Eckstein design. Remarkably there are no adjustment marks or rim bumps on this coin. The fields are generally pleasing, with just a few tiny contact marks noted here and there, none of which are distracting and are perfectly acceptable for this circulated grade example. This coin would clearly make a welcome addition to any advanced collection.

After the initial but modest production of half dollars in 1794, the Philadelphia Mint really cranked up the presses in 1795, striking nearly 300,000 coins of this denomination, all of the Flowing Hair design. Apparently demand was satisfied for the time being, as so few half dollars were then struck in 1796 and 1797, and all of these were the Draped Bust, Small Eagle style during these two years. Half dollar production then came to halt until resuming in 1801, and by that time the new Heraldic Eagle reverse style had been adopted. Needless to say, demand from date, variety, and type collectors alike keeps pressure high when one of these 1796 half dollars appears on the market, and bids can come from many possible suitors.

PCGS 2, NGC 0. The most recent example that we sold in a similar mid range grade was a PCGS VF30 that we sold for \$99,875 in December 2015. The presently offered XF coin is a wonderful survivor of this rarest silver type coin and bound for a great type or date set.

This is a VERY HIGH-END 1810 half dollar! Iridescent toning deepens to the rims, the color brought out by a vibrant and strong original mint luster. Very crisply struck devices are not what is usually encountered for this variety. Struck from a later state of the dies with multiple obverse die cracks. Only the slightest touch of friction on the highest points.

PCGS 101, NGC 54, CAC 26. Most PCGS-graded coins have sold in the \$2,233 to \$3,630. The current PCGS Price Guide value is listed at \$2,850. A great coin for any collector-- the eye appeal is awesome!

**LOT 191****50C 1811 O-107. SMALL 8. PCGS MS64+ CAC**

A condition census (likely second finest known) O-107, which is a scarce R-4 variety.

Awe inspiring luster shines in a light and brings full definition to the very pretty original toning. Sharply struck, which is surprising considering the late states of both dies, especially the reverse which, by the time this coin fell from the press, was seriously shattered. The diagnostic crack that encircles the legend from C in the denomination around to the rim above M in AMERICA is thick. An additional crack bisects the reverse from the rim above E in AMERICA, which weaves across the wing, through the shield, to the first pair of olive leaves. That crack splinters off and goes into the field between the eagle and the scroll. Other minor cracks can be seen coming out of the rim and ending in a letter or some other design element. The eye appeal is SUPERB and this coin really is a GEM.

PCGS 39, NGC 7, CAC 15. Only 6 examples are graded MS64+ at PCGS. This is the most recent PCGS MS64+ CAC to sell, realizing \$10,869 in our May 2017 New Orleans Regency Auction. Prior to that, one brought \$14,100 in February 2017 and another sold for \$18,800 in 2014. This GEM has exceptional eye appeal and with its status as a very scarce Overton variety, it should see strong bidding when it crosses the block.

Ex Eliasberg, as noted on the insert. A condition census (or nearly so) level CHOICE example of this popular early Bust half dollar date. Struck from heavily clashed dies as typically seen, both sides have a classic "Eliasberg" look with light golden-champagne-tan patina with tinges of richer russet in the legends. A wonderfully struck example with full detail and really strong eye appeal. The 2005 Overton Census is 60,60,60,60,55 and the Tompkins census is 64,64,64,63,63.

Ex. Harlan P. Smith Collection (Chapman's May 1906); J.M. Clapp; John H. Clapp; Clapp Estate sold en bloc to Louis E. Eliasberg, Sr by Stack's in 1942; The Eliasberg Collection, Part 2, Bowers & Merena/Stack's April 1997, lot 1727; ANA Auction, Stack's Bowers, August 2012, lot 9038 (as NGC MS63).

O-101--the only dies utilized to strike the 47,150 half dollars with the 1815 date.

The KEY date to the ever popular Capped Bust half dollar series and all are overdates; the 2 is clearly seen under the 5 to the naked eye. The presently offered AU58 is a true prize for the specialist collector. Rich patina blankets the semi-satiny surfaces. The details are boldly defined, and well struck throughout, except on some stars.

The entire mintage of 47,150 was struck using a single pair of dies and was delivered early in 1816. Hours after, one of the buildings that housed the planchet rolling equipment burned down, preventing gold and silver coins from being produced again until 1817 (when only half dollars were struck for depositors). Because of the low mintage, the date is constantly in demand from collectors.

PCGS 21, NGC 25, CAC 5. While definitely not the same coin, there was a similar AU58 that sold in the 2014 FUN auction for \$30,550. This coin sold for \$22,325 in our December 2017 Regency Auction and the current PCGS Price Guide value is \$27,500. 50C 1817/3 OVERTON-101A. PCGS MS63+

Ex Link, as noted on the holder.

One of the **FINEST KNOWN** examples of this very popular overdate. Clearly in the Condition Census, this 63+ is very **CHOICE** for the variety.

The quality and eye appeal are truly dramatic! Indeed, the only “flaw” are a pair of mint made slag marks on the reverse which are part of the planchet production process (this is where some impurities in the silver came out to the surface as the silver ingot was being drawn to prepare the planchets). Both sides offer a deep blue and orange-amber toning that captivates the viewer’s attention. Sharply struck, the devices are crisply impressed by the screw press. The 7 over 3 in the date is visible even at arm’s length. A bold satin luster brings the beautiful toning to life with a vivid brilliance. The dies were sharply clashed before this one was struck.

Try as we might, we cannot find a prior pedigree to this high grade, beautiful **CHOICE** Mint State 1817/3. It does not match the Queller or Vermeulle coins which were both described as Very Choice Brilliant Uncirculated, but were uncertified when they sold in 2002 and 2001 respectively.

PCGS 3, NGC 0. None of the three MS63+s have ever sold in auction. In September 2016, we sold a PCGS MS63 for \$27,025 in Regency Auction XVIII. In July 2013, a PCGS/CAC MS64 sold for \$61,688. This high grade example will see considerable bidding when it crosses the auction block. The dramatic boldness of the overdate and strong eye appeal will entice a very strong hammer price when the auctioneer calls the last bid! Good luck.

A beautiful and original GEM that is among the very finest of the variety known, the 5th Edition Overton Census is 66,65,65,64,64, and ranks just behind the PCGS MS66 Pogue and NGC MS66 Overton examples.

A strong, satiny mint frost provides an ember-like glow that lies beneath a pearly-silver, lilac-gray, and olive-tan patina that deepens to a rich gold at the peripheries. A swirling cartwheel luster emboldens the essentially pristine surface quality. A strong glass reveals zero imperfections either in the fields or on the well struck devices. The details are generally crisp in definition, with just some weakness, as usually seen, in a few of the stars and eagle's feathers. We are not entirely sure why this coin did not CAC, it is very pleasing and original. The eye appeal is wonderful, as should be expected for a GEM.

PCGS 5, NGC 0. Prior to selling in our sale of the Konstantine Collection, there had not been an example sold in auction since the 2012 ANA auction--may as well be a lifetime! The current Collectors Universe value is \$32,500 and keep in mind that the Newman NGC MS65+ CAC sold for nearly \$50,000 in November 2013. PCGS has graded only four coins finer, the finest being the aforementioned Pogue coin. This beauty would make a superb addition to any world class cabinet of Capped Bust half dollars, or high-end type set.

Lustrous golden brown with highlights of reddish orange and pale blue. Some light nicks are seen especially under the eagle's beak, and are accounted for by the grade designation. Attractive overall, and especially desirable as a scarce date. Perfect dies." In Legend's sale's room copy of the catalog, it was graded MS62. Today, nearly 22 years later, we believe PCGS was a touch conservative. We note only the slightest trace of cabinet friction, we do not see any distinctive wear from commerce. The details are sharp, and the eye appeal is exceptional.

PCGS 20, NGC 3, CAC 8. The most recent O-108 to sell in auction was NGC AU58 CAC the A.J. Vanderbilt coin, sold for \$3,600. This coin is sharper and has the added cache of being ex Eliasberg. Sharply struck with full definition on both sides, the obverse presents with a somewhat Prooflike luster in the fields. Richly toned with deep pewter and hints of amber-gold and slate-blue that come to life as the surfaces are rotated in a light. The reverse is frosty, with a soft underlying satin luster that is likewise richly toned.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

50C 1836 REEDED EDGE. PCGS MS63 CAC

In 1836, the mint made a major transition to the modern age with the installation of new steam powered presses. With this installation, the new presses could strike coins with a closed collar, which would allow for proper raised rims and reeded edges. The first half dollars were struck late in the year with only 1,200 struck for circulation.

The presently offered, fully CHOICE example has semi-reflective lustrous fields. The surfaces are evenly toned with teal, dove, lilac, and tinges of original rose. The eye appeal is fantastic. Sharply struck devices stand out against the fields. A strong glass reveals traces of ancient contact, nothing that is distracting and mostly hidden under the very pretty toning. This is a classic of American numismatics, a KEY issue in the half dollar series, and in constant demand from collectors.

PCGS 6, NGC 6, CAC 2. Only one CAC-approved example has ever sold in auction; the ex Gardner coin that had a GOLD CAC sticker, realized \$52,875 in June 2014. Non-CAC PCGS coins have sold since for \$17,685 and \$19,975. The current Collectors Universe Price Guide value is listed at \$22,500, and this coin should realize a price in excess of that when the hammer finally falls. Great for a date set, or for a very carefully curated type set.

Very Choice and wonderfully preserved! The sharply struck devices and satiny smooth surfaces have a velvety, creamy silver luster that shows off the subtlest pearlescent iridescent look on both sides. The eye appeal is unmarred on this one year only type.

PCGS 217, NGC 75, CAC 31.

The most recent PCGS/CAC coin to sell in auction realized \$8,400 in June 2018; prior to

that, two sold in 2016, including this one that realized \$5,640 in the 2016 ANA auction. Clearly the current Collectors Universe value of \$4,500 does not take into account CAC-approved examples and remember any MS65 will cost around \$20,000! Good luck!

LOT 209
50C 1870-CC PCGS XF45

The first year of coinage operations at the Carson City mint produced 54,617 half dollars, and the needs of the regional economy kept these in circulation for a long time. Most known examples are heavily circulated and have condition issues.

This choice XF has a very good look. Generally smooth and problem free light circulation in the fields and on the design elements. A glass reveals a few minor circulation marks, none that are obtrusive to the good eye appeal. The surfaces are

toned in a slate and battleship blend of blue/gray that yields to some rose and gold accents when rotated in a light. The devices are well defined with a good strike. This generally problem free example has a neat look.

PCGS 7, NGC 7. It is interesting that there are no CAC-approved examples in XF40, XF45, and AU50. The most recent PCGS XF45 to sell in auction realized \$17,625 in the 2015 FUN auction - hard to believe that was four years ago! More recently a PCGS AU50 sold for \$21,000 in the 2019 FUN sale. This is a great coin for any collector looking to start a set of Carson City Seated halves. Good luck!

50C 1870-CC PCGS AU50

This is one of the most coveted early Carson City issues and best of all in a high collector grade! Just a touch of light wear from a short term in wild west commerce can be seen in the fields as some friction, and there is just some light rub on the high points of the design types. Generally soft pewter and dove patina shows accents of gold and lilac with a few deeper russet specks present, attesting to the originality of this rare coin.

The first year of coinage at Carson City saw a mintage of 54,617 half dollars, but from that number only a few hundred survive, the vast majority of them showing either extensive circulation and/or some sort of condition problems. Five pairs of dies have been identified by Wiley and Bugert, this being WB-101, die pair 2, and this is the Plate coin in their reference.

PCGS 4, NGC 5. Prior to the recent sale in the 2019 FUN Auction, there was an example that sold in the 2016 ANA auction for \$28,200. There is a record of \$30,000 back in July 2009 . RARE in all grades, and especially so any finer. Hence collectors seeking an example for their collections must fight over the few that are offered. When a handsome coin like this comes to market, then all bets are off as to where it might land. The auctioneer will be the first to know when the withering bidding comes to an end and awards this prize to the last hand in the air. Expect competition.

This coin proves that all that glitters-is NOT gold! The quality is VERY high end. Delicious mirrors are super deep and bloom from all over. They also have bold clarity and are highly reflective. You can't beat their cleanliness too. When you twirl the coin, the mirrors are rolling flash. Both sides enjoy a light original gold color (NOT haze). The obverse has a very pretty and original ring of blue/pale violet colors around the rims. We do NOT believe this coin was ever dipped or messed with. Miss Liberty and every detail are needle sharp in strike and are thickly frosted. The eye appeal is beautiful!

ONLY 470 were minted. PCGS 22, NGC 13, CAC 9 (only 2 higher are beamed). The current PCGS Price Guide value is listed at \$3,500 and it is our STRONG opinion coins like this are too cheap. Here you have a Civil War era 154 year old coin, a smaller mintage, and a coin that is not only beautiful but is in great condition. Good luck finding any of the higher grades with just 2 beamed. What a great, original GEM Proof Seated half dollar. Bold watery reflective mirrors beam and gleam all over surrounding the sharply struck devices that have a full frost. The cameo contrast really stands out when rotated in a light. Both sides have a rich cobalt and amber frame around the brilliant, clear-gold tinged centers. The surfaces are free of any distracting marks, indeed most of what is seen with a glass are mint made lint marks and die lines. The GEM eye appeal is great.

Only 1,000 Proof halves were struck. PCGS 2, NGC 0, CAC 1. No CAC-approved example has ever sold in auction and just one PR66 CAM is finer at PCGS in the designation. The current PCGS value is listed at \$5,500 and this impressive coin should bring close to that! Worthy of a strong bid for sure.

This is a terrific heavily contrasted GEM Proof (unusual for a post 1900 date). The quality is all there and then some! Super deep mirrors beam boldly from all over. The mirrors have bold clarity, are ultra clean, and are intensely reflective. Indeed, when you twirl the coin, they roll like liquid. There is a subtle hint of gold - although the coin is really black and white. Miss Liberty and every detail are needle sharp in strike and all of the devices are covered in a rich original creamy white frost.

ONLY 813 were minted. PCGS 9, NGC 5, CAC 4. PCGS has graded 4 higher (NONE of which have ever sold via auction). The last sales record for a PCGS CAC PR67 Cameo was from November 2012 where one sold for \$9,400. This is not a date or grade we ever see offered. Prior to our July 2018 Regency Auction, this coin was off the market for many years with a Legend customer. This coin will make a tremendous addition to any GEM Proof Cameo Barber set. WOW! This is a wonderfully ORIGINAL GEM!

Magnificent vibrant luster has a rich satiny glow on both sides. The surfaces are nearly flawless and have a thick frost. Razor sharp in strike, every detail is very crisp. Liberty's drapery and thumb are fully delineated and they stand out like like they were hand carved into the metal. Both sides have a touch of clear gold toning that blends with slightly deeper olive-tan and russet on the reverse. Clearly, this GEM has not been dipped or stripped in efforts to obtain an even higher grade.

One of the key issues of the series, this is one of the hardest dates to locate in GEM Mint State grades. Only 952,000 were struck and few were saved at the time of issue, the booming wartime economy called the coins to commercial channels, and few collectors realized the importance this date would have in the future.

PCGS 44, NGC 29, CAC 10. We sold one in December 2017 for \$30,550 and there was just one other sold since, realizing \$24,000 in the 2018 FUN auction. The current PCGS value is listed at \$28,000. Keep in mind, just four coins are graded finer, 3 in MS66 and the Eric Lane MS67 that sold for \$152,750 in the 2015 ANA auction. Tied for the second **FINEST** graded 17-S Obverse half dollar, this **STUNNING GEM** is the first time in nearly a **GENERATION** that a PCGS MS66 example will be sold in an auction. Not only is this coin very **HIGH END**, it is marvelously original and **FRESH** to the market.

A thick, frosty satin luster has a brilliant, monster vibrance on both sides. The reverse is especially impressive with swirling cartwheels. The devices are crisply struck with essentially full definition throughout the drapery and all of Liberty's details. Both sides are framed by a amber-gold and a pale teal-blue. The remaining silver surfaces are original silver with just a hint of the most subtle, iridescent tone. Needless to say, this 17-S is gorgeous and has a visual allure that is pretty much unique and very high end.

The 1919-S is a MAJOR condition rarity in the Walking Liberty series, and this one, housed in an old, green tag PCGS holder, is a very HIGH END and original GEM example.

A brilliant, satin luster in the fields is totally uninterrupted by any flaws, indeed, the surfaces are very clean and free of any distracting marks anywhere! Very well struck for the date, the central devices show nearly full definition. A light dusting of pale, iridescent gold, sky-blue, lilac, and wintergreen hues can be seen when rotated in a light, but mostly the surfaces show a satiny-pearly silver glow. There is a small arc of deeper amber from 11:00 to 12:30 on the obverse rim. The eye appeal is very high end! There is a lot to love about this 19-S!

PCGS 38, NGC 18, CAC 15. The most recent example to sell in auction was in our September 2018 Regency Auction as part of the Sommelier Collection for \$23,500; prior to that, one realized \$28,800 in the March 2018 sale of the A.J. FROM THE GRAND PRIX COLLECTION.

Ex Gerald R. Forsythe Collection, as noted on the PCGS insert.

This is a high end GEM example of this important KEY date issue. After the First World War, the US economy went into a very serious recession, and coins dated 1921 in general are considered scarce to rare in their respective series (except Morgan dollars). The Philadelphia mint produced 246,000 halves this year, the vast majority of which quickly entered into circulation. The typical survivor is well worn, and GEMS like this are truly VERY RARE.

A bold, glowing mint luster swirls with a strong vibrance and brilliance on both sides. A delicate dusting of peach-gold iridescent tone graces the obverse rim, coming out when the intense luster is rotated in a light. A strong glass reveals a few tiny traces of contact, which is the only reason we can think of that this GEM did not get a CAC bean. It is very high end and visually appealing in every way. Sharply struck and a TRUE GEM.

PCGS 53, NGC 32. The most recent example we sold was an old green tag, non-CAC coin that sold for \$24,675 and the current PCGS Price Guide value is listed at \$23,500. Only 11 coins are graded finer, and this coin is worthy of placement in a world class set. Good luck!

This coin is GORGEOUS! This is such an amazing looking SUPERB GEM. The luster on this coin is blinding! If it did not have the stunning original toning that frames both sides, you really would need sunglasses to view this blazing ball of luster. Blues, golds, oranges, and tans all blend together in a dappled patina around the rims, acquired from storage in an old album. The devices are sharply impressed from a precision blow from the dies. The details are razor sharp. We note a stray tick or two that are hidden for the sake of accuracy but they do not detract from the stunning eye appeal this SUPERB GEM possesses!

This is as SUPERB coin that is tied for second finest graded at PCGS. Brilliant and vibrant, the lustrous surfaces gleam all over, accenting the very sharp strike. The surfaces are ultra clean and free of any marks or lines anywhere. Touches of tone can be seen on the obverse, but this beauty will be right at home in a totally untuned set.

PCGS 380, NGC 375, CAC 203. PCGS has graded 34 in 67+ with just 6 in MS68 graded finer. We sold one in our November 2018 Regency Auction for \$2,350 and the most recent two examples sold for \$2,040. The current PCGS Price Guide value is listed at \$2,750 and keep in mind the current value in MS68 is \$22,500. This coin is bound for a high ranking Registry Set of Walkers, the quality and eye appeal are very high end.

Premium quality and SUPERB in every way! Glorious satin mint frost glows all over with an amazing brilliance. A ring of delicate tone at the obverse rim adds to the exceptional eye appeal and originality to the sharply struck devices.

PCGS 624, NGC 536, NGC 330. PCGS has graded 72 in 67+. There is a very wide range of APRs, the most recent of which sold for \$1,920 in October 2018. The current PCGS Price Guide value is listed at \$1,250 and keep in mind that the last two MS68s sold in our Regency Auctions for \$35,250 and \$17,038! In our estimation, this coin presents a GREAT value!

Here is a totally original and SUPERB 43-S half. The sharply struck devices are framed by a delicate olive-gold, russet-tan, and shimmering pearly-silver color that graces both sides. The intense luster brings out the subtleties of the outstanding ORIGINAL color. The eye appeal is excellent and high end for the grade - even with a strong glass we cannot find anything worthy of mention.

PCGS 49, NGC 26, CAC 28. We sold one in our May 2018 auction for \$4,465 and the current PCGS Price Guide value is listed at \$5,000. UNIQUE finer, with just a single MS67+ currently graded higher at PCGS. Bound for a great set!

50C 1944 PCGS MS67+ CAC

Wonderfully attractive multi-hued toning complements fully frosted surfaces free of notable contact marks. Although the mintage of this date was plentiful, examples are seldom encountered with the present coin's combination of great color and high state of preservation. A common coin in an uncommon condition.

PCGS 143, NGC 84, CAC 86. PCGS has graded just 26 in MS67+ with a mere 2 coins graded higher. The most recent examples brought \$3,600 in October 2018 and the 2019 FUN auction. The current PCGS Price Guide value is listed at \$5,000. Keep in mind the sole MS68 that ever sold realized \$109,250 in the 2010 ANA auction. If you are building a top ranking set, and do not want to spend high five figures for a 68, this is your coin! Good luck!

THE YOUNG-DAKOTA COLLECTION PART I

What an amazing collection! The collector who assembled these amazing coins is a long time Legend Numismatics customer. His goal was very simple, buy the highest quality you can and the best eye appeal. His demand for eye appeal always included the best toned pieces as well as clear cameo coins. The results of his work rank among the greatest Barber Proofs ever assembled. In addition, he is a true believer (along with Legend Numismatics) of GEM matched original Proof sets. His group ranks among the largest and finest known.

His coup de grace as you would call it is the incredible \$1 1893-CC PCGS BM 65+ CAC. That was his passion coin-every time we would speak, a discussion about it always occurred. He will miss this coin the most. It is Legend Auctions expectations this piece will set a world record price.

In Part 1 of this incredible collection there are so many coins that can not be replicated. The Young-Dakota Collector wishes for these coins to find good homes where the coins can be enjoyed as much as he cherished them.

Part II has more great Matched Original Proof sets and single Proof pieces. Stay tuned!

Where is the brown?! This coin displays a deep brick red color with highly reflective mirrors. While the color is not bright coppery-red like it just fell from the dies, there is no other color than RED on this coin; it is just toning down some. The dies were heavily polished, as evidenced by the richness of the mirrors and the frostiness of the reliefs. At certain angles you might actually think this SUPERB gem is a CAMEO.

PCGS 5, NGC 5, CAC 1. The last time one sold in auction was in the 2017 FUN auction, realizing \$4,700. Previously a non-CAC coin with way more brown and blue toning realized nearly \$5,600 in August 2014. This SUPERB GEM has much better eye appeal than that one, and should sell for more. The current Collectors Universe price is \$6,250. None are graded numerically finer, although there is a single PCGS PR67 RD finer which has not sold in over a dozen years! We looked this coin over and over, we strongly feel it is SUPER HIGH-END. Why PCGS did not + it, is a mystery.

Deep and sensational mirrors beam boldly from all over. The mirrors are exceedingly clear and clean. We strongly believe PCGS did not + this coin possibly because of the toning pattern-which is ridiculous. When you twirl this coin all you see are super flashy mirrors that resemble a freshly made sheet

Deep mirrors are endless and beam from all over. The mirrors are the ultimate in clarity and cleanliness. When you twirl this coin, you see the tremendous flash of the semi watery mirrors, but it's the colors that nearly blind you. This coin absolutely

It's hard not to want to twirl this coin all day! A subtle hint of gold/champagne can be seen splashed around. Miss Liberty and the details are thickly frosted and have crisp full strikes. The eye appeal is great!

Only 700 Proofs were ever minted. PCGS 8, NGC 7, CAC 12. The current Collectors Universe value is a meek \$4,500. These are still top of our list as a great set to build for long term appreciation. They have become WAY TOO CHEAP! In full PR67 CAM this is a hard date to find.

 COLLECTION

What a killer Proof! No question this coin is SUPER HIGH-END.

Miles deep mirrors beam intensely from all over. The mirrors are crystal clear and extremely clean. When you twirl the coin, the mirrors look like a rolling river of liquid mercury. The contrast is nearly blinding. This is a coin you need to wear sunglasses to view. Miss Liberty and the details are fully struck and have thick iridescent white frost. The eye appeal is tremendous!

Only 600 were minted. PCGS 11, NGC 8, CAC 4. The last PCGS piece to sell was a NON CAC. It brought \$3,840 in June 2016. The current Collectors Universe Value is \$3,750-yet even a non-CAC sold nearly 3 years ago surpassed that. No question for a high-end killer looking coin like this, the value is much more than \$3,750. We expect really strong bidding here. Be ready!

A multicolored, wonder GEM! The technical and aesthetic qualities scream at you from across the room! A closer look, and this coin grabs you and shakes you up. It is a marvel that this coin survives in such a pristine state and is virtually flawless!

The mirrors beam and gleam from all over, and are the epitome of smoothness, cleanliness, and clarity. The well struck devices have a mix of frostiness and flawless gloss.

Both sides are awash in a uniquely patterned iridescence, featuring blended hues of peach-gold, sea-green, ruby-red, powder-blue, and lemon-yellow. The eye appeal is truly spectacular in every way!

PCGS 2, NGC 5, CAC 1. This coin has only appeared in auction one time, selling as an old holdered NGC coin, which realized \$21,150 back in February 2013. Today, as a PCGS/CAC it will realize a very strong price from those who demand the absolute FINEST in 19th century proof coinage. We can see this coin breaking all records for the date when it crosses the block!

When it comes to Proof Morgan dollars, often times, deep, rich toning can obscure cameo contrast. This PQ and totally original GEM 1885 is a very pleasing exception! Sharply struck devices are nicely frosted and they contrast wonderfully against the flashy, watery mirrors that have a bold clarity and smoothness. The toning pattern starts as deep blue-green and purple at the rims, blending to a lovely variegated gold toward the centers. The contrast is bold with an inspiring visual allure.

Only 930 Proofs were struck. PCGS 20, NGC 13, CAC 11. The most recent example to sell in auction realized \$14,100 in our November 2018 Regency Auction; and prior to that, one sold in March 2018 for \$15,600. The current Collectors Universe value is listed at \$11,000 and keep in mind how rare this date is any finer. Worthy of a very high end collection of Proof Morgan dollars and we can see this GEM selling for a very strong price for its high end premium look!

OUR ESTIMATES

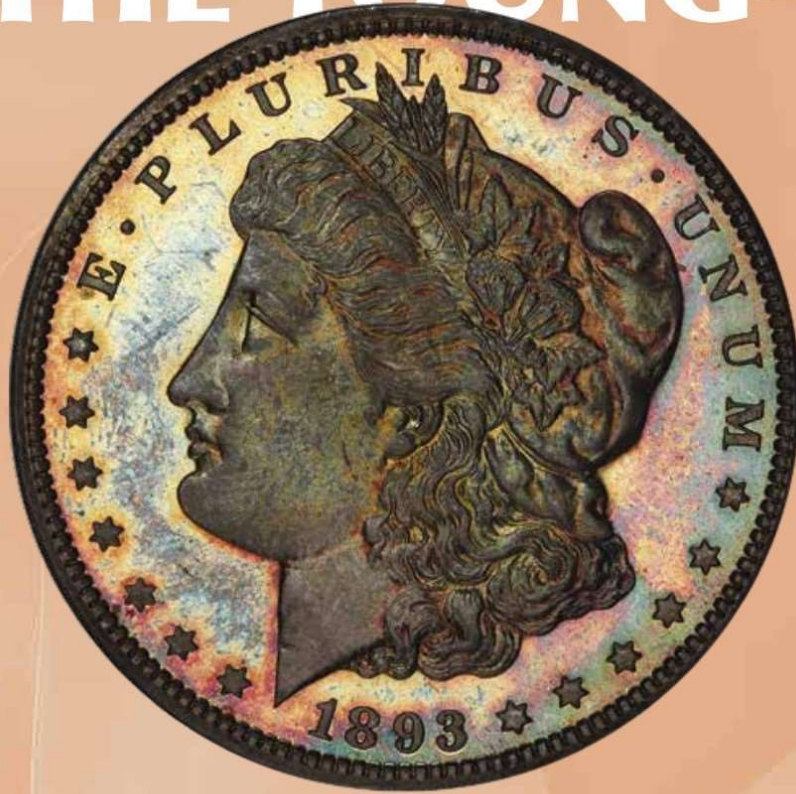

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value.

One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

\$1 1893-CC BRANCH MINT PROOF. PCGS PR65+ CAC
FROM THE YOUNG-DAKOTA COLLECTION

Legend Rare Coin Auctions is proud to offer one of the most important rarities in the Morgan Dollar series: the Branch Mint Proof 1893-CC.

This coin has a regal bearing in our office; clearly, this AMAZING Proof is a high-end GEM! Everything about this coin screams Premium Quality! Boasting ultra deep and brilliantly gleaming mirrored fields that have a strong reflective flash that are clearly that of a Proof and not a PL or DMPL Mint State piece. Rich toning in diffused shades of teal-blue, pale rose, iridescent orange, and a soft olive-russet blend together for a notable and purely original look. The toning pattern is unmistakable helping to trace the provenance of this important coin to the Cornelius Vermeule III Collection. Every detail is deeply and crisply embossed by a strong and forceful blow from the dies, creating exacting definition on both sides, and leaving the the devices with a wonderful frosted effect. A strong glass reveals incredible surface quality; indeed the only contact is a small mark on Liberty's jawline that again helps match this coin to the Vermeule Collection. The eye appeal is truly SUPERB and seductive, daring the viewer to put this marvel of American numismatics down.

This is what is known as a "Class 1" Branch Mint Proof, a coin where there is official mint documentation of the occasion of striking; an honor shared by only the 1879-O, 1883-O, and 1921-S Zerbe. While no one knows for sure how many were struck, the estimate of a dozen goes back to the days of Wayne Raymond, when he theorized these were struck to commemorate the closing of the famed Carson City mint. Over the years, numismatic scholars have expanded on the diagnostics that identify these few 93-CC Branch Mint Proofs, including Wayne Miller who wrote in his 1982, *The Morgan and Peace Dollar Textbook*, describing one of these Proofs: "Although some cameo contrast is evident especially on reverse, this coin is more brilliant than cameo Proof. The fields are deeply mirrored and the strike is very bold. The piece is an obvious Proof at first glance." Most known examples were struck from the VAM-2 die pair, whose diagnostics include traces of recutting on the right side of the 3 in the date, some short die cracks that connect six obverse stars on the left and 3 on the right. A key diagnostic is the downward-right tilt of the CC mintmark.

The estimated mintage figure of 12 was repeated by Walter Breen, who enumerated four known examples. In the 2001 *Stack's Catalog of the Vermeule Collection*, the cataloger enumerated five: Amon Carter; Norweb; Eliasberg (called a "Deep mirror prooflike Gem, Possible Branch Mint Proof"); King Farouk; and the Wayne Miller "1972 discovery" coin. Today, the total certified population (includes duplicate submissions, crossovers, etc) list 20 graded between PCGS and NGC in all grades and designations. We know, for a fact, over the years certain coins have been regraded, crossed over and perhaps their owners have yet to return the old inserts, making for a messy Population Report and Census data from the services.

While the November 2001 Vermeule catalog does not list a previous pedigree, it is possible that like the FINEST KNOWN 1893-S Morgan dollar that immediately followed this coin, it was obtained directly from the mint, or from the person who did so.

In the last decade, there have been four examples graded by PCGS and one NGC coin sold in auction: The Amon Carter coin, sold in our December 2014 auction, graded PCGS PR64 CAC (now a PR65); a PCGS PR64 CAM CAC that sold in August 2011; and this coin, which last sold in the 2012 ANA auction. The Greensboro coin, which was called a Branch Mint "Specimen" struck from a different set of dies (VAM-3, rather than VAM-2), graded SP65 by PCGS sold in the 2013 Central States auction. An NGC PR66 CAM also sold in July 2013.

PCGS 2, NGC 3, CAC 2. This is the ONLY PR65+ graded at either service in any designation. As a PR65, this coin realized \$218,500 in the 2012 ANA auction, and the current *Collector's Universe* value is listed at \$245,000. Do not confuse this one with the Amon Carter coin. The only coin graded finer to have ever sold in auction is the NGC PR65 CAM that sold in July 2013 for \$323,125 (likely the PCGS PR66 listed on the Population Report). This coin serves as the PCGS CoinFacts Plate Coin.

It is indeed our pleasure to offer this important numismatic treasure in our Regency Auction 31. This is a major opportunity for the advanced collector to acquire one of the most historically significant Morgan dollar issues, a coin that has a classic look and great pedigree. The market for high end, rare Morgan dollars is very strong today, and for the advanced collector looking to set their set above the rest, this amazing and high end Branch Mint Proof is a coin that will take your collection to a completely different level!

This is the epitome of what an original, deeply toned Proof Morgan dollar should look like!

Flashy, watery reflective mirrors beam all over the fields. Sharply struck devices look like they were carved out by hand! As you rotate the surfaces in a light, rose, orange, violet, azure, and gold gleam with a sparkling brilliance. The colors really do come to life in the light. After 1900 the mint changed its Proof production methods, polishing the entire surface of the dies, rather than protecting the devices which would keep them frosty, imparting a cameo contrast (1901-1904 dollars almost never have contrast).

Only 755 Proofs were ever struck. PCGS 32, NGC 40, CAC 4. The most recent PCGS/CAC coin to sell in auction realized \$5,581 back in September 2012. That was over half a dozen years ago! The current PCGS price is listed at \$5,500. This GEM is worthy of a serious bid, it is truly unique!

GEM MATCHED ORIGINAL 1859 PROOF SET
FROM THE YOUNG-DAKOTA COLLECTION

Our sister company Legend Numismatics has handled many sets in their career, this 1859 set is one of the all-time finest they have ever seen (there is a high grade 1859 set in a top collection). This set has such sizzle, it really is on fire! There is no question that this is a matched original GEM set.

ALL COINS ARE CAC BEANED

1C PCGS PR66 CAC. WOW! Full deep mirrors beam boldly from all over. The mirrors have great clarity. A few trivial toning dots can be seen only with a strong glass. The color is a deep original copper nickel. This is one of the better 1859 Proofs we have seen. The details are needle sharp and frosty.

3CS PCGS PR66 CAC Technically this coin seems perfect. We used a strong glass and looked everywhere- no problems. The mirrors are above average and are glass-like. Both sides have an even mix of olive/reddish gold/blue colors-same as the other silver coins. If only this coin was not in a Proof set!

H10C PCGS PR66 CAC. Super HIGH-END. The mirrors are super deep and clear. Both sides sparkle with original blue/green/purple colors identical to all the other silver pieces. Miss Liberty and the details are all frosted and are sharply struck.

10C PCGS PR66+ CAC. What a SUPER HIGH-END killer piece! The mirrors are ultra-deep and are incredibly clean and sleek. Here too, the colors are identical to all the other coins-blue/green/pale purple. Every detail is pinpoint sharp in strike. Dime collectors will cry about this coin being in a Proof Set.

25C PCGS PR66 CAC. This magnificent SUPER HIGH-END coin has so much life and flash! For any 1859 coin, the mirrors are as deep and flashy as we have ever seen. The colors are the same iridescent blues/greens/pale purples as the other silver coins on the obverse. The reverse is a white/purple color. The details are razor sharp in strike. All we can say - WOW!

50C PCGS PR65+ CAMEO CAC. A simply incredible SUPER HIGH-END piece. The mirrors are crazy spectacular and beam hard from all over. If you were to twirl the coin, the mirrors are so deep and watery. They are also clear and clean. Every detail is frosted and sharply struck. There is more pale purple than blue in this coin-which does indeed match all the others.

\$1 PCGS PR65 CAMEO CAC. This coin is one of the very best 1859 \$1 you will ever see-even though it is just a PR65. It is NOT dark or drab. Plus, the quality is VERY HIGH-END. The flash of the mirrors is tremendous. The obverse toning is moderate and matches every silver coin. Miss Liberty and the details all boldly stand out with thick frost and full strikes.

Legend Rare Coin Auctions is proud to offer this HIGH-END and gorgeous matched original set for sale. A set like this we consider to be the frontier in numismatics. As time goes on fewer sets like this will ever be available as too many are still being broken up. It is our hope a magnificent set like this finds a new home where it can be kept together.

Even individually you never see single 1859 coins like these offered. The current Collectors Universe Values add up to be \$65,500.

GEM, MATCHED, ORIGINAL 1860 PROOF SET
FROM THE YOUNG-DAKOTA COLLECTION

This set should be named "the miracle set" as it is a wonder how it even exists today. There is no question this is a GEM Matched original set.

1C PCGS PR65 CAC. Strong mirrors beam boldly all over. The mirrors are clean and have good clarity. Both sides are evenly covered by a moderate layer of original colors. The colors include gold/green/pale violet. This is not a dull or drab coin. Every detail stands out with needle sharp strike. The eye appeal is great!

3CS PCGS PR64+ CAMEO CAC. For a smaller coin, the mirrors have big coin flash! The mirrors have good clarity and are pretty clean. Only using a strong glass can you see some lines and toning dots. The details steal the show with an incredible frosty strike. To find this date in cameo-really rare.

H10C PCGS PR66+ CAC. What a darling of a coin. As with all the other coins, this too has incredibly flashy mirrors. We see no reason why it's not in a PR67 holder (no promises). The colors are the same as the other silver coins, only this coin has a blush of blue. This coin is super pretty.

10C PCGS PR65+ CAC. There really is nothing wrong here except the toning is slightly darker. This is NOT a dull or drab coin as the mirrors powerfully beam from all over. The toning is the same deeper navy/reddish gold/forest green as the other silver coins. Here too every detail is needle sharp in strike.

25C PCGS PR64+ CAMEO CAC. This is a VERY high-end coin. It has a little irregular toning so PCGS was very tough on it. It is the same colors as the other silver coins. No question this piece is a full cameo. The details are sharply struck, and the frost is clearly evident. Very rare coin to find even as a single!

50C PCGS PR66 CAC. The mirrors boldly beam from all over. They are incredibly clean and super clear. We think because the toning is slightly darker PCGS would not grade this coin a PR67 (which technically it is). The colors are the same as the other silver coins. You can tell the sharply struck details all have thick frost. The coin does have good eye appeal.

\$1 PCGS PR65+ CAC. Strong mirrors blaze though thick and deeper toning (same as on the other coins). You can easily tell this coin has sat undisturbed for many years. The mirrors are clean and smooth. The toning on this piece is slightly more dusky than the others in the center. It's still a good-looking coin!

When is the last time you remember seeing an 1860 Proof set? We only remember one and that was in a huge group that had been bought directly from the Mint and was dispersed almost 20 years ago. Sets like this really are the last frontier of numismatics!

The combined current Collectors Universe Value is \$48,250

MATCHED, ORIGINAL 1886 PROOF SET FROM THE YOUNG-DAKOTA COLLECTION

While we can't say this is an ooh, ah crazy toned 67-68 set, we can say it is a 100% GEM matched original set that is quite pleasing. Even though the coins have deeper toning, they are not dull.

1C TYPE 1 PCGS PR66 RB CAC. No question this coin sat undisturbed for a very long time. There is an original deeper reddish/purple/pale navy toning on the obverse. The surfaces are very clean. There are a few toning dots visible on the reverse. All of the details are fully struck. The eye appeal is fantastic!

3CN PCGS PR65 CAC. This coin has full booming mirrors. There is some light toning scattered about. Nothing not to like here as the coin is not dull, has sharp frosty strikes, and looks really good!

5C PCGS PR66 CAC. Deep mirrors beam boldly from all over. The mirrors have strong clarity and are clean. A gorgeous and totally original deep pastel toning mix covers the obverse while the reverse is mostly pale gold. The strike is needle sharp. Very pretty coin!

10C PCGS PR66 CAC. This is another near perfect coin with some deeper toning like the rest of the silver. The mirrors appear perfect. All of the details are sharply struck. This is an attractive coin!

25C PCGS PR67 CAMEO CAC. You can see the mirrors flash from feet away! No question there is not a single flaw to be found anywhere. In line with the other silver coins this piece shares the original navy/olive/pale purple green colors. Every detail is fully struck and has clear thick frost. The eye appeal is wonderful!

50C PCGS PR67 CAC. Deep mirrors seem to reach out to you and pull you in with strong flash. The mirrors are extremely clean and clear. When you twirl the coin, you really see "watery" mirrors. Both sides have the same colors as the other silver coins-only as a bigger coin the colors are more vibrant and spread out. The strike is 100% full and all details stand out.

\$1 PCGS PR67 CAC. It is so fitting the final coin in the series has the biggest WOW factor! Deep mirrors absolutely beam with flash from all over. The mirrors have strong clarity and are remarkably clean. The colors are the most vibrant of all the coins, but they are still matched. This is really an exceptional SUPERB GEM PROOF!

A GEM matched original 1886 Proof set like this is unheard of. Especially with so many of the coins in such high grade. We have not seen any other 1886 sets offered in recent memory. This set is a true numismatic treasure. We doubt you'll have the chance to buy another GEM set any time soon!

We so wish the Dollar would have been here. We can only dream of how gorgeous it must have been. This set will be sold intact as we feel it is a gorgeous type example of PR barber coins. This is a VERY HIGH-END and colorful set too.

1C PCGS PR66RB CAC. The ultimate in deep mirrors vividly beam from all over. The mirrors have impressive clarity and are clean overall. When you twirl this coin, you see mirrors that look like a freshly made sheet of glass. Important to note: the color is far more GEM original Mint Red than brown. There is some light contrast too. Killer coin!

5C PCGS PR67 CAMEO CAC. This is one heck of a SUPER HIGH-END beauty! The mirrors are exceedingly deep, crystal clear, and perfect. Both sides are evenly covered by a stunning light mix of original baby blue/gold/faint green/pale purple. Every detail stands out boldly with thick frost. This piece is light years better most 1893 67 CAM's we have seen!

10C PCGS PR66 CAMEO CAC. Remarkable deep mirrors powerfully beam from all over. When you twirl the coin, the mirrors have as deep or a watery roll as you will ever see. Both sides are evenly covered by a green/purple/reddish gold/gold mix of original colors. The contrast is bold, and all the details stand out. The eye appeal is awesome!

25C PCGS PR67 CAMEO CAC. Mamma Mia! What a coin. Superior deep mirrors beam from all over. The mirrors have remarkable clarity and a stunning reflection. Both sides are covered with the same blue/green/reddish gold/pale violet mix as the other silver coins. All of the details are needle sharp in strike and have thick toned frost. Everything here is unbeatable!

50C PCGS PR67 CAMEO CAC. This is one heck of a HIGH-END SUPERB GEM coin! Exceedingly deep mirrors intensely beam from all over. The clarity is incredible, and the mirrors are pretty much perfect. When you twirl the coin, the mirrors look like freshly made ice. We wonder why PCGS did not + this spectacular coin. Of course, the toning is the same as the other silver coins.

If you seek a killer PR Barber Type set, here it is! You cannot beat the color and quality of these coins (which is why we mourn the loss of the Dollar). These coins are so above what you typically see for the date. The current Collectors Universe value is \$22,600.

MATCHED, ORIGINAL 1894 PROOF SET FROM THE YOUNG-DAKOTA COLLECTION

While the grades of this set are not upper end crazy, the coins certainly are! We think overall PCGS was very tight on how they graded the set-especially the silver coins.

1C PCGS PR64 RB CAC. Good mirrors highlight both sides. They are clear and clean. Under a glass you can see one stain by the date and a fleck in the field. The color is an original red/brown/deep gold mix. All of the details are fully struck.

5C PCGS PR65 CAMEO. Powerful mirrors beam from all over. A light streaky pale golden brown appears on the reverse but does not hide the mirrors. There is a small stain on the left obverse star at 10:00. Every detail is pinpoint sharp and has light frost. This coin has a ton of flash.

10C PCGS PR66 CAMEO. We can't believe this coin is only a PR66! Incredible deep mirrors blaze powerfully from all over. The mirrors have awesome clarity and are ultra clean. A killer totally original iridescent mix of blue/fire reddish gold/pale violet colors swirl all over. The strike is virtually 3D. Looking like this, on its own it would bring a ton!

25C PCGS PR66 CAMEO CAC. What, no +? PCGS was tough here. Ultra-deep and crystal-clear mirrors beam endlessly from all over. When you twirl the coin, the mirrors are deep and watery. A killer original mix of gold/blue/violet colors frames the rims only. The details are needle sharp in strike and have thick frost. The word spectacular best describes this piece!

50C PCGS PR64 CAC. Oh, was this coin ever robbed. At LEAST a + is deserved. It is identical in color to the other silver pieces. Deep mirrors glitter from all over. With a glass you can see a few wispy lines. The mirrors look like a sheet of glass. This coin also has the totally original gold/blue by the rims. There is some light contrast. Great coin!

\$1 PCGS PR64+ CAMEO CAC. What a great coin to anchor the set with! The quality is 64.9. These mirrors blast at you from all over. When you twirl the coin, you see deep rolling "watery" mirrors. The clarity and cleanliness are off the charts. The rim colors (same as the others in the set) make the cameo effect look tremendous. What a beauty!

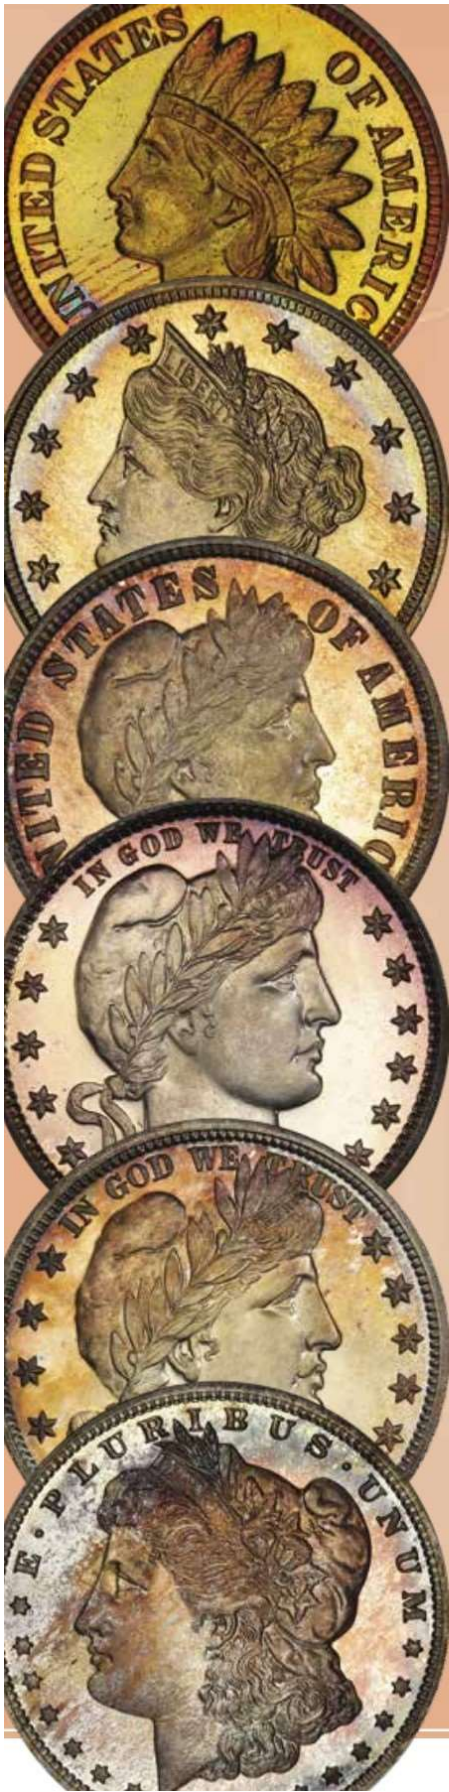

Years ago (about 20) we saw a much higher graded 1894 (PR67-68) set but that sold for nearly \$250,000. This is definitely an affordable gorgeous set. It certainly in our opinion is part of the final frontier in numismatics. This is well worth dumping your junk!

The combined Collectors Universe Value is \$13,450. A matched original set like this seems like too good of a deal at that level!

MATCHED, ORIGINAL 1900 PROOF SET
FROM THE YOUNG-DAKOTA COLLECTION.

We love every coin in this set. No question these were all kept together for quite a long time. Even in NON set form you do not see these coins offered ever as singles.

1C PCGS PR65 RB CAC. AWESOME! Very high-end quality. Deep glittering mirrors beam from all over. The reverse most likely was lying on felt and has darker colors. The colors are a GEM Mint red, pale gold and green on the reverse. There actually is contrast. The eye appeal is jaw dropping!

5C PCGS PR67+ CAM CAC This coin is more than deserving of being tied for FINEST graded. Super deep mirrors beam from all over, with clarity and cleanliness. They also have a light pastel toning all over that you do not have to imagine. Miss Liberty and every detail are fully struck and have thick frosting. If sold on its own, we can see bidders really fighting over this piece.

10C PCGS PR67. CAC must have had a bad day when this coin came though. We see no problems anywhere. The mirrors are deep and flashy. There is some moderate toning spread all over, but this coin is not dull or drab. There also is good contrast.

25C PCGS PR67+ CAM CAC. Awesome deep mirrors are both crystal clear and clean. This coin enjoys the same toning as the other silver pieces, although it is slightly irregular on the obverse. The contrast is bold. Miss Liberty and the details are needle sharp in strike and have thick frost. The eye appeal is gorgeous!

50C PCGS PR67+ CAM CAC. WOW! This coin clearly ranks a PR67.9+! The mirrors are deep, crystal clear, and clean. When you twirl the coin, the mirrors look like a fresh made sheet of ice. A heart pounding mix of gold/pale purple and the same colors found on the other silver coins make the eye appeal awesome. Every detail is fully struck and thickly frosted too!

\$1 PCGS PR67+ CAM CAC. It is always the biggest and best last. No question this coin belongs in, and is the highlight of the set. This is the FINEST 1900 Cameo Proof graded. The mirrors are just remarkable. They are deep, have bold clarity, and are super clean. We grade this piece a PR67.9+. Even though 1900 coins usually have weak contrast, this beast does not. It also has moderate toning splashed about. What an anchor coin to an already stunning set!

It is important to know, the set has a Collector's Universe value of \$55,000 due to the dollar being worth \$30,000. Every coin in this set is HIGH END and is of true quality. As you all know, our sister company Legend Numismatics has always felt matched original sets like this are the last frontier of numismatics. How many 1900 sets can you recall ever seeing?

MATCHED, ORIGINAL 1907 PROOF SET FROM THE YOUNG-DAKOTA COLLECTION

This is a no question matched original set. It's clear to us every coin was carefully stored for many years; maybe even after it left the Mint. ALL coins are CAC beamed, and in today's market, you just can't build a set like this, all CAC anyway. ONLY 575 were minted.

1C PCGS PR66RB CAC. Strong mirrors beam from all over. Of course, the mirrors are clean and have exceptional clarity. Both sides are covered by a mix of pale green/gold/mint red colors. The Indian is frosty and is fully struck. Great eye appeal!

5C PCGS PR66+ CAC. Bold mirrors are very flashy. There are no disturbances anywhere (just a patch of irregular toning). The toning is really light and pastel like-but does match the other colors. Miss Liberty and the details are fully struck and have gentle light frost. Lovely eye appeal!

10C PCGS PR67 CAC. What a tremendous coin! Deep and almost endless mirrors beam from all over. The mirrors are clear and clean. When you twirl them, they have that deep and watery look. The colors are identical to the other silver coins-original pale purple/gold and pale navy. Miss Liberty and the details clearly stand out. This coin is almost fully cameo. Killer eye appeal here!

25C PCGS PR67 CAMEO CAC. Yet another super high-end GEM. Wicked deep mirrors can be boldly seen from all over. The mirrors are clean and clear. The obverse has the same identical colors as the other silver coins-original pale purple/gold. The reverse is full navy as it probably sat on felt. The contrast is bold. Miss Liberty and the details stand out with thick frost and a full strike. Awesome eye appeal!

50C PCGS PR67+ CAC. We looked at this coin many times. We can NOT find why PCGS would not grade it a PR68 (no promises). Flawless and deep mirrors beam boldly from all over. The clarity of the mirrors is amazing. This piece has the identical colors of the other silver coins-original pale purple/gold with a navy gold reverse. The obverse has good contrast. Miss Liberty and the details are fully struck and do have some frost. The eye appeal and quality are jaw dropping! If this coin were to be sold on its own- a bidding war would erupt!

This absolutely is something you sell you duplicates or lesser coins to own. We do not remember ever seeing another 1907 offered in the past decade! We hope the next owner enjoys this set as much as the Young-Dakota collector did.

MATCHED, ORIGINAL 1915 PROOF SET
FROM THE YOUNG-DAKOTA COLLECTION

We all wonder where some of the great 1915 coins are. Here you go! A group of the coins are sitting right here in this no question matched original Proof Set. Every coin in this set is exceptional.

1C PCGS PR66RB CAC. The real deal. No question this coin sat undisturbed for a very long time. The full Matte surfaces are flawless. Every detail is needle sharp like they should be on a proof. The toning is original and has shades of brown/green/gold over the faded mint red colors. There are no spots. What a Matte Proof!

5C PCGS PR67 CAC. "As struck". This coin clearly left the Mint and sat undisturbed for many years - if not its lifetime. The matte surfaces are flawless. A moderate luster shows off the pretty original shades of golden brown/pale gold colors. There are NO spots or stains. Every detail is fully struck. Please don't break the set to buy this coin!!!!

10C PCGS PR66+ CAC. Deep and really flashy mirrors beam from all over. Deeper shades of original purple/navy/aqua green swirl allover (on all 3 coins). Miss Liberty and all the details are sharply struck. This is a great 1915 PR 10C!

25C PCGS PR67+ GOLD CAC! Gold CAC means they grade this coin a PR68. We do too. 1000% perfect mirrors beam powerfully from all over. The same moderate purple/navy /aqua green colors the other silver coins have are all over this one too. Miss Liberty and every detail are frosted and fully struck. The eye appeal is phenomenal!

50C PCGS PR67+ CAC. What a final coin to have in a monster Proof set. This coin has stunning flashy and deep mirrors. When you twirl the coin, the mirrors turn totally liquid. A more moderate version of the same original navy/purple/greenish colors the other silver coins have rolls off this one too. It would be a tragedy to break up this set to get at this coin.

We have seen other 1915 Proof sets. We unhesitatingly proclaim this one to be the best we have ever seen. PCGS was pretty tough on most of the coins. Regardless, as time goes on, you simply won't be seeing many more sets like this. If you are looking for something different and with unlimited potential to buy-these matched original Proof Sets are it!

THE INTENSE CAMEO COLLECTION

We named this set because of what the coins really are-intensely cameo! In our entire careers Legend Auctions and Legend Numismatics does not ever remember seeing a group like this where every coin had ultra deep and no haze mirrors. While not a complete collection, the coins as a group are so remarkable, you feel it is a complete set.

The collector who built this forever has loved clear cameo coins. His passion was deeper than the mirrors! He has not stopped collecting at all. He is moving on a new phase. We can only imagine what kind of coins he will demand now! We congratulate the Intense collector and wish him well in his new endeavors.

It is our very strong opinion the coins in this collection can NOT be replicated. The demand for pieces like these is off the charts. Expect serious world record prices to be set!

With a heavy heart, Legend Auctions will miss these killer pieces. We looked at them every day!

3CS 1872 PCGS PR66+ DCAM CAC
FROM THE INTENSE CAMEO COLLECTION

Our sister company Legend Numismatics has seen just about every high-grade CAM/DCAM 3CS in a holder. This coin stands out by a mile! If you were up on the Space Station, you could see its reflection!

Unbelievably deep mirrors. They are crystal clear, super clean (there is a teeny line/lint mark mentioned for accuracy) and have the most intense reflection you will EVER see! There is NO toning anywhere. Every detail is needle sharp in strike and is covered in thick snowy white frost. The eye appeal is crazy awesome, your eye balls will jump out of their sockets and roll around!

This is the FINEST 1872 graded Deep Cameo. PCGS 1, NGC 0, CAC 1. The current Collectors Universe Value for a PR66+ DC is \$19,500, which we know is way too low. Opportunity knocks loud here as you're certainly not going to see another one!

3CS 1873 PCGS PR66 DCAM CAC
FROM THE INTENSE CAMEO COLLECTION

Yet another stunning piece from the Intense Cameo Collection! It borders on PR66+ and Deep Cameo status for sure! This is the second finest DCAM graded.

Outrageous mirrors are super deep and beam boldly from all over. The mirrors have unusual clarity and are clean. For identification purposes we must make note of a small old cut (not so sure it isn't a lint mark) hidden in the lower right obverse field. It absolutely does NOT detract. When you twirl the coin, you are nearly blinded by the super intense mirrors.

Every detail is needle sharp and is covered by iridescent white frost. The eye appeal is both intense and jaw dropping!

ONLY 600 were minted for this Proof only date. PCGS 1, NGC 2, CAC 1. There is no record of this coin ever selling in auction. The Collectors Universe Value is a mere \$9,000 which we think is a joke. There is a PR67 DC graded, and we value that coin at \$25,000+. We cannot stress both the extreme rarity and quality of this GEM!

What a coin! Even though there are two with a single one finer, it's really hard to imagine that.

Intense mirrors beam boldly from all over. The mirrors have tremendous clarity and cleanliness. When you twirl the coin, the mirrors have a strong glassy look. A light mix of totally original pale reddish gold/pale lilac swirls all over. The contrast is clear and really bold. Miss Liberty and the details are needle sharp in strike and really look like they were carved from a fresh frosted block of ice. The eye appeal is gorgeous!

PCGS 1, NGC 0, CAC 3 (obviously there has been a resubmission). Way back in 2012 the PR67 DC sold for \$14,100. Today, the current Collector's Universe is \$19,500 for this 67+. Considering the PR68 DCAM sold for a crazy \$84,000, obviously we strongly feel the CU for this 67+ is too cheap. NOTE: A Legend customer just bought the above mentioned PR68 DCAM for full ticket! It's a different air when you're dealing with the two finest coins. We expect strong bidding here. Good luck!

FROM THE INTENSE CAMEO COLLECTION

Note this is an extremely cool and rare coin. It is also in a remarkable HIGH-END state of preservation!

Exceptional mirrors not only blaze from all over, but have real depth too; typically, 1875's come with shallow mirrors (this piece really is exceptional). The mirrors also are clean and have great clarity (and NO haze). When you twirl the coin, the mirrors have that rolling "watery" look. There is a light tinge of gold toning splashed around. The coin still has a mighty black and white contrast. Miss Liberty and the details are fully struck and have thick creamy white frost. The eye appeal is sensational!

After 30+ years of operations for PCGS, look at these pops: PCGS 4, NGC 8, CAC 3 (none are beamed higher). There are NO auction records for ANY 1875 PCGS PR66 pieces. The last NGC piece to sell at auction was back in 2010. Because none have traded, the current Collectors Universe of value of \$27,500 is GROSSLY out dated. You can offer to pay \$50,000 and never see another cameo example. This piece really will be a standout in ANY collection. We expect strong to record bidding here-good luck!

WOW, what a coin! We'd bet NASA could use this coin to guide the Space Shuttle. This coin is tied for finest and more than deserves it.

Nearly blinding deep mirrors boom from all over. The mirrors are super clean and exceedingly clear. You do not even have to twirl this coin to see its GEM watery mirrors roll around. The contrast is powerful and then some. Both sides are untuned. Miss Liberty and the details are needle sharp in strike and are fully struck. The eye appeal is tremendous!

Only 930 were minted. PCGS 1, NGC 3, CAC 3. Way back in 2013 a PCGS PR67+ DCAM was auctioned for \$17,625. NONE have been seen since. If you collect MONSTER PROOF Seated coins, Quarters, or just wicked cool coins, this piece has it all for you! Opportunity knocks loud here.

At the request of the consignor we did send this SUPER HIGH-END piece in for a "+". We are not sure what PCGS was thinking here; this is a MEGA MONSTER coin!

Superior ultra-deep and exceedingly flashy mirrors nearly blind you as they beam intensely from all over. They are pretty much perfect and have tremendous clarity. When you twirl this coin, the mirrors have that deep "watery" look. The contrast is incredible as this is a pure black and white coin (NO haze). Miss Liberty and the details are so vivid they look 3D. All of the details are fully struck and stand out with a bold white frost. Your eyes will pop out and roll around like ours did when we first saw this incredible coin!

Only 832 pieces were minted. PCGS 1, NGC 0, CAC 1. Not only is this coin an absolute jaw dropping monster, it is the FINEST graded 1888 25C! Get this, the last auction record was for \$20,700 way back in 2008 - 11 years ago is a lifetime! We can't even dream what this coin is really worth. Expect strong bidding here as this is your only chance to buy a 67 DCAM (and there are NO 66 DCAM's graded by either service)! Good luck!

FROM THE INTENSE COMEO COLLECTION

Yet another MONSTER piece from the Intense Cameo Collection. We see one PR68+ DCAM exists, but it's impossible to imagine. In our minds, this coin should not even exist! No question this coin is SUPER HIGH-END.

The mirrors are so deep, they probably start on the other side of the world. The clarity and cleanliness are remarkable. When you twirl this coin, you see outrageous icy "black" mirrors. Using a strong glass, we see one extremely microscopic line on the neck-which is all that keeps this coin from a PR68 DC grade. No question they were tough here. The contrast is incredible. Miss Liberty and the details are needle sharp in strike and are covered by wild thick iridescent white frost. The eye appeal is as stunning as you get!

Only 846 were minted. PCGS 1, NGC 0, CAC 4 (definitely regrades). The last time a PCGS PR67+ DCAM sold in auction was back in 2014 where it realized \$12,338. Today the Collectors Universe value is a more realistic \$16,000. We rarely, if ever, see incredible cameo coins any more. This is a killer coin to add to any SUPERB GEM set!

The collector who built this set sure knows how to pick killer coins. This coin definitely ranks in the top 1% of DCAM coins graded (not just for 1898)!

Some of the deepest mirrors you will ever see beam intensely from all over. The clarity and cleanliness are amazing. When you twirl this coin, you are mesmerized by the black and glassy rolling mirrors. The contrast is made even more out of this world by a thin band of gold by the rims. Miss Liberty and the details just jump out 3D looking because they are so needle sharp and have MONSTER frost. The eye appeal is heart pounding for sure!

Just 735 were minted. PCGS 8, NGC 13, CAC 14. It's amazing that so many of this date survived in such remarkable condition. The last PCGS CAC piece to sell in auction brought \$21,150 in May 2018. Here is an interesting fact: prior to the coin that auctioned in 2018, the last auction was back in 2013 where one brought \$23,500. Because of their stunning looks, these always attract serious buyers. We wish everyone good luck on this coin!

This mega MONSTER has some serious ju ju! It's impossible not to love it. We see no reason why PCGS did not + it (we make no promises).

Exceedingly deep mirrors blast away from all over. The mirrors also show extreme clarity and cleanliness. When you twirl the coin, the dramatic intense flash nearly blinds you from seeing the watery rolling mirrors. There is no toning and the contrast is stunning. Miss Liberty and the details are pinpoint sharp in strike and are fully struck. The eye appeal is gonzo incredible!

ONLY 543 minted. There are NO records for any PCGS CAC PR68 DCAM ever selling in auction. A PR67+ DCAM CAC sold for \$16,100 way back in 2011. The current Collectors Universe Value is \$18,500. We see this date far more in regular cameo in PR67+ and 68. This piece certainly will be a prize for any SUPERB GEM Quarter or Type set. We expect really strong bidding here-be ready and good luck!

You would think with a 710 mintage, more Deep Cameo Proofs would have survived. NOT! Apparently, this coin is above the majority that have been minted. The quality is VERY high end too!

Super deep mirrors beam intensely from all over. The mirrors are also crystal clear, super clean, and of course offer an intense reflection. There are more lines on the holder than the coin! Outrageous mirrors offer a headlight type blast from all over. The mirrors are also pristine and have strong clarity. We see one tiny obverse Mint made issue that is probably what keeps this coin from a full PR68 DC. When you twirl this coin, the mirrors look like a freshly made sheet of glass. The contrast is dynamic. Miss Liberty and the details are needle sharp in strike and appear almost 3D with thick creamy white frost. The eye appeal is both sensational and memorable!

Only 792 were minted. PCGS 4, NGC 0, CAC 2. PCGS has graded possibly 3 in PR67+ DCAM. There are NO auction records for ANY PR67+ DC ever selling. We have seen many Proof Trade Dollars. We unhesitatingly rank this explosive and unbelievable coin SUPER HIGH END and one the nicest 1875 Trade Dollars on earth! This coin really does beat some higher graded coins!

Absolute WOW MONSTER mirrors border on deep status. The mirrors are crystal clear (really rare) and are super clean. Just a few invisible lines keep this coin from being a monster PR66 Cameo (there are also a few lines on the holder, which are visible). Your jaw will drop when you see the contrast. Miss Liberty and the details stand out like they were carved out of a fresh frosty block of ice. Every detail is covered by thick iridescent white frost. We know we cannot put this coin away. The eye appeal is insane!

PCGS 3, NGC 12, CAC 4. PCGS has graded 2 in PR65+ Cameo-we are sure this is both (and is represented twice at CAC as well). There is an old auction record of \$15,275 from April 2014. Having built one of the greatest Proof Trade Dollar sets years ago and always being involved with them, this coin came out of the blue and just leveled us. We have never seen any 1877 (save for one 64 DCAM) remotely close to this. Not only is this by far the **FINEST EVER** 1877 Proof, we declare it one of the **FINEST** of ALL Proof Trade Dollars! If you know the date, then you will understand: 1877's never ever come like this. And the coin is legitimately closer to PR66 DCAM than PR65 DCAM!

Now that our eye balls are back in our heads, the mirrors on this coin rank among the deepest we have ever seen for any Proof TD. The clarity is off the charts, while the you can see just a few super light, scattered lines that keep this coin from full 66 DCAM. When you twirl this coin, if you are not totally blinded by the intense flash, you will see deep watery mirrors. The contrast is so incredible the coin looks like it was carved from a fresh block of ice. Miss Liberty and every detail not only are fully struck and stand out 3D like, they are covered by a killer thick white frosting. The eye appeal actually is beyond **MONSTER** looking!

Our sister firm, Legend Numismatics has never seen a GEM Cameo remotely close to this coin. Even as a regular Proof, 1877 is a silent stopper for the series. We absolutely consider this a once in a life time coin!

Only 510 were minted. PCGS 3, NGC 0, CAC 2. PCGS has graded 2 in PR65+ DCAM-we fully believe this is both and is both CAC coins. NO 65+ DCAM has ever been sold via auction. A regular PR65 DCAM (NO +) has a Collector's Universe value of \$20,000. This is the **FINEST** 1877 cameo Proof -period. Here too (like the 1875), we have never seen anything similar in GEM. If this out of this world coin does not set a world record price, we'd be shocked. Seeing is believing. Be ready to rumble!

Many of the coins are either finest graded or are tied for finest graded like this fabulous 1880 Trade Dollar. We pinch ourselves over the quality of all coins-let alone to have such a killer in the set like this 1880. Having just seen the 1882 PCGS PR68 Cameo CAC that sold in FUN for \$144,000, we shiver that this coin is not all that far off from PR68 Cameo. We do NOT see Trade Dollar Proofs any more that are this HIGH END.

Endless mirrors beam intensely from all over. The mirrors are crystal clear. Only if you use a strong glass can you find a thin and tiny line or two that probably are what keep this coin from a full PR68 designation. It's really not much at all of a difference. The contrast is stunning. When you twirl the coin, all you see are the deep and "black" watery mirrors. Miss Liberty and the details look like they were all carved from a block of ice. They dramatically stand out. The overall eye appeal is tremendous!

PCGS 1, NGC 3, CAC 7 (this is impossible unless someone kept resubmitting a coin). PCGS has graded only one PR68 Cameo. 1,000 WOW'S are a way to start to discuss this MEGA MONSTER's beyond Pluto looks and quality. We did resubmit this coin seeking a PR67 DC. We do not see why PCGS did not upgrade it. In the end, it really does not matter if this MEGA MONSTER is a PR66 or 67. It ranks very close to being God's gift to all Trade Dollar proofs. It is SUPER HIGH END!

Endless mirrors seem to extend forever. They are as deep and "black" as you will ever see. The mirrors don't just beam from all over, they blind with flash from everywhere. There is NO haze anywhere while the mirrors are super clean. When you twirl this coin you are totally blown away by the watery yet ice like mirrors. The contrast is so intense this coin too looks like it was sculpted from a fresh block of frosted ice. Of course, Miss Liberty and every detail stand out with needle sharp strikes and ultra-thick pearl white frost creating the ultimate 3D appearance for all the features. There is no doubt in our mind this coin was created in Trade Dollar Heaven and then sent to the Intense Collection. Looking like this, how could it not have angels? The eye appeal ranks among the most dramatic you will ever see!

PCGS 6, NGC 10, CAC 5. PCGS has graded only this coin in PR66+ DC. It has never appeared in auction. Even hazy non CAC DCAM's have traded for \$20,000-\$25,000 at auction over the years. Only 979 were minted of this Proof only date. PCGS 14, NGC 16, CAC 7. This is the ONLY PR66+ Cameo graded. PCGS has graded only 3 coins finer. This coin has never been sold at auction. It's been in the Intense Cameo Collection for quite some time. This certainly is a date and grade that is NEVER seen with a full booming black and white look. Plus, many pieces are toned. The rarity of this piece along with the top quality make this coin a candidate for a record price.

If you are a black and white cameo purist, then this coin will melt your heart!

FROM THE INTENSE CAMEO COLLECTION

AWESOME EVERYTHING!!!! The quality is VERY HIGH END. What a more then fitting coin to end the magnificent Intense Cameo Collection.

Incredible ultra-deep mirrors beam from all over. The mirrors offer great clarity but do have some light toning on the right obverse. Of course, this coin is super clean and has a strong reflection. When you twirl the coin, the mirrors have that deep rolling "watery" look. The contrast is strong for sure. Miss Liberty and the details are needle sharp in strike and have thick frost. Her cheek does have two of the typical Mint made die lines common to the date. Still, this coin is a real PR67 Cameo and has killer eye appeal!

PCGS 3, NGC 16, CAC 4. The last PCGS CAC piece to sell in auction brought \$21,738 in January 2018. The current Collectors Universe is now \$27,500. The marketplace certainly is not loaded with these. Once this coin is sold, good luck finding another!

A few central planchet adjustment marks are seen on the eagle's shield, but blend into the details. The rich slate-gray at the periphery fades lighter in the center. There is bold detail throughout despite the wear and good eye appeal.

B-10, BB-190. A GEM AU example. This coin is purely original and very high end for the grade with an exceptional eye appeal. Lovely old time gunmetal and battleship hues grace both sides with accents of slate and olive-gold that come out when rotated in a light.. The eye appeal is really something special to behold! Its grade ranks among the "notable specimens" listed in the 2013 Encyclopedia.

PCGS 7, NGC 38 (all varieties), CAC 3. No CAC-approved example has ever sold in auction. Our consignor paid a very strong price for this prize, and we suspect it will bring a very strong price when it crosses the block. OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

LOT 303**\$1 1801 PCGS MS63 CAC**

Legend Rare Coin Auctions is honored to offer the **FINEST** B-3, BB-213 dollar. None are graded higher than MS62 in Dave Bowers' 2013 list of Notable Specimens. This die marriage is easily identifiable by the missing right serif of the Ts on the reverse.

This **CHOICE** coin is exceptional in every way! Boldly lustrous on both sides with a strong satiny glow that is vibrant in the fields, especially on the reverse. Both obverse and reverse show impressive depth, sharpness, and crispness of strike with every hair strand, star, feather, and every detail sharply defined. The surfaces are hard and smooth, with very few post mintage contact marks noted, even under the most intense scrutiny with a powerful loupe. More artifacts from the minting process are seen, such as the die cracks associated with Die State III and traces of die rust on the obverse. Both obverse and reverse are awash in a rich, antique silver with accents of olive, slate-blue, and soft apricot-gold iridescence that come out when rotated in a light. Truly the underlying surfaces are brilliant and the eye appeal really cannot be improved upon. Technically and visually this is a very high end early dollar!

PCGS 4, NGC 5, CAC 2. The most recent sold in the 2018 Central States auction for \$96,000 and before that, a non-CAC NGC coin sold for \$94,000 in June 2017. Needless to say you can ignore all price guides on this coin, they are outdated and do not reflect these auction records. Destined for a **WORLD CLASS** date or type set of dollars and this one should see fierce bidding. Keep in mind, no MS64 (Pop 1) has sold since June 2005 and the Pogue MS65 is tied with the Newman-Morelan and both realized well in excess of \$300,000! This fully **CHOICE** example will be a real prize for any collection!

B-6, BB-241. Ex Hesselgesser Collection.

This is a very pleasing and original example of what we call a "GEM" XF. Well struck devices are crisp with just a touch of wear on the high points. Traces of original luster come through a layer of antique violet-gray patina. The eye appeal is exceptional for an XF with a problem free planchet and there are only a few minor ticks obtained by its stay in commerce. The wear is even and problem free giving this original beauty a wholesome and high end eye appeal.

PCGS 5, NGC 48, CAC 3. The last PCGS/CAC example sold in auction for \$5,875 in September 2013 and an NGC/CAC coin sold in the 2011 ANA auction for \$5,578. Ex Hesselgesser Collection.

A "Notable Specimen" of this scarce die marriage, which Dave Bowers notes 300-550 survive in all grades, and lists a census of 64,64,63,61,58,55. The majority of these are obviously heavily worn, with most in the Good to XF range. Bowers estimates 10-20 survive in all AU grades, with just a handful in Mint State.

This highly attractive example has bold definition throughout which is accented by a somewhat reflective surface which comes out when viewed in certain angles

in the light. Totally original shades of deep pewter, slate, and russet-tan have blended accents of olive, teal, and pale blue that come out when rotating the surfaces in a light. A few ancient ticks will forever identify this fully CHOICE early dollar as the Hesselgesser coin.

Surprisingly no prior provenance is recorded for this beauty.

PCGS 14, NGC 22, CAC 3. This is the only CAC coin to have sold, realizing \$17,250 in September 2011. The market for early dollars has seen some weakness more recently, making this a great time to add very high end examples like this really CHOICE AU to your type or date set. It should bring a strong bid.

LOT 306**\$1 1860-O PCGS MS64+**

A large mintage of 515,000 and the discovery of several original mint sealed bags in the 1960s makes the 60-O dollar a great date for type collectors as they are available in Mint State. Most examples are lower grade Mint State coins, as expected for coins stored for ages in bags. This piece has a pearly-silver and clear gold patina over choice Mint State surfaces, indeed were it not for a thin scratch on the reverse and some microscopic scattered ticks, this coin would have the eye appeal of a GEM. Well struck and generally pleasing.

PCGS 1, NGC 5. The last one to sell was likely "bought back" by the consignor, as it is way too low. An NGC example brought \$8,108 in March 2014 and the current PCGS value is listed at \$9,500. A GEM will cost around \$40,000, so a 64+ is the highest grade that is within range of most collectors. A neat type coin.

SUPER HIGH-END! This is a most dramatic coin!

Incredible deep mirrors beam from all over. The mirrors are the ultimate in clarity and are remarkably clean for a PR63. You have to use a strong glass to see the few light wispy lines in the fields. The mirrors are so intense you really need Ray Ban shades to view this coin. A killer band of navy/gold/violet frames the obverse peripheries. The reverse just has some gold. The centers are an intense deep silver color. Miss Liberty and the details are so sharply struck and heavily frosted they look sculpted. The eye appeal is insane-really!

ONLY 50 pieces were ever minted. PCGS 1, NGC 1. There are NO PCGS auctions records for this date and grade in Cameo. A regular NON CAM PCGS PR63 sold for \$11,750 in 2017-and we assure you the coin looked NOTHING like this one! It is also important to note this coin has been off the market in a major Midwest collection for many years. We certainly do NOT see ANY dates in the 1850s looking like this. What an opportunity!

Real and easy to see deep mirrors beam from all over. The mirrors have great clarity and are super clean. When you twirl the coin, the mirrors look like a freshly formed sheet of glass. ONE OF THE GREATEST TONED DOLLAR SETS EVER
 EX SONNIER/NORTHERN LIGHTS

THE FOREVER LEGAL SET

Set includes 2 1881-S; 1882-S; 1883-O; 1886 housed in a Capital Plastics holder.

When purchased out of the famous Sonnier collection of toned dollars, these coins were pulled aside and kept personally by Laura Sperber, the buyer. They remained ungraded on her desk for years until the Northern Lights Collectors saw them and had to have them for his desk. Only now is he ready to sell this set. (he sold his main collection 2+ years ago).

This is how Sonnier kept his coins. There was just something special about his coin group and how close all the colors are (no, no one makes these colors in their basement). Each coin has desirable - make that incredible - burlap bag toning. We do rank each coin a full 10 on our 1-10 color scale (10 is the best). Considering here are four different dates with matched color that is unheard of amazing!

We advise you to look at the coins in person or have a trusted dealer look as grading can be all over the place. Do note, the values here are in the colors.

From right to left here is how we grade the coins:

- 1881-S OBV COLOR MS65+**
- 1881-S OBV COLOR MS65**
- 1883-O REV COLOR MS65+**
- 1886 REV COLOR MS65+**
- 1882-S REV COLOR MS65**

We hope this virgin piece of numismatic history finds a great new home. We can see this fresh magnificent set bringing a runaway price. This set will be sold "as is" with no return under any circumstances as the coins are ungraded. If you know your toners, and know the past owners, you know you have nothing to fear. Good luck!

Among the top 10 graded at PCGS, this immaculate GEM borders on the SUPERB classification and the initial visual impression is that of a higher grade.

The obverse has a stunning luster that is flashy and semi-Prooflike. The fields shine like a spotlight and are nearly blinding in their brilliance. Ms. Liberty is well struck and the details are fully frosted. The reverse has a bold satin luster that has ample cartwheels. The surfaces are essentially FLAWLESS and the brilliant silver surfaces are totally untuned, as fresh and vibrantly lustrous as the day it was struck.

PCGS 126, NGC 25, CAC 27. There are only six coins graded in 66+. The only one that ever sold was the marvelously toned Northern Lights coin--which is in an entirely different class. The current Collectors Universe value is listed at \$25,000. There are just three coins graded finer, including the MS67 we sold in the Coronet Collection for \$55,813 in June 2015. We know a world class coin will bring a very strong price when it crosses the block. It will make a great foundation to any amazing Morgan Dollar collection. Good luck!

 A beautifully toned, high end quality GEM 1880-S dollar.

The obverse has a crescent of teal that fades into magenta, gold, emerald, and olive covering about 45% of the surfaces, with the remaining being brilliant, untuned, highly lustrous silver. We rate the color an 8.5+ on our ten-point color scale. Aside from a few tiny, stray bag marks that are virtually invisible under the toning, we do not see anything that would preclude CAC approval. The reverse has a touch of iridescent rose-tan and pale russet patina. The devices are sharply impressed on both sides.

This PQ toned SUPERB Gem is worthy of any collection focused on attractive toners. We anticipate strong bidding for this beauty. Good luck!

\$1 1881-O PCGS MS64+ CAC

For a date that normally does not come with a bold luster, nor stunning toning, this GEM combines both! A rolling cartwheel luster blooms on both sides, bringing out the richness of the pastel iridescent toning that gently blankets the obverse. Multiple shades of pale blue blends with honey-rose and tangerine gold patina. Hints of the original silver peak out between the bands of color, giving this coin a very cool look. We rate the color as an 8 on our color scale. A few minor ticks are hidden in the color and do not detract from the high-end eye appeal.

\$1 1881-S PCGS MS66+ CAC

A vibrantly lustrous SUPERB GEM, with a wonderful range of beautiful toning. Shades of magenta, brilliant lemon-yellow, emerald-teal, and tangerine-rose patina grace about half the obverse, leaving about half untuned with a strong, silver brilliance. The eye appeal is very pretty and this 81-S dollar is worthy of a premium bid!

\$1 1881-S PCGS MS67

Talk about psychedelic toning! You can feel the Woodstock vibes from this multicolored and uniquely patterned toned GEM. Waves and angles of greens, blues, yellows, oranges, all blend together in a marvelous melange of color. We rate the toning an 8.5 on our scale with 10 being a world class monster. Boldly lustrous with intense cartwheels on both sides. Delicate gold is dusted on the reverse. The eye appeal is amazing.

\$1 1881-S PCGS MS67 CAC

Ex Northern Lights Collection.

From our July 2017 offering of MONSTER toned Morgans, lot 266, where it was described as:

"CHRISTMAS IN TECHNICOLOR

This coin MUST be seen in person to experience its mesmerizing colors. This coin is a genuine MONSTER!

Technically this coin is all there and then some. You can clearly see clean and smooth surfaces beneath the toning. The surfaces are also loaded with a powerful booming luster. A MONSTER mix of totally original iridescent magenta/pearl green/purple/royal blue blazes from the obverse. The reverse is original white with light gold. At one time NBC wanted to use this coin when its Peacock displayed all its colors! Yet another absolute stunner from the incredible Northern Lights Collection."

A truly spectacular coin that realized \$9,400 on a \$5,000-\$5,500 estimate. We know today, this coin will bring that again, or more as demand for truly special, MONSTER toned dollars has just gotten stronger since the end of our Northern Lights sales.

\$1 1881-S NGC MS68*

A beautifully toned MS68 Morgan dollar. Shades of olive-gold, mauve, peach, rose, and icy aqua blue give this SUPERB GEM a stunning look. Sharply struck and ultra lustrous, this coin has a very unique visual allure and is worthy of inclusion in any type or Morgan dollar set.

PCGS 170, NGC 272. There is a wide range of prices realized and this exceptional GEM will bring a strong bid. The current Collectors Universe value is listed at \$5,650 and we sold one without the coveted "*" designation for \$4,113 in our September 2018 Regency Auction.

\$1 1881-S PCGS MS68

A brilliant and lovely end-roll toned MS68. You can tell instantly from the angular pattern of the amber-gold and pale blue toning that the obverse sat up against the folded paper of an old roll. Both sides are sharply struck and frosty, and inspection with a strong glass fails to reveal any flaws of any kind.

PCGS 170, NGC 272. The current PCGS Price Guide value is listed at \$5,650 and there is a wide range of prices realized, but the average of the last 10 non-CAC examples was \$4,341. Worthy of a strong bid for its unique appearance and we can see it hammering a strong bid.

LOT 331

\$1 1881-S PCGS MS68 CAC

A very high end Morgan dollar with a gorgeous look.

Bold, rolling cartwheels swirl strongly on both sides. The luster brings out the lovely pastel apricot-peach, tangerine-orange, and icy-blue iridescent toning on the obverse. The reverse is untuned, save for the slightest touch of the clearest gold that is dusted on the subtle reflectivity of the luster in the fields. The eye appeal is exceptional and unmarred by any serious marks; there are none in the prime focal areas of the design.

PCGS 169, NGC 272, CAC 135. The last PCGS/CAC coin to sell in auction brought \$5,405 in our July 2018 Regency Auction and the current PCGS Price Guide value is listed at \$5,650. There are 20 coins graded MS68+ and finer, and this delicately toned SUPERB GEM is a perfect coin for a type set or high end Morgan dollar set. we anticipate strong bidding for this memorable coin!

LOT 332

\$1 1882 PCGS MS66+ CAC

A beautiful toned SUPERB GEM. Both sides have toning patterns suggestive of both album and envelope storage. Vibrant azure and cobalt grace the rims, while on the obverse a bright, sunshine gold dusts the central portions of the design. A few traces of an ancient fingerprint can be seen, but are part of the interesting patination of this high end 1882 dollar. Well struck and clean, this coin is certainly worthy of the lofty grade and CAC endorsement.

PCGS 480, NGC 220, CAC 87. PCGS has graded 58 in 66+ with just a baker's dozen finer. Recent APRs are all over the place from a low of \$1,450 to a high of \$4,800. \$1 1882-CC PCGS MS67 CAC

This is a great looking SUPERB GEM 82-CC dollar! Glassy, semi-reflective lustrous fields shimmer and gleam on the obverse, contrasting against smooth, frosted devices. The portrait of Liberty is especially crisply struck and has a very vibrant, thick frost. A gentle touch of rainbow tone clings to the obverse rim, framing the SUPERB surfaces. The reverse is satiny with a subtle touch of gold at the rim. The beautifully preserved surfaces are truly a delight. To view this Morgan dollar is to fall in love!

PCGS 98, NGC 56, CAC 26. Just five coins are graded finer. The last MS67 CAC we sold was in the May 2018 Regency Sale's offering of the P.F.M. Collection that realized \$9,106. \$1 1882-O PCGS MS66+ CAC
 An amazing, SUPERB quality GEM 82-O. Coins of this quality are VERY RARELY encountered!

A blazing, vibrant, untuned silver luster beams with strong rolling cartwheels on both sides; the total opposite of what is normally seen for the date, which often comes lackluster. The devices are sharply struck and wonderfully frosty. There are a few microscopic marks and a couple of old toning dots, but none impact the remarkable eye appeal of this SUPERB GEM Mint State coin.

PCGS 88, NGC 11, CAC 9. There are 9 graded MS66+ and just seven coins graded higher. Only three MS66+ have ever sold in auction, NONE of which were CAC approved. This remarkable coin blows the three non-CAC examples that sold out of the water and will realize a price well in excess of the current PCGS Price Guide value of \$7,500. Beautifully toned with magenta-rose, tangerine-orange, emerald-green, and teal-blue shades that intermingle over 100% of the surface. When you twirl the coin in a light, the brilliance of the underlying luster brings out all the subtle differences in the hues. We rate the color a solid 8.5+ on our 10-point color scale. A few stray ticks are seen under the color, but are appropriate for the MS64 grade and do not detract from the excellent eye appeal!

Ultra deep mirrors are easily 8" + in depth. You can see numerous tiny ticks because the mirrors are so deep and black (a term). Miss Liberty and every detail stand out boldly with full strikes and extra thick frost. The obverse looks even better than your typical MS65 DMPL, but the mirrored fields on the reverse amplify the few minor traces of contact. Even still, the eye appeal is great!

PCGS 280, NGC 109. The current Collectors Universe Value is \$875, but this coin should easily sell for more (the last one to sell brought \$1,020 in December 2018)!

\$1 1885 PCGS MS66+ CAC

A borderline MONSTER TONED 1885 dollar.

Overall we rated the sea-green, violet, fuchsia, teal, gold, honey-orange, and crimson-rose toning a 9 out of 10 on our color scale. The color is deeper to the right side and becomes more iridescent and pastel the further to the left you look. If the toning was a touch more vibrant, it would rival some of the monsters in the Northern Lights Collection.

Aside from the marvelous and colorful toning, the technical quality is SUPERB! Boldly lustrous with full, swirling cartwheel luster that blazes in the smooth fields and sharply struck devices.

While common in all grades up to MS66, this date does become scarce at MS66+ and rather RARE any finer. This colorful toned example is certainly worthy of a strong bid, and may even bring a record price for the grade! Good luck!

LOT 339

\$1 1884-S PCGS AU58+ CAC

A super-slider example of this famed condition rarity. Barely any perceptible wear can be found on either side, and there are just the slightest hints of contact on both sides. Sharply struck up and boasting a full, vibrant mint luster, this coin is just shy of a full Mint State grade.

PCGS 1366, NGC 1861, CAC 174. PCGS has graded 40 in AU58+. This date is notably RARE in Mint State grades. The most recent example to sell in auction realized \$3,520 in our March 2018 Premier Session and the current PCGS value is listed at \$3,450. Any Mint State coin is worth five-figures. Good luck!

NOTE: THE PCGS ENCAPSULATION IS INCORRECT. The encapsulation has the denomination and PCGS# for a \$5 not a silver dollar.

\$1 1885-O PCGS MS66 CAC

Another beautifully toned Morgan. The 85-O is not as commonly seen with such vibrancy of color as the one we are presenting here. The obverse is a drenched in a mix of verdant shades from teal to emerald that then blend with gold, rose, cobalt, magenta, and orange hues. The colors are 8.5++ on our color scale, enlivened by a vibrant, frosty mint bloom.

Worthy of a strong bid, this high end and PQ GEM is extremely attractive and will delight any serious collector of toned dollars. We expect a fierce round of bidding when this 85-O is called to the dais.

\$1 1886 PCGS MS67+ CAC

This is NOT your typical 1886, with a mintage of nearly 20 million, the 1886 is one of the most common dates in the Morgan dollar series. In SUPERB grades, as here, it is very scarce and prohibitively rare any finer.

Brilliant, superbly lustrous surfaces are essentially flawless! Deeply impressed devices are crisp and bold, fully struck up from a late state of the dies with the peripheries crumbling and extensive die cracks on both sides. The eye appeal is SUPERB with this coin looking today as it did the day it fell off the dies.

PCGS 550, NGC 935, CAC 361. There are 83 coins graded MS67+ at PCGS, and only 15 coins graded finer. The last two examples we sold were the RanJack and PFM coins, realizing \$3,525 and \$3,055 respectively. The current PCGS value is listed at \$2,500. Keep in mind the value goes up by a factor of 10 in 68! This SUPERB GEM is certainly worthy of any world class Morgan dollar set.

\$1 1886 PCGS MS67+

A SUPERB GEM with a bold, vibrant cartwheel luster. The luster is exceptionally strong with a full whirling effect on both sides. The obverse has a wonderful pastel teal-sea green on the upper 80% then fades to a light gold with deeper orange-rose accents around the date and the lower right three stars. The reverse is framed by an azure and amber halo. Both the obverse and reverse designs are well wrought by a bold impression from the dies. A strong glass reveals a few stray ancient ticks from bag storage. The eye appeal is very strong.

PCGS 83, NGC 24. The value of this SUPERB GEM is based on its toning. Recent sales are for white, untoned coins with no bearing on the value of this beautiful coin, and is worthy of a premium bid.

\$1 1889-CC PCGS AU53

One of the major KEY dates of the Morgan dollar series, like the 93-S, in demand from collectors at all grade levels. Unlike other Carson City issues, this date was represented by exactly ONE coin in the massive GSA hoard that was released nearly 50 years ago. Today it is scarce in all grades, and RARE in Mint State.

This AU53 is untuned and brilliant with nicely struck devices. Probably dipped, the surfaces are not burnt from it and there is ample original mint luster surviving in the fields. The eye appeal is not bad, despite the dipping.

PCGS 270, NGC 218. There were three that sold in December 2018, ranging from \$5,760 to \$7,800 and the current PCGS value is listed at \$9,000. A key date like this will delight so many collectors looking to finally fill this hole in their sets.

Bold, radiant cartwheel luster shines with intense brilliance on both sides accenting the sharply struck and frosty devices. The eye appeal is excellent, and we are not really sure why CAC did not award it a green sticker.

PCGS 227, NGC 54. This high-end coin should stand on its own merits, and you can pretty much ignore the PCGS Price Guide and other non-CAC prices realized. Another date that is RARE any finer.

\$1 1891-O PCGS MS66

Morgan dollar collectors take notice, Legend Rare Coin Auctions is honored to offer the SINGLE FINEST PCGS-graded 1891-O dollar.

Exceptionally well struck for the date and boasting a bold, swirling mint luster that rolls along GEM quality surfaces. This is a remarkable survivor of the mintage of nearly 8 million pieces. The luster is intense and blinding on both sides. Blast white silver surfaces are totally untuned and scream with strong, original blinding brilliance. The sharply struck devices are fully frosted and really do stand out.

This date has the distinction of being authorized by three different acts of Congress, and received bullion to strike these coins by the Bland Allison Act (1878), the Sherman Silver Purchase Act (1890), and the Trade Dollar ReCoinage Act (1891). All told, the New Orleans mint churned out 7,954,529 Morgan dollars. Very little effort was made to ensure quality in striking, as the mint's task was to produce as many dollars as possible. As such, the 1891-O is noted as having really weak strikes, among the poorest quality dates in the entire series. This sharply struck and highly lustrous PQ GEM is the FINEST KNOWN to PCGS and sits alone as the POP TOP for the date.

PCGS 1, NGC 3. If you are building the #1 set, you need this coin. The Coronet Collection, the all time #1 Morgan Dollar set, a hall of fame collection on the PCGS Registry that we sold in 2015 only had a 65+. The current Collector's Universe value is listed at \$100,000 and as we have seen in recent sales of Morgan dollars, when truly spectacular examples appear in auction, they bring extremely strong prices. We anticipate a WORLD RECORD price for this MONSTER 1891-O dollar! Congratulations to the winning bidder, you have just elevated your set into a level unobtained before!

\$1 1893-CC PCGS MS64+ CAC

This coin is an eye popper that really is all there and then some. This 93-CC really does border MS65!

Both sides are clean and sleek - which is not easy to find. Only with a strong glass can you find a few ticks and light scuffs (nothing major). We'd bet anything in the old days before PCGS this coin would have been called a GEM. A strong, rolling cartwheel luster shows off totally original white, undipped surfaces. Miss Liberty and the details are extremely well struck and frosty. Her cheek is amazingly clean and smooth. The eye appeal is fantastic!

The final issue from the Carson City mint saw a mintage of 677,000 which the vast majority of it went right into circulation. VERY RARE any finer.

PCGS 623, NGC 211, CAC 68. PCGS has graded 41 in MS64+. There are only 13 MS65's-but good luck finding any. The last two MS64+ PCGS CAC 93-CC's brought \$35,250 in 2017. The current PCGS Price Guide value is listed at \$40,000. We had the pleasure of selling the Coronet Collection PCGS MS65 CAC in June 2015 for \$129,250. This is a coin that will be a real prize for any advanced Morgan dollar collector wanting a GEM example for their set. Good luck!

LOT 355**\$1 1893-O PCGS MS62 DMPL**

This coin is clearly above average for the date in DMPL. Our sister company Legend Numismatics has been handling DMPL's for 40 years and were picked by the late Jack Lee to exclusively buy his DMPL set. They know their DMPL's and consulted with us on this piece. It is their opinion, this is an above average coin.

Surprising deep mirrors beam from all over. The mirrors do make 8" in depth. For silver mirrors they have decent clarity. Only when using a strong glass can you see some light die polishing lines. There are no problems to be found. The contrast is silvery and is above average. Miss Liberty and the details are exceptionally struck for an O mint with maybe a touch of weakness in the hair. Her cheek is well rounded and clean. We grade the reverse a full MS63DMPL. The eye appeal is excellent!

PCGS 8, NGC 1. NOTE: CAC has only beamed one 93-O DMPL, the MS65 and that is being offered for \$350,000! The last auction record for a 1893-O PCGS MS62 DMPL is \$12,925 in April 2017. The current Collectors Universe Value is \$16,000. With only 5 possibly graded higher, this is a coin the majority of DMPL collectors need. Opportunity knocks loud here!

**LOT 356****\$1 1894-O PCGS MS64+**

Like many of the mid-1890s dates, the 94-O is a very scarce date in Mint State, as most of the mintage went directly into circulation. This particularly brilliant example does have a bold, strong luster for the grade and date, both sides have a glowing satin sheen. For an O-mint, the details are nice and crisp with bold definition. The surfaces are of essentially GEM quality with just some barely visible traces of contact. EXTREMELY RARE any finer!

PCGS 68, NGC 17. It is very interesting to note, that while looking at auction comps, most of the 64+s that have sold in auction displayed moderate, often mottled, uneven toning. Untoned, brilliant silver coins seem to be the exception, not the norm. An untoned example sold in September 2015 for \$12,925 (without CAC, as here); a CAC approved untoned example brought \$16,450 in the 2016 ANA auction. The current CU value is \$12,500 and only 13 coins are graded finer at PCGS, each carrying with it a \$50,000+ price tag!

PCGS# 7230 | ESTIMATE: \$11,500+

\$1 1895-O PCGS MS66

Legend Rare Coin Auctions is proud to offer this GEM 95-O dollar! Currently tied for second FINEST graded at PCGS, there is just a single coin finer, and this is the highest grade example sold in the last 13 years! Bested by ONLY the Wayne Miller-Jack Lee MS67, this is a true prize for ANY Morgan dollar specialist--worthy of any WORLD CLASS set!

Only 450,000 dollars were struck, making this date a scarcity even in low grade. As you get into the AU grades, it is a KEY issue, and is downright RARE in all Mint State grades. The present coin is among the LEGENDARY examples, which come up for sale very infrequently, and often only when collections like the Ralph Stone or Coronet Collection come to auction. This coin seemingly had not been known prior to the 2018 ANA auction.

A truly UNIQUE looking example, clearly a coin that was allowed to sit for ages, unmolested, undisturbed, and untouched. A bold lustrous surface radiates and glows all over on the obverse, shining through iridescent toning on both sides. The luster blazes more boldly on the obverse, suggesting that it was stored somewhere where the reverse was in total contact with the tray or holder, while the obverse was not. Soft russet-olive-tan-gold patina dominates the obverse with two patches of deeper aquamarine patina at 3:00 and 9:00, giving this coin a distinct look. The reverse is an evenly dispersed melange of olive, russet, sky blue, icy teal, and coppery gold. Exceptionally well struck for this notoriously weak issue, virtually every detail is razor sharp in definition. The surfaces are clean, we looked all over the obverse and reverse looking for any stray marks, lines, or other defects that would not be normally seen on a 66 of any date, and there are none anywhere - obverse or reverse. The experts all agree this coin is a true GEM MS66, so we are not exactly sure why CAC did not sticker this coin.

PCGS 3, NGC 1. This is the ONLY MS66 to ever sell in auction, garnering \$336,000 in the 2018 ANA auction. Collector's Universe suggests a value of \$375,000. Keep in mind the Reverend McClure coin, sold as an NGC MS65+ CAC in June 2016 for \$258,500 is now graded PCGS MS66. The Wayne Miller/Jack Lee PCGS MS67 sold in the 2005 FUN auction for \$575,000, a level that is still a record for the date. The presently offered GEM is truly PREMIUM QUALITY, very attractive, and will be a centerpiece coin in any world class Morgan dollar set! We know it will bring a strong bid when it crosses the block!

\$1 1896-S PCGS MS65 CAC
 Despite a mintage of 5 million, the 96-S is conditionally very RARE in GEM MS65 and excessively so any finer!

Highly lustrous surfaces have a bold satiny gloss in the glowing fields. The cheek is frosty and the devices have a decent strike with just some minor, spotty weakness seen in some of the central details.

Both sides show some olive, russet, gold, and tinges of deep purple that come out in a light and are mostly limited to the rims. The eye appeal is very cool for the date and grade.

PCGS 76, NGC 14, CAC 7. This coin has a record as an NGC/CAC coin at \$12,500 in May 2018. Keep in mind we sold a 65+ for nearly \$22,000 in December 2016! This totally original coin is worthy of a great Morgan set and will see strong bidding!

LOT 361**\$1 1897-S PCGS MS67 CAC**

This is an important opportunity for the advanced Morgan dollar collector. It has been the experience of our sister firm Legend Numismatics that a MS67 1897-S is one of the hardest coins to find beamed by CAC.

Very high end and lustrous, this is a real SUPERB GEM. Sharply struck and brilliant, the surfaces are clean and free of any serious marks. Even the cheek is clean, smooth and frosty. The eye appeal is very high end indeed.

PCGS 29, NGC 11, CAC 5. The last PCGS/CAC coin sold in auction for \$7,501 in February 2018. Keep in mind that PCGS has graded just three coins finer for the date, all of which would be very difficult to add to your set. Opportunity knocks very loud here!

PCGS# 7250 | ESTIMATE: \$6,500+

LOT 362**\$1 1898-O PCGS MS67+ CAC**

Truly a magnificent SUPERB GEM, clearly among the FINEST KNOWN and tied for FINEST PCGS graded.

A strong, swirling, brilliant cartwheel luster blooms all over. The devices are boldly frosted on both sides and there is just a touch of flatness on Liberty's curls above her ear, typical of New Orleans issued coins. Liberty's cheek has ultra thick velvety frost that is unmarred by any lines or marks. Indeed there may be one or two seen on the reverse with a strong glass, none of which are in a prime focal area, nor do they detract at all. The eye appeal is exceptional, brilliant, and very high-end.

PCGS 318, NGC 187, CAC 108. There are 23 graded MS67+ and NONE FINER at PCGS. The last three examples to sell in auction were in our Regency Auctions, realizing between \$10,869 and \$12,338. The current Collectors Universe value is listed at \$15,000 and as one of the FINEST known, we are sure it will bring a very strong bid to one of the top ranking collectors of Morgan dollars. Action will be fierce for this one.

PCGS# 7254 | ESTIMATE: \$9,000+

The current Collectors Universe value is \$1,850. Keep in mind that we just sold a PCGS MS67 CAC for \$7,638 in our November 2018 Regency Auction. Clearly these are RARE any finer!

PCGS# 7286 | ESTIMATE: \$1,600+

Prior to that, we sold the RanJack coin for \$17,625 in July 2018 and the P.F.M. Collection coin for \$25,850 in May 2018. Only a few coins are graded higher at PCGS, most being MS66+ (6), with 4 coins in MS67 and a single MS67+. The current PCGS Price Guide value is listed at \$20,000. Worthy of an AMAZING cabinet of Morgan dollars! Good luck!

\$1 1903-O PCGS MS66+ CAC

A well struck borderline- SUPERB GEM example. Untoned white silver luster has a soft satin texture and even under close scrutiny there are no marks of individual importance. The originality is evidenced by the subtle, yet sparkling golden iridescent toning on the obverse. This is a famous date among Morgan dollar collectors. Prior to release of a hoard in Treasury vaults in the 1960s, this date was among the rarest in Mint State. While scarce in gem, it is RARE in MS66+ or finer.

PCGS 839, NGC 359, CAC 223. There are 75 graded 66+ and the last two PCGS/CAC example realized \$1,763 in our January 2019 and September 2018 Regency Auctions.

WOW! What an amazing 1903-S dollar! This coin is absolutely brilliant with a strong, swirling mint luster that rolls along both sides. The surfaces are of exceptional, high-end quality, totally free of any singularly distracting marks (a powerful loupe reveals a tiny contact mark or two, none of which detract from the high-end visual allure). The eye appeal is beyond exceptional for the date.

PCGS 41, NGC 8, CAC 13. The last one to sell in auction realized \$31,299 in the 2018 ANA auction.

A gloriously toned and highly reflective GEM Proof Morgan dollar. Everything about this coin screams high-end quality and originality.

The fields are highly reflective with a bold clarity and brilliant depth. The surfaces are glassy smooth and devoid of any distracting marks or lines. Richly and deeply toned surfaces are not too dark, and offer beautiful violet, blue, orange-gold, and rose tone. The sharply struck devices are frosty and stand out wonderfully against the mirrored fields. The contrast is great!

\$1 1923 PCGS MS64

This is a gorgeous toned 1923 Peace dollar. Both sides are awash in bands of original toning, shades of green and blue dominating, blending with gold and tangerine. This is one of the most beautiful 1923 dollars we have offered and we are not sure why CAC did not award this near-GEM coin a green bean. We rate the color an 8.5+ on our color scale and the eye appeal is stunning.

Worthy of a strong bid from the toned Peace dollar collector and will attract fierce bidding from collectors who appreciate the high-end visual allure.

This is a truly unique looking GEM 1924-S Peace dollar. Unlike the majority of examples of this date, that are white or off-white silver. This coin has a dusting of a pastel green/blue that blends with rose, orange, and gold coloration. Extremely vibrant luster brings out the subtleties on both sides, accenting the strong strike of the devices. A glass reveals a few minor, insignificant marks. The eye appeal is great and you will be hard pressed to find another that looks like this!

PCGS 94, NGC 75. As a coin with such a unique look, you can ignore the APRs, NONE have this wonderful toning and look. We predict that this great looking coin will see bidding that surpasses the current Collectors Universe value of \$7,500. Keep in mind that only five coins are graded finer at NGC.

A wonderfully toned 1925 Peace dollar that we had the pleasure of offering in our June 2015 Regency Auction, where it was described as:

"Just a few tiny ticks keep this marvelous, high-end coin from full MS65. The obverse is lively, with gorgeous, original, gold/golden brown/pale violet/green colors, while the reverse is a sea green/silvery mix. If you need a pretty toned Peace Dollar, look no further! The eye appeal is heart pounding! "

You can tell the quality based on the strong realization of \$3,760 on a \$750 to \$850 estimate. Today, we think this near-GEM will sell for more, as the market for Toned Peace dollars has matured.

\$1 1927-D PCGS MS66+ CAC

No question this coin is a MS66.9+! We have never seen an example of this date in such a great state of preservation.

Remarkable surfaces are a tough graders delight. There are no problems. We do see a small frost break on the neck and tick which in our opinion are all that keep this piece from full MS67 designation. The surfaces also have a smooth appearance. A full cartwheel like luster beams from all over. Typically, 27D's come with a flat, no radiant luster. Both sides are GEM original white color. There are NO spots. Miss Liberty and the detail are sharply struck and frosty. The eye appeal is gorgeous!

PCGS 13, NGC 3, CAC 7. PCGS has possibly graded 3 in MS66+ (we think this coin is 2x) with NONE higher. It took 32 years for this coin to be graded! The current Collectors Universe Value is \$135,000. It's not so crazy. If there ever was an MS67 PCGS CAC piece we can only imagine the total bidding war that would erupt sending it close to \$250,000! Since listing this coin in the sale, interest has been amazingly strong. This coin could end up with a world record price-which is fitting for the quality! Good luck!

Lively and lustrous surfaces gleam on both sides of this sharply struck GEM example of this KEY date. Minimal marks can be seen with effort and the aid of a glass. The obverse rim shows some light toning that frames the peripheries and lets the sharply struck devices stand out. The eye appeal is excellent.

PCGS 360, NGC 104. There is a wide range of prices realized in auction, and the current PCGS value is listed at \$3,500. This one will fit nicely in a GEM set.

A high end example of this important KEY date. GEM quality in every way from the strong luster to the delicate pastel iridescent patina and bold strike. Soft golden and pale tan tone show off against the icy silver and blue accents on both sides. The fields are exceptionally clean and just a few tiny stray ticks can be seen on Liberty's neck; these are totally unobtrusive, and perfectly appropriate for the assigned grade. The eye appeal is very high end for the date.

PCGS 356, NGC 104, CAC 79. The most recent example to sell in auction realized \$4,818 in our September 2018 Regency Auction on an estimate of \$3,000 to \$3,300. Prior to that, one sold in June 2018 for \$4,080. The current Collectors Universe value is listed at \$3,500 and that does not take into account this coin's great eye appeal and quality for the grade. Remember this date is VERY RARE any finer with 66s valued into the \$25,000-\$30,000 range!

Tied for second FINEST graded and a very HIGH-END GEM example of this conditionally RARE date. It is also the highest graded example to have a CAC bean, so if you are working on set of all CAC coins, you need this one!

Boldly lustrous surfaces are booming on both sides. The obverse has a bold, rolling cartwheel effect while the reverse is nice and frosty with a satiny glow. Both sides are sharply struck and the surfaces are ultra clean and free of any distracting marks of any kind or size. The obverse has traces of amber-gold near the rims which adds to the luxurious eye appeal.

PCGS 66, NGC 41, CAC 11. PCGS has graded only 4 in MS65+ and just a single MS66 finer. Only one PCGS/CAC MS65+ has ever sold in auction, realizing \$42,300 in the 2015 ANA auction, and that coin is now impounded in a major collection. Since then, the market for high-end Peace dollars has caught fire and this one should hammer somewhere closer to the current PCGS Price Guide value of \$52,500. The single MS66 is also impounded in a major collection and will likely not be seen on the market for years to come.

WOW! This is an amazing SUPERB GEM example, one of the absolute FINEST known from an original mintage of only 7,100.

Intense, deeply mirrored, prooflike fields look like a Proof striking with fully frosted and crisply struck devices. The dies were heavily clashed when this coin was struck, and when you look at the coin with a strong glass, all you really see are the die clash marks and die polish lines. At first glance this coin really does look like a CAMEO Proof.

PCGS 8, NGC 3, CAC 4. This SUPERB GEM is among the FINEST graded, with just three in 68 graded finer. OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

 FROM THE PROSPECT COLLECTION

Legend Rare Coin Auctions is proud to offer the **FINEST CAMEO** Proof 1885 gold dollar graded by PCGS. This magnificent jewel is **SUPERB** in every way and one casual glance will make you fall in love with its quality and stunning visual allure.

This amazing **SUPERB GEM** is remarkably well struck. Every detail is razor sharp in definition on both sides, with a bold, thick frost on Liberty's portrait. The fields have a wonderful orange peel texture that is so desirable on Proof gold. Both sides show off a rich orange tone that is progressively richer toward the peripheries.

In his new work on Proof Gold, John Dannreuther has identified this die pair as JD-2, which is identifiable by the die line coming out of Liberty's mouth and some die roughness at the ear. One feature he does not mention in the description of the die characteristics are radial lines seen on both sides. At first we thought these were in the dies, but after showing the coin to John Dannreuther, he explained that those were planchet burnishing marks from when the planchet was being prepared prior to striking. JD commented "Guy was a bit overzealous in his job!"

PCGS 1, NGC 10, CAC 3. This coin is counted among those graded by NGC, as we recently had it crossed over for our customer, as such, this cannot be the coin that sold in the January 2004 ANR auction for \$20,700. The last NGC/CAC coin sold in the 2011 ANA auction for \$18,400. A PCGS/CAC PR66 sold in the 2015 ANA auction for \$16,450 and the current PCGS Price Guide value is listed at \$21,500 in PR67 CAM. With its outstanding eye appeal and wonderful high end quality, this impeccable **SUPERB GEM** will see very strong bidding from type or Proof gold specialists!

We love these little Proof jewels in **GEM** grades! This is a fairly common date, one that saw a large mintage of 1,016. This is a borderline **CAMEO** with just a hint of frosting on the devices. The mirrored fields are bold and deep reflection. The fields are textured with the highly desirable orange peel effect that is so popular among collectors of Proof gold coins--the caviar of numismatics. The devices are sharply struck and nearly frosted, producing some moderate contrast. The eye appeal is spectacular.

\$2.50 1825 PCGS MS61

The Capped Head quarter eagles are VERY RARE as a type in all grades. The gold content exceeded the face value, leading many to be exported and melted.

The currently offered BD-2 is an example of the more common variety of the year (BD-1 and BD-3 are both R-6+). Bright and brilliant yellow gold luster blooms from all over with a very distinctive semi-prooflike reflection which is often seen on these lower mintage dates. Sharply struck devices stand out and there are just a few minor lines and traces of contact that account for the assigned grade from PCGS. Despite being "only" a 61, the eye appeal is quite nice!

PCGS 11, NGC 11. We think there is some duplication in these figures, as the population drops off in 62 and finer grades. The current PCGS Price Guide lists a value of \$40,000 and prior to this one, the last two sold for \$32,900. We sold a BD-1 in AU58 CAC for \$36,425 in our May 2018 Regency Auction. Lovely and original, the rose-gold and olive-gold accents are brought out by a satiny mint frost that blooms in the fields. Some softness of strike is noted in the central devices, but that is normal for the date. An advanced die crack bisects the obverse. We note a few stray lines, which accounts for the assigned MS61 grade, but the overall initial visual effect is of a higher grade.

PCGS 31, NGC 41, CAC 12. The last PCGS/CAC coin sold in the 2015 FUN auction for \$3,760 and the current PCGS value is listed at \$3,850. Scarce finer, this is a great coin for a type or date set.

A gleaming golden brilliance remains on the lightly worn surfaces. Some light stray marks from commercial use are seen, but are perfectly acceptable for the Choice AU grade. The devices retain a bold sharpness and a bright golden vibrance.

PCGS 24, NGC 42, CAC 4. The only CAC-approved example was the Rajj Collection coin sold in March 2012, realizing \$2,185. The most recent PCGS-graded coin brought \$2,050 in a September 2018 online-only auction. The current Collectors Universe value is listed at \$2,150 and this coin will bring that or more.

\$2.50 1838 PCGS MS63+ CAC

Exceptionally CHOICE and high end for the date and grade. This is a very special Classic Head quarter eagle for the collector of this short lived "transitional" series or for the gold type collector.

A thick, frosty mint luster glows with a strong vibrance on both sides. The surfaces are richly toned with a wonderfully original honey and tangerine

gold patina. Well struck, this lovely coin has bold definition on both sides. The eye appeal is excellent for a Classic Head with minimal lines noted only with a very strong glass.

PCGS 8, NGC 7, CAC 6. This is the only MS63+ graded at PCGS. The current Collectors Universe value is listed at \$13,250. In our January Regency Auction 30, we sold a more common 1836 in 63+ for \$14,688. This impressive coin is worthy of a very strong bid!

\$2.50 1846-O PCGS MS63 CAC

This coin ranks among the **FINEST KNOWN** of this very scarce New Orleans mint quarter eagle. Estimates suggest that about nine and twelve Mint State coins survive and this one ranks as tied for third finest graded at PCGS, which has graded just two coins finer (MS64 and MS65).

This is a particularly attractive, fully **CHOICE** example. Boasting a very strong strike for the date, the details are each very well defined, except for some light weakness on the central reverse. Even with that, it is very crisp for a 46-O. The surfaces are delicately toned brought out by a vivid satiny luster. There are just a few minor scuffs and ticks that account for the assigned grade, but none are distracting. The eye appeal is very high end!

PCGS 2, NGC 3, CAC 3. It is interesting to note that NO PCGS coin in MS63 or MS64 has sold in auction since 2004. An NGC MS63+ CAC sold in our November 2018 Regency Auction for \$18,800 and the current PCGS value is listed at \$19,500. This truly **CHOICE** example will be welcomed in any specialized set of New Orleans gold or Liberty quarter eagles. A real prize for the specialist that will see fierce bidding competition and is not an opportunity to be taken lightly!

LOT 392
\$2.50 1847-O PCGS MS64 CAC

Legend Rare Coin Auctions is proud to present this FRESH, ORIGINAL, near-GEM 1847-O quarter eagle in our Regency Auction. This is the total opposite of what the "typical" 47-O \$2.50 looks like.

The first thing that catches you is the bold, frosty mint luster that blooms all over the surfaces on the obverse and reverse. The satin sheen turns to semi-reflective luster (depending on the angle) and brings out the awesome original skin. Olive gold patina that shows some deeper honey accents on the reverse legend adds to the SUPERB visual allure. All the details are crisply struck up with fully defined hair curls, star centers, and feathers on the eagle.

The fields show microscopic traces of contact, mostly limited to the field above the eagle on the reverse, but there are no serious marks or lines of consequence. A strong glass reveals some mint made die clashes, die cracks at the rim, and a single die line on the reverse.

Struck from variety 1-A, identified by the repunching of the 1 in the date and the centered placement of the O mintmark over the fraction bar.

PCGS 2, NGC 2, CAC 1. Among the absolute FINEST KNOWN of the date, this coin will appeal to any collector of rare gold coins. Doug Winter estimates perhaps 15-20 survive in all Mint State grades, and his census shows just a single NGC MS65 as CC#1. This coin has not been in any recent sale, nor has it been offered by any dealer.

NOTHING CLOSE TO THIS COIN HAS BEEN SOLD at auction in seven years! The auction record for the date is for the Harry Bass coin, sold in May 1998 as a PCGS MS62 (lot 1153) at \$16,500 (since upgraded to NGC MS64) and is impounded in a private collection. This is a truly once in a GENERATION opportunity, do not let it pass you by!

A great example of conditionally rare issue, from an original mintage of 3,200. In high grades, this date has equal rarity to the very rare Proofs, which saw a mintage of only 50.

The reflective lustrous fields show some minor friction and contact, mostly seen under the aid of a strong glass. The details are boldly defined by a precise impression from the dies. The eye appeal is wonderful for the grade, and should see strong bidding.

PCGS 8, NGC 10. The most recent example to sell was in our January 2019 Regency Auction 30, which realized \$2,938. Before that, one sold in the 2019 FUN auction for \$4,800. This is a very tough date! Only 3,200 were originally struck, and in high grades, it is very rare! In nearly 35 years of certifying rare coins, PCGS has graded exactly 16 coins in AU58 or higher--that speaks volumes, this date clearly circulated a lot, David Akers wrote that Mint State examples are just as rare as Proofs (mintage 50).

The present coin has a warm orange-gold with accents of icy periwinkle tones in the devices. A semi-reflective luster is brilliant and shows off the strength of the strike on both sides. A glass reveals some minor traces of contact, but nothing that affects the bold overall eye appeal which is quite nice.

This is a simply stunning example of this RARE date quarter eagle! With just 640 circulation strikes produced, in addition to the only 51 Proofs struck, the 1881 is only available when advanced collections come up for sale.

Today, about 18-22 survive in all grades. This is a truly impressive highlight of this Regency Auction.

Deep mirrored fields are bold and reflective on both sides. They have strong clarity and a wonderfully "rippled" orange-peel effect in the fields. The sharply struck up devices are fully frosted, creating a dramatic Deep Cameo contrast.

Truly a memorable GEM that is a great example of this caviar of numismatics.

PCGS 1, NGC 1, CAC 2. NO PCGS example has sold in auction. A PCGS PR65 CAM CAC sold in October 2012 for \$41,125 and the current Collectors Universe value in 65 DCAM is listed at \$45,000. This AMAZING GEM will be a great addition to ANY gold coin collection. Keep in mind that the low mintage circulation strike is unknown in any PCGS grade above MS63+ so if you are working on a GEM set, inclusion of a Proof example is required (the PCGS MS63+ sold in November 2017 for \$45,600). A great coin that will see very strong bidding. Good luck!

An amazing looking GEM Proof with a stunning black and white bold cameo contrast on both sides. Deeply reflective fields have a nearly deep cameo contrast against the highly frosted and sharply struck devices. The mirrors are icy slick displaying the epitome of smoothness. There are traces of orange peel texture that add to the visual allure. The surfaces are exceptionally well preserved, a strong glass (we used a 9x glass) could only find the slightest line or two; none of which detract from the stupendous eye appeal.

The Red Book lists a mintage of 97, but the latest research by John Dannreuther shows that only 92 Proofs were ever struck. Today, perhaps 35-45 examples are known, and the present coin is bested by just two coins in the Cameo designation.

PCGS 6, NGC 13, CAC 8. The most recent PCGS/CAC coin to sell in auction realized \$25,850 back in February 2013. The current PCGS Price Guide value is listed at \$33,000. Keep in mind that this date is VERY RARE any finer; we sold the sole PR66 CAM in our November 2018 Regency Auction for \$44,650. While PCGS has graded four coins numerically finer in the DCAM designation as well, NONE of these have ever sold via auction. A VERY HIGH-END and stunning SUPERB GEM piece. One look and you'll agree why Proof Gold is considered the "caviar of numismatics."

Amazing super deep mirrors beam boldly from all over. The mirrors are remarkably clean, have intense clarity, and are, of course intensely, reflective. When you twirl the coin, the mirrors run like a watery river of gold from side to side. The contrast is dramatic. Both sides are a brilliant gold color; there are no spots or discolorations. Miss Liberty and the details are thickly frosted and are pinpoint sharp in strike. It looks like this coin was carved from a block of frosted gold.

The eye appeal is simply breathtaking!

ONLY 205 minted. PCGS 8, NGC 8, CAC 11. Prior to this one selling in our July 2018 Regency Auction for \$37,600, the last PCGS CAC piece to sell in auction brought \$39,950 in the 2018 FUN auction. Our collector has upgraded this type in his set and is selling this one again. As time goes on,

From an original mintage of 193, perhaps 120-140 survive today in all grades. In depth research by John Dannreuther shows that just one die pair was utilized for the issue.

This CHOICE example is typical for the date with the devices showing no frosting. The fields show deep mirrors with a lovely orange-peel effect visible under a strong glass. Brilliant medium gold throughout with traces of more coppery-orange hues that cling to the peripheries and among the protected outlines of the devices. Any tiny line is totally unobtrusive and cannot be detected with the naked eye, and the initial look is that of a higher grade (we would not be shocked if it came back at least a "+" if resubmitted - no guarantees).

 Ex Pittman.

A fantastic borderline GEM Proof 1894 with distinct CAMEO contrast on both sides. Only 75 Proofs were struck, and today, perhaps 35-45 distinct examples are estimated to survive. This is a very high-end and original coin that was described by David Akers in Part 1 of the John J. Pittman Collection, in part, as follows:

"Beautiful medium gold color with a slight copper tint. The surfaces have a very delicate haze, but less than is present on some of the other Pittman Proofs from 1888-1907. There are only a few light hairlines in the fields; the reverse is nearly Gem quality."

The haze that David Akers notes attests to the amazing originality of this impressive Proof gold coin; it has never been dipped, stripped, or conserved in any manner. This coin is listed as PR65 in John Dannreuther's listing of Significant Examples in his new master work on Proof Gold coins. The color is rich and the eye appeal is quite bold with warm orange hues in the reverse fields. The crisply struck devices have a lovely frosting on them. Any line noted by David Akers over twenty years ago is very minor and does not detract from the outstanding eye appeal of this near-GEM specimen.

\$5 1911 PCGS MS65 CAC
FROM THE PROSPECT
COLLECTION.

A totally ORIGINAL and high end GEM 1911 half eagle. While this is one of the more available dates in lower Mint State grades, it is indeed RARE in GEM grades.

The presently offered beauty has a wonderful, rich orange-gold toning with lighter lemon-yellow gold accents in the recesses. The incuse devices are crisply impressed by a strong blow from the dies. The fields, which are the highest points of the design, are clean and free of all but the most minor traces of contact. None of these are distracting and they do not affect the outstanding eye appeal. This is a perfect coin for a GEM gold type set and this date is excessively rare any finer!

PCGS 69, NGC 50, CAC 28. Going back to 2010 there have been eight auction sales of PCGS/CAC coins ranging from \$11,750 and \$21,738 to the average being \$15,298. There are just five coins graded higher, and we suspect that there is some duplication in the Population Report in MS65 in hopes of getting an even loftier grade. This exceptional quality GEM is worthy of a legendary collection!

\$5 1913 PCGS MS64 CAC

Sharply struck in deep orange gold with strong eye appeal. This coin is what \$5 Indians should look like and is fully deserving of CAC approval. A lovely example of Bela Lyon Pratt's incused Indian Head design.

PCGS 627, NGC 423, CAC 107. The last one to sell in auction bought \$2,530 in our September 2018 Premier Session sale. A great looking coin for the date or type collector.

\$5 1913 PCGS MS65

A real GEM Indian Head five! This coin is an example of how tough CAC is on gold! This coin is all there and then some with just a few tiny ticks that can be seen only with a strong glass, mostly confined to the dreaded right field above the eagle on the reverse. The luster is strong with a warm golden glow and rolling satin cartwheels. Deeply impressed incuse devices show full definition on both sides with all feather details fully delineated. The eye

appeal of this GEM is very high-end and pleasing.

PCGS 59, NGC 39. With just ONE coin graded finer at PCGS, this GEM is ideal for anyone looking to add a great coin to their set. The last non-CAC coin to sell brought \$7,050 in March 2017 and the current Collector's Universe value is listed at \$8,500. Remember how scarce this date is in GEM and how it is UNIQUE any finer at PCGS!

What a glorious near miss GEM! We can't stress enough how nice of a coin this is.

Extra nice surfaces are way above average. They are smooth and overall pretty clean. Even the dreaded right reverse field has just a few tiny ticks. A strong luster nicely shows off the original gold color. There are NO spots or discoloration's on any high points. Miss Liberty and all of the details are

frosty and very well struck. The eye appeal is beautiful!

PCGS 46, NGC 12, CAC 9. The last PCGS CAC piece to sell in auction brought \$16,450 in January 2018. The current PCGS Price Guide value is listed at \$15,000. Do not let the pops fool you, these are difficult coins to find as fresh looking and high-end as this piece!

LOT 419**\$5 1916-S PCGS MS64****CAC**

A handsome example of this San Francisco Mint Eagle; the only Mint to strike \$5 gold in this year.

Exceptional orange gold color gleams all over the boldly satiny lustrous surfaces. Some lightly scattered contact marks are all that separate this coin from a higher designation.

PCGS 103, NGC 61, CAC 24. The current PCGS Price Guide lists the value at \$7,850 and the last PCGS/CAC coin sold in our

September 2018 Regency Auction for \$8,225. This is a great coin for any advanced \$5 Indian set collector, as only 15 coins are graded finer and the last MS65 CAC coin sold for \$35,250 in 2015.

\$5 1929 PCGS MS64 CAC

The final of Bela Lyon Pratt's \$5 Indian series saw a mintage of 662,000 but the vast majority of those were turned in and melted down in the 1930s. A key date issue in all grades, it is quite rare in all Mint State grades, and anything MS63 or finer is a major find for the specialist collector. The first example of a 1929 half eagle to sell in auction was in 1936, numismatists even back then realized the importance of this date.

Medium gold color takes on accents of icy-blue and richer orange that come out when the luster blooms in a light.

Typical for the date, the incuse devices are boldly and deeply impressed--every detail is rendered to its finest and fullest advantage. A few scattered, tiny marks are generally hidden and do not detract from the impressive eye appeal.

The visual allure of this near-GEM is very high end!

PCGS 108, NGC 70, CAC 26. We sold the most recent PCGS/CAC coin for \$52,875 in our December 2016 Regency Auction. Prior to that, one sold in the 2015 FUN auction for \$54,050 and one sold in July 2013 for \$70,500.

The current Collectors Universe value is listed at \$55,000.

Just 22 coins have graded finer, none higher than MS65. This is a very important opportunity for the advanced half eagle collector. Do not let it slip away!

LOT 421

\$5 1908 PCGS PR66 CAC

This has got to be one of the FINEST PR66 1908 half eagles that exists, and the stunning eye appeal is of world class quality!

This is a wonderful example of the sandblast or matte proof finish. At the time of issue, these were not popular, as collectors were familiar with the brilliant mirror finish proofs struck up to 1907. With the new design, mint officials began experimenting with the sand blast finishes that were being produced in France, Britain, and Italy.

This is a totally original and beautiful example with exquisite, rich olive-gold surfaces. The sandblast finish left countless microscopic facets on the surfaces, that sparkle like tiny diamonds on the surfaces of both sides to captivate the viewer's eye. Needless to say, the eye appeal is spectacular and will delight any Proof gold collector.

The original mintage reported was 500 struck on November 25, 1908, of those, 167 were sold to collectors and delivered on December 30. The remaining coins were subsequently melted. In his new reference on Proof Gold coins, scholar and researcher John Dannreuther estimates that 80-100 survive in all grades.

PCGS 16, NGC 27, CAC 6. There are only two recent records for PCGS/CAC coins selling in auction. The first one was in the 2016 ANA auction, realizing \$88,125 and the other sold in the 2018 ANA auction for \$96,000. Clearly the Collectors Universe value needs updating as it is listed at \$74,500. Only four coins have graded finer, the finest being a single PR67+ which sold in July 2013 for \$152,750. This is an amazing and high end example that will be a great start to a collection of Matte Proof Indian Head half eagles and we know it will incite a fierce bidding war when it crosses the block!

LOT 422

\$10 1795 13 LEAVES. PCGS MS64+ CAC

Legend Rare Coin Auctions is proud and honored to present this marvel of early American numismatics! Among the **FINEST** Mint State 1795 eagles graded by either service, we believe this virtual GEM is either the third or fourth finest known, behind the Garret-Pogue (MS66+), Far East (MS65), and Eliasberg (MS65), and tied with the other MS64+ which is now impounded in the Bob Simpson Collection. The owner purchased this beautiful 1795 \$10 from a non-collector who inherited it as a family heirloom.

This is an incredible coin, struck from a later state of the BD-1 variety. Impeccably frosty, the fields have a stunning satin luster that glows with a remarkable brilliance from under a layer of thick, original "skin". We love when we see early gold pieces that have not been cleaned or conserved in an effort to achieve an even loftier grade from the services. There is some weakness of strike in the left rim and among the stars on the left side of the obverse, likely an effect of the die state, where there are some thin die cracks as described in the Bass-Dannreuther reference in Die State C, the terminal die state. Otherwise, the central design devices are very sharp and fully defined, courtesy of an exacting blow from the mint's screw press. A strong glass reveals some minor mint made die adjustment marks, as well as a few hidden lines and a tiny tick or two on the reverse. Regardless, these marks are totally acceptable for the assigned grade, and they do not have an impact of any kind on the SUPERB eye appeal. This is a very special coin for any advanced collector!

The April 12, 1792 act of Congress that established the United States Mint, called for three denominations to be struck in gold with the \$10 Eagle as the largest. The act required mint officials to post a surety bond before precious metal coinage could commence. Thus, only copper half cents and cents were struck in 1793; silver half dollars and dollars were struck in 1794; it was not until 1795 when the first \$5 and \$10 gold coins were minted.

The \$10 gold piece, or Eagle was designed by Robert Scot, and featured a bust of Liberty facing right, wearing a Phrygian cap (a symbol of freed slaves in ancient Roman times). The reverse has a small eagle holding a palm branch in his talons and a circular olive wreath is held in his beak. Only 5,083 examples were reported to have been struck, although early mint records show the number of each coin struck in the calendar year. Since die steel was hard to come by, dies were used until they could not be used any more, making it possible some additional 1795 Eagles were struck later on. In all, five die pairs were employed, four with the 13 Leaves reverse, and one with the rare 9 Leaves reverse. Today, approximately 500 are known in all grades per PCGS CoinFacts and the Bass-Dannreuther reference estimates 430 to 582 survive.

PCGS 2, NGC 3, CAC 1. Both PCGS coins are MS64+(the other coin is impounded in the Simpson Collection) and possibly only three coins are graded finer, including the Garrett-Pogue MS66+ and the Eliasberg MS65. No MS64 has sold in auction since July 2008. The 1795 Eagle has always been prized for its impressive look, as well as its place in the annals of U.S. numismatics dating back to the mid-1800s when American collecting began to become a popular hobby. While the majority of known examples are circulated, clustered in the XF and AU range, precious few have original surfaces (they have been cleaned, polished, scratched, tooled, or have some other conditional issues). There are a small number of lower Mint State coins graded, however, anything finer than MS62 is a major rarity. Today, high grade coins carry high six-figure to seven-figure prices. There has not been an MS64 graded by PCGS sold since May 2008 - that was nearly 11 years ago! The most recent example was the MS66+ Garrett-Pogue coin, which realized \$2,585,000 in September 2015. The Eliasberg coin was graded by NGC when it last sold in auction over five years ago (it has since crossed over to PCGS and has a current asking price of \$1,750,000). The current Collectors Universe value of \$800,000 is likely too low, especially since high-end GEM examples are so few and far between. We know a huge round of applause will break out when the hammer falls on this lot. Whoever ends up being the high bidder will bring home a truly spectacular coin! A centerpiece of this auction and a centerpiece of the advanced collection it graces next!

LOT 423

\$10 1797 LARGE EAGLE. PCGS AU58+ CAC

This is a GORGEOUS, totally original 18th century eagle. Everything about this coin is HIGH-END and it really is a borderline Mint State piece - in the old days, we do not doubt it would have been cataloged as Unc.

BD-2, considered to be R-4+ per the Bass-Dannreuther reference with an estimated 80-100 known in all grades.

Flashy, semi-Prooflike lustrous fields shine with a strong vibrance that brings out varying shades of yellow-gold with tinges of richer honey-orange and tangerine-amber. The obverse shows some bluntness of strike in the central portions and in some portions of the rim, while the reverse is fully impressed and embossed from a strong blow from the dies. Minor lines and ticks can be seen with a strong glass, however both sides are remarkably free of any deep adjustment marks that are often seen on early \$10s.

PCGS 32. NGC 55, CAC 4. This is the only PCGS AU58+. VERY RARE any finer, with most Mint State coins clustered in the MS61 and 62 levels. The only PCGS/CAC AU58 (no +) to ever sell in auction realized \$52,875 in July 2015 (Ex Douglas Kaselitz Collection). This coin realized the same amount as prior to being approved by CAC in July 2013. The current Collectors Universe value is listed at \$53,500.

While CAC has approved seven coins finer, NOTHING FINER than AU58 with CAC approval has ever sold in auction! Good luck!

LOT 424

\$10 1799 SMALL STARS OBVERSE. PCGS MS61 CAC

Mint State early U.S. tens are quite RARE as a type and since the 1799 is the "most common" 18th century date, many collectors choose to add this date to their type sets.

A very attractive BD-8 that has a vivid eye appeal. Distinctive semi-PL texture clings to the fields, particularly under the coppery red patina in the devices. The luster glows in the borders of the raised design devices. The devices are sharply impressed, the reverse particularly so, struck from a shattered die. Spidery die cracks can be seen throughout the peripheral lettering, particularly at MERICA.

John Dannreuther notes in the BD reference on early gold that perhaps 45-55 examples of this variety survive in all grades. This wonderful Mint State survivor likely ranks among the best of these.

PCGS 20, NGC 6, CAC 5. This coin realized \$39,950 in the 2016 ANA auction and the current Collectors Universe value is listed at \$35,500. We believe that there is definitely much duplication on the Population Reports in efforts to get these into higher grade holders. Like many other better gold coins, the number of attractively and originally toned examples is precious few with many having been dipped, stripped, and otherwise conserved in a hope to bring out a stronger luster and a higher numeric grade. This is a great example of what an original coin looks like.

\$10 1841 PCGS AU55

This is a very original and pleasing early No Motto \$10. A satiny luster under the olive-tan golden toning accents the sharply struck devices. There are a few lines and scuffs, but overall, the eye appeal is quite charming. The mintage of 63,131 makes this a scarce date in AU and finer grades. The twenty coins found on the S.S. Republic were easily absorbed into the market.

PCGS 14, NGC 38. The last one sold in an October 2016 internet auction for \$2,200 and the current PCGS value is listed at \$2,600. RARE any finer, PCGS has graded only 19 coins better than this AU55.

This is a really pleasing, CHOICE AU example of this early, No Motto \$10. Rich orange-gold patina adorns the totally original and ever-so-lightly worn surfaces. Scattered contact marks are noted with a powerful loupe, but they do not detract from the wonderful eye appeal.

PCGS 21, NGC 92, CAC 2. The only CAC-approved example to sell in auction was in August 2010, and realized \$1,265; the current Collectors Universe value is listed at \$1,425. Today, we can see this very pleasing coin selling for more. Good luck!

LOT 427
\$10 1854-O SMALL DATE. PCGS AU50 CAC

From an original mintage of just 52,000, the 54-O \$10 is very scarce in AU grades. Of the Large and Small date logotypes used, the Small Date is the scarcer of the two. Totally original and very handsome surfaces show off a delightful honey-olive gold color and well defined devices. Minor wear is noted, but the surfaces are devoid of any serious marks from circulation. The eye appeal is very high-end and the overall quality is well above average for the date.

PCGS 24, NGC 6, CAC 2. The most recent example to sell in auction realized \$4,800 in the 2018 ANA auction. This is a great coin worthy of a top collection of New Orleans mint eagles.

PCGS# 8614 | ESTIMATE: \$4,000+

LOT 428
\$10 1854-S PCGS AU55 CAC

This was the first year of issue at the new U.S. Mint in San Francisco and a respectable 123,826 Eagles were issued. The coins circulated heavily on the West Coast and relatively few survived in decent condition. The present coin is well struck in rose gold with the characteristic large 'S' mintmark. Surfaces exhibit relatively few contact marks and the mint luster is nearly intact. The mint focused on the larger gold coins and gold dollars, interestingly, the quarter eagle is a formidable classic rarity worth six figures, and the first 1854-S half eagle to sell since 1982 sold in the ANA auction for over \$2,000,000! This is a very important year in American numismatic history and this coin is a great representative!

PCGS 35, NGC 109, CAC 11. There is a wide range of APRs, but the current PCGS Price Guide lists the value at \$4,500. Only 95 coins have been graded higher, including 11 coins in Mint State, making the present coin one of the better coins available for purchase. A great coin for the set builder.

PCGS# 8615 | ESTIMATE: \$3,500+

\$10 1882-O PCGS AU58 CAC

While the mintage of 10,820 is low, it is among the more available dates of the 1880s from New Orleans BUT is truly scarce in properly graded AU58 as here. Doug Winter's new book on New Orleans gold estimates fewer than 10 are known in all Mint State grades.

This totally original AU58 is pleasing with rich, greenish accents on both sides, brought out by the underlying surviving luster. Moderately abraded surfaces have some friction and minor ticks

scattered about. None are singularly distracting anywhere and the eye appeal is very nice for an example of this date.

PCGS 12, NGC 43, CAC 6. No PCGS/CAC coin has ever sold in auction, but the most recent PCGS graded AU58 sold for \$7,050 in the 2017 ANA auction. More recently an NGC coin sold for \$6,013 in the 2019 FUN auction. Rare in any Mint State grade, the Admiral Collection had an OGH MS60 CAC that brought \$12,600 in February 2018. This coin has a lot to offer the specialist collector.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

LOT 430
\$10 1903 NGC PR64+ CAMEO CAC
 FROM THE PROSPECT COLLECTION

Wow! Break out the Ray bans! You will need them to view this incredibly reflective GEM Brilliant Proof \$10!

Deeply mirrored fields beam with a brilliant, bold and inspiring flash. The obverse fields are icy smooth, while the reverse has a very fine orange peel texture. Both sides' design elements retain ample frosting on the razor-sharp devices, a rarity among Proofs of this date. The eye appeal is stunning, unmarred by any marks or lines that are visible with the naked eye.

Only 96 Proofs were struck, using the same method as the 1902. The dies were heavily polished including the devices, which were not frosted like they were prior to 1901. Perhaps as many as a dozen early strikes had enough contrast between the devices and the fields to qualify as CAMEO designation. As such, very few of the estimated 50-60 survivors can be designated as Cameo.

This fact is borne out by the grading service Population Reports: PCGS has graded TWO in the Cameo designation, NGC five. The coin presented here is one of those extremely RARE examples; a true prize example of the caviar of numismatics.

PCGS 0, NGC 2, CAC 1. This is the only PR64+ CAM graded. There are no auction records for any CAMEO designated coin, regardless of grade, in the last dozen plus years. The only recent comparable is a PCGS PR65 CAC (not CAMEO) sold in March 2018 for \$40,800. In PR64+, Collectors Universe value is listed at \$25,000 (not CAM). This is a stupendous GEM Brilliant Proof eagle with major contrast that will be a prize for any specialist collector! Know that this coin will attract considerable bidding action when it crosses the block!

LOT 431**\$10 1908 NO MOTTO. PCGS MS65 CAC**

With a low mintage of 33,500, very few survive in such a high state of preservation. This beautiful GEM has great visual allure. Frosty surfaces show off a lovely satin sheen that accents both sides. Rich orange gold color bathes both sides. The devices are sharply impressed. There are a few tiny ticks seen with a glass, but these are generally hidden in the design details and do not detract from the excellent overall eye appeal.

PCGS 27, NGC 29, CAC 11.

The most recent PCGS/CAC coin to have sold in auction was in June 2016, where one brought \$15,276. Prior to that, there was one in the 2015 ANA auction at \$15,863. The current PCGS Price Guide lists the value at \$16,000 but keep in mind that a 66 will cost over \$35,000 if you can find one with CAC-approval. Bound for a GEM set!

LOT 432**\$10 1908-D NO MOTTO. PCGS MS64 CAC**

This is a VERY PLEASING and high-end example of this conditionally rare \$10 Indian. It is a myth that 08-D No Mottos come nice - they don't!

Bold satiny luster blooms on both sides with a thick, vibrant frost. The surfaces are satiny smooth with only the most insignificant ticks noted for accuracy. Medium, yellow gold with accents of olive and rose iridescent tones that are brought out by the luster. Sharply struck, both sides have full feather detail on the headdress and the eagle's wing.

PCGS 58, NGC 30, CAC 11. We sold one for \$15,863 in our January 2018 Regency Auction; another sold in February 2018 for \$18,800. The current Collector's Universe value is listed at \$16,000 and keep in mind how VERY RARE this date is any finer: PCGS has graded just 17 finer. A great coin for any \$10 Indian set.

\$10 1911-D PCGS MS64

One of the major condition rarities in this very challenging series. Only 30,100 eagles were struck in Denver in 1911 and like the \$2.50 and \$5 this is a KEY date. Most survivors are XF or lower grade AU, and any Mint State coin appearing in auction is an event for the specialist collector. In near-GEM quality it is a real trophy for an advanced collector.

Featuring the typical frosty surfaces that have a somewhat granular look, this sharply struck example has a great look. Original olive overtones grace the honey-wheat gold coloration on both sides, almost like a coin that spent years in an old collector envelope or overseas bank holding.

There are only a few tiny marks that account for the assigned grade, the eye appeal is very high-end for the date.

PCGS 19, NGC 11. CAC is very tough on this date, only 1 has met their tight standards. PCGS has graded just 3 coins finer, all MS65. The finest sold was the Kutasi MS65. "Hedgie" has the MS64 CAC (which we value at \$100,000).

Simpson and D.L. Hansen both have PCGS MS64 coins. The most recent MS64 sold for \$70,500 in April 2017 and the current Collectors Universe value is listed at \$85,000.

This is an opportunity of the utmost importance for the advanced collector to add an extremely important 20th century gold rarity to their holdings. We can see a very strong bid for this one!

PCGS# 8869 | ESTIMATE: \$62,500+

LOT 434**\$10 1913 PCGS MS66**

SUPERB! We are kind of shocked this coin did not bean at CAC. We think the culprit is a tiny tick well hidden in the hair.

Superior surfaces appear clean and satiny smooth. Only with a strong glass can you see an isolated frost break or two. The surface texture is thick and satiny. A full booming luster beams from all over. Both sides are a wonderful dreamy original gold color. There are no spots or stains. Every detail is frosty and is sharply struck. The eye appeal is terrific!

PCGS 18, NGC 11. The prices realized in auction are too all over for us to comment on them. We can say, the Collectors Universe Value is \$15,000. With only two graded higher, we think even the value is too low. After 30+ years, PCGS has graded only 16, and that is not many at all. There is little question as to why the Crow River collector originally chose this coin to place in his awesome record breaking set.

FROM THE PROSPECT COLLECTION.

A marvelous GEM Indian Head eagle. This is a conditionally RARE date any finer, making the MS65 grade perfect for most collectors. This coin is VERY HIGH-END for the grade with totally original, medium orange-gold color that is highlighted by a thick satiny mint frost. The devices are fully rendered by a precise blow from the dies, fully bringing out the full delineation to all the feathers. The surfaces are devoid of all but the most insignificant marks, visible with a strong glass only, and otherwise they are the epitome of satiny smooth! The eye appeal is fantastic, and this coin is housed in an early blue label PCGS holder.

PCGS 43, NGC 44, CAC 15. The last PCGS CAC coin to sell was in October 2015, realizing \$10,869; the one before that sold for \$17,625 in the 2014 FUN sale. Like most coins, there is a clear line in APRs for CAC and non-CAC coins. Keep in mind that a CAC MS66 will cost close to \$30,000! This is a great coin for any Indian Head eagle Registry Set. Be prepared for spirited bidding when this GEM crosses the block!

One look and you'll agree this coin is the real deal--a truly SUPERB GEM 1914 \$10! The "wow factor" is way off the charts!

Highly lustrous, this amazing Indian Head eagle has impeccable surfaces that are beyond anything you typically see, even for an MS66+. We cannot find any problems of any size, anywhere, and that does include using a strong glass and looking all over. A full luster really makes this coin stand out and both sides enjoy a totally original patina of deeper, original orange-gold color with a blush of pinkish gold. There are NO spots of any size or the slightest hint of any discoloration. Miss Liberty and every detail are fully struck and do standout. The eye appeal is fabulous plus!

PCGS 12, NGC 9, CAC 10. PCGS has graded six in MS66+. We sold the two most recent examples, one realizing \$36,425 in our October 2017 sale of the Crow River Collection, and the other one in our November 2018 Regency Auction for \$38,775. The current PCGS Price Guide value is listed at \$42,500 and keep in mind that only three coins are graded finer, all MS67 and NONE have CAC approval. LOT 437**\$10 1914-D PCGS MS64+**

Satiny, vibrant mint luster glows on brilliant, golden surfaces. The light yellow gold with touches of rose iridescence is visually very alluring. We note only a few microscopic ticks that keep this from a GEM grade.

PCGS 29, NGC 6. Very scarce finer. The current PCGS Price Guide lists a \$5,500 value in 64+ and the most recent brought \$3,360. A really nice example for the grade and bound for a gold type or date set of Indian \$10s.

LOT 438
\$10 1930-S PCGS MS64+ CAC

One of the RAREST dates of the series. A combination of lower mintage (96,000) and mass meltings later in the decade, make this a very tough date for collectors in any grade. Interestingly, there is a cluster of examples graded MS64, which makes us believe that there have been a number of resubmissions of the same coin in hopes of getting a "+" or a 65 grade.

This is a PQ 64+ truly deserving of its + status and CAC approval. Rich, frosty satin luster glows and gleams all over with a velvety texture on both sides. The golden color is thick and original with deeper honey hues in the reverse fields. Intense examination with a powerful loupe reveals a tiny tick or two, but none are individually distracting to the eye. Indeed, this coin is extremely eye appealing and has a really bold look.

PCGS 44, NGC 25, CAC 8. There are 6 listed as MS64+ on the PCGS Population Report, none of which have ever sold in auction. A regular (non +) PCGS MS64 CAC sold in the 2019 FUN auction for \$72,000. Prior to that a non-CAC example sold for \$70,500 in March 2014. The current PCGS Price Guide value is listed at \$82,500 and in MS65 the value jumps to \$100,000. A great coin for anyone working on a set of Indian Head eagles.

\$10 1932 PCGS MS64+ CAC

This is a very pleasing superb piece.

Overall the surfaces are super clean, and show only a scattered light scuff or two (NONE are serious or stand out as this date can come really whacked up). The surfaces have a very thick satiny texture. The luster is very good. Both sides are a deeper gold color. There are NO spots or discolorations. Miss Liberty and the details are fully struck. The eye appeal is fine.

PCGS 11471, NGC 12300, CAC 1064. PCGS has graded 576 in MS64+. The current Collector's Universe value is \$1,375. Great for a type set or any holding of gold coins.

\$20 1856-S PCGS AU53 EX S.S. CENTRAL AMERICA

17J, Split Serif variety as noted on the original gold foil insert from the first round of S.S.C.A. recovered gold coins.

Very high end for the assigned grade, there is just the slightest hint of friction on the highly lustrous surfaces. There is a bold luster that still survives in the fields and has a distinctive reflective texture that you just do not often see on a no motto double eagle in 53. There is some shipwreck residue on the reverse, showing how mildly conserved these were when they were brought up off the ocean floor. There are a few minor marks, but they are as expected for a mildly circulated early double eagle.

PCGS 288, NGC 192. As a shipwreck coin, the market value exceeds that of the PCGS price, the most recent APR we can find for an ex S.S.C.A. AU53 was in June 2015, where one sold for \$4,700. Very much worthy of any collection of double eagles or a specialized collection of shipwreck gold coins. What a neat and historic relic!

20A, Spiked Shield variety as noted on the original gold foil insert from the original recovery of coins from the wreck

This is a highly lustrous, near GEM example. Having a rich orange-gold color that comes to life with the radiating, glowing, incandescent luster. The strike is razor sharp, and the eye appeal is not marred by the few tiny ticks that can be seen. You might imagine that a coin that sank to the bottom of the ocean would have been much more hacked up. This one is not and the look is great!

PCGS 1087, NGC 103 in all designations. The last one sold for \$8,700 and it did not have the exceptional eye appeal of this one. The current PCGS value is listed at \$10,500. A great coin for any holding of double eagles or shipwreck gold.

A fantastic GEM example from the first group of coins recovered from this famed shipwreck. Brilliant, shimmering luster blooms all over with a bold cartwheel effect and a rich satiny texture in the fields. The devices are very sharply struck up on both sides. As expected for the grade, there are only the most insignificant marks or ticks noted.

with the aid of a strong glass. Both sides have a wonderful two tone orange-gold look, typical of most coins from the first salvaged offering. Housed in the original gold foil holder.

PCGS 1047, NGC 65. These have sold in the general \$11,000-\$14,000 range and the current PCGS value is listed at \$15,500. These historic relics are impressive and represent a great opportunity to add a piece of numismatic history to your collection. With renewed interest in the S.S. No question this is a stone original AU58, the definition of a super slider. We fully agree with the AU58+ designation. This coin has lightly abraded surfaces. The ticks are tiny, are widely scattered, and have no effect on the coin's grade. There is a surprisingly strong luster. Both sides are a deep original olive-gold with some very light "dirty toning" scattered all over. It is interesting that when using a strong glass, we find NO rub or lines of wear. In that respect, the

coin is super clean. Miss Liberty and the details are really well struck. The eye appeal is very original and pleasing!

PCGS 66, NGC 132, CAC 34. There are 3 graded 58+ at PCGS.CAC has only 7 coins beamed higher. Our sister firm sold another one for \$9,000. This was the coin out of the ANA Stack's sale that brought \$7,800. Good luck on finding any Mint State PCGS CAC piece.

Conditionally VERY RARE in such lofty Mint State grades. Common enough in MS62+, this date becomes scarce in MS63 and downright RARE in MS64 and is UNIQUE in GEM. This visually impressive coin looks like a generic in MS64 with a full, frosty luster. The surfaces are smooth and pleasingly clean and free of any distracting marks, lines, or spotting. The devices are sharply struck and have a nice smooth texture to them. Visually very alluring and exceptionally high-end quality.

PCGS 11, NGC 3, CAC 3. There has not been a PCGS/CAC coin sold in auction since August 2013 when one sold for \$41,125. The current PCGS value is listed at \$35,000 and that is because of a couple of non-CAC coins that have sold for less. With just a single MS65+ finer at PCGS, this is a very important opportunity for anyone building a world class set of \$20 Libs. Bound to see fierce bidding!

FROM THE PROSPECT COLLECTION

What a great looking GEM. Really, if this was a 1904, it would likely have graded MS65. We make no guarantees that it will ever upgrade, but it is VERY HIGH-END! This coin, while considered a generic date in MS64 and lower, it is EXCESSIVELY RARE in MS65, with just seven coins graded finer at PCGS. This is a highly frosted and satiny lustrous beauty. Just a few tiny, insignificant traces of contact are noted under a strong glass, but none of these are singularly distracting to the naked eye. The devices are razor sharp in definition, adding to the amazing eye appeal of this stunning 64+!

PCGS 506, NGC 599, CAC 67. PCGS has graded 41 in MS64+ and only seven coins finer. Clearly there is duplication of the same coin being submitted multiple times in hopes of getting an MS65 grade. Nine PCGS MS64+ CAC coins have sold in auction between November 2012 and November 2018, realizing an average APR of \$4,139 and the current Collectors Universe value is listed at \$4,000. Keeping in mind that the CU value in 65 is \$20,000, this coin presents a great look and value!

Very high-end and virtually GEM quality. Fully brilliant and exceptionally satiny, this lovely 64+ has a very strong eye appeal. Ms. Liberty, the eagle, and all the details are fully struck up. A microscopic scuff or two keep this coin out of a finer grade holder. The color and eye appeal are both fantastic!

PCGS 259, NGC 173, CAC 34. There are 20 coins graded MS64+ with only 10 finer at PCGS. The two most recent PCGS/CAC examples to sell realized \$5,170, the most recent in our January 2018 Regency Auction and the current PCGS price is \$5,350. A very attractive example of this conditionally very rare date. While the mintage of 1,403,925 suggests a generic date, in MS64 this date is scarce, and is extremely rare any finer. Radiating satin luster blooms on both sides. The surfaces are generally smooth and free from any sizable marks or lines, nor can we find any copper spots. The eye appeal is very high end.

PCGS 187, NGC 176, CAC 13. Only seven coins are graded higher, so we feel that a good number in 64 may be resubmissions. This coin does have a previous auction record of \$4,888 in July 2011. The current PCGS Price Guide value is listed at \$3,950. A very desirable Type 3 Twenty for the date collector, and a coin that will see spirited bidding from specialist collectors and generalist gold bugs alike.

Well struck with satiny luster as is typical of this late date Liberty Head Double Eagle. Truly original pale orange and rose gold dominates. The luster is substantial, as one would expect of a coin at this grade level.

PCGS 1,522, NGC 1,175, CAC 191. PCGS Price Guide value \$2,300. In the past year, auction prices for CAC coins ranged from \$1,920 to \$2,880. The present coin should place solidly in the middle of that range.

There are NO spots or other issues. Miss Liberty and the details are well struck and we grade the reverse a full GEM. The eye appeal is excellent!

Much scarcer than the 1904, and selling for nearly zero premium over that, this 1900 double eagle would make a nice addition to any holding of U.S. gold coins.

\$20 1898-S PCGS MS65 CAC

This is a seriously underrated and conditionally RARE date. Despite a large mintage of over 2.5 million, very few were saved at the time of issue, and most that survive in Mint State came from European holdings that were repatriated. While common in Mint State grades up to MS64, these are conditionally RARE in MS65, exceedingly so any finer.

A satiny vibrance on both sides accents truly original surfaces. Attractive orange and yellow gold coloration is brought out by a bold luster. The devices are sharply struck and frosty and the eye appeal is great, housed in an older blue label holder. Premium Quality as denoted by the CAC bean.

PCGS 117, NGC 105, CAC 14. First we think that there is some duplication in the PCGS and NGC figures, hoping for higher grades. Only three coins have graded finer, 2 in 65+ and a monster 67. There have been three PCGS MS65s with CAC approval that have sold in auction, the most recent one in September 2017 for \$9,000; there hadn't been one prior since 2011. The last non-CAC 65 sold for \$7,800. This is a coin worthy of inclusion of an important collection of double eagles.

Luster blazes all over on this satiny lustrous GEM! Deep yellow gold and original surfaces have a strong brilliance. Devoid of any serious marks or copper spots that are often seen on these large gold coins. Considered the most common date of the series, as a percentage of the 6 million mintage, relatively few survive in this lofty condition.

PCGS 5406, NGC 6776, CAC 460. Here is a great example of how strong the CAC premium is. The most recent PCGS/CAC MS65 sold in February 2019 for \$3,960; prior to that, one sold in our June 2018 Premier Session for \$4,180. If you are a gold bug, this is a great coin to add to your holdings.

\$20 1907 HIGH RELIEF, WIRE RIM. PCGS MS64 CAC

This coin gives the term "Wire Rim" a totally new meaning! The upper left obverse has an especially high wire, that is about 1mm above the edge from 9:00 to 11:00. Very rare with a high fin like this, as over the years it would have either been dinged up badly, or worse, filed down. This fin has clearly saved this nearly GEM caliber coin from any serious contact on the obverse. The devices are exceptionally crisp, fully rendered by a dramatically exacting strike (actually several strikes, as it took about four blows from the dies to bring up the high relief details). The luster is wonderfully complete with a great satin texture and very pleasing, original orange-rose gold patina. The initial look is that of a higher grade, but we do note a tiny mark on the high wire fin at 10:00 and a couple of other microscopic ticks. The visual allure is truly seductive, and this is an inspired example of this most beautiful U.S. type coin!

PCGS 1066, NGC 362, CAC 151. The most recent PCGS MS64 to sell in auction realized \$31,200 in February 2019; prior to that, a PCGS MS64 CAC sold for \$28,000 in a September 2018 online only auction. The current Collectors Universe value is \$28,500 and keep in mind that a PCGS

MS65 CAC will cost \$50,000 or more! This is a perfect coin for a well chosen gold type set or a great coin to start off a set of \$20 Saints. This is a grand opportunity for any collector that should not be taken for granted.

PCGS# 9135 | ESTIMATE: \$26,000+

LOT 454**\$20 1907 HIGH RELIEF, FLAT RIM PCGS MS66**

A SUPERB, truly beautiful High Relief. Gorgeous, medium honey gold surfaces display a very seductive mint bloom. Under close inspection, only the most minute marks are detected, but you do need a powerful loupe to find them, thus they don't detract from the overall appeal of this splendid GEM. While intended for circulation, a large number of these were saved for their unique high relief quality, and there is a large cluster of examples certified as MS62 to MS64. Scarce in GEM, and RARE in such lofty grades of MS66 or finer.

This beautifully designed coin is arguably the most artistic and beautiful to ever appear on a coin struck for general circulation. The story of the High Relief begins in 1905 when President Roosevelt lamented the drab designs on circulating coins. After viewing the high relief on ancient Greek coins and observing the beautiful designs, he contacted his friend, world renowned sculptor Augustus St. Gaudens to redesign all the coins, from the cent to the double eagle. After about 24 experimental strikings of the Ultra High Relief, which proved unruly to strike in mass quantities, the reliefs were lowered, and the High Relief as we know it today was struck to the tune of 11,250 pieces, divided between the flat rim and wire rim variants. Augustus St. Gaudens died of stomach cancer before he was able to see any example struck in its intended metal.

PCGS 54, NGC 59. The most recent example to sell in auction was in our May 2018 Regency Auction for \$61,688, and prior to that, one sold for \$66,000 in February 2018. The current Collectors Universe value is listed at \$70,000, and keep in mind that only 13 coins are graded finer with the most recent MS67 selling for \$228,000. What a fabulous coin to start your collection of Saints, or just a really sexy coin to add to your "box of 20."

A very low mintage issue, with 52,000 originally struck, the 09-D is the lowest mintage Denver mint for the entire series. Most Mint State examples known come from overseas bank sources such as Switzerland, France, and El Salvador. Very scarce in Mint State grades, most grade MS64 and lower. In MS65 this coin is VERY RARE.

This high-end near-GEM is well struck, offering a satiny golden luster that has bold frost in the fields. Pleasing honey/wheat gold coloration with lighter yellow-gold accents seen in areas. The surfaces are very clean for the assigned grade, free of any contact anywhere and they are also totally unmolested from conservation or other problems. This near-GEM is very high-end and has a great visual appeal for the grade!

PCGS 168, NGC 74, CAC 13. This coin was last sold in March 2013 (hard to believe that is 6 years ago already!) for \$11,457. The average APR for a PCGS/CAC coin is over \$12,000, well above the current PCGS value of \$8,000. Keep in mind that any PCGS MS65 (NONE ARE CAC approved) will cost \$25,000+, so this is a great opportunity for the CAC-dedicated collector to add an example of this date without having to spend \$70,000-\$80,000 for a MS66! PCGS 530, NGC 386, CAC 64. Listed in the PCGS price guide at \$3,600 but since less than 7% of MS64 graded coins have been CAC approved, there is a large premium for CAC coins; the last auction record for a PCGS/CAC coin was \$4,819 in our September 2018 Regency Auction and the one before that brought \$5,287 in March 2017. This near GEM has a wonderful, original honey gold and rich tangerine-orange color with a warm frosty luster that accents the sharply struck devices. Minimally abraded surfaces have the look of having spent years in an old European bank holding.

There used to be a better premium for these "better than generic" more common double eagles. What a great addition to any gold holding. We have handled some of the best \$20 Saints out there, and the 1915 is a very difficult date to find in GEM Mint State. Looking at our auction records, we have handled just four others previously that have made the cut. The present GEM is a real beauty.

Brilliant golden luster rolls forcefully on both sides with a strong cartwheel effect. The surfaces have a thick, rich, satin finish that is enhanced by a glowing orange-gold tone. The surfaces have a delicate "pebbled" look to them, typical of what we have seen on others on the obverse. There are a few very trivial micro-spots on the obverse hidden in the details. Regardless, the eye appeal is amazing and this date is VERY RARE any finer.

PCGS 51, NGC 38. The two most recent examples to sell were CAC-approved, one, a PCGS coin sold for \$33,600 in April 2018 and a month later an NGC-graded coin sold for \$35,000. LOT 466**\$20 1915-S PCGS MS65+ CAC**

While in today's market, the 15-S is considered a "generic" date, it used to carry a small premium and was considered to be a middle tier coin, not common, but not a semi-key or key date either.

This is a wonderfully toned GEM with a warm satin glow. Pleasing orange gold patina blends with lighter yellow-gold hues. Sharply struck, the surfaces show just a few tiny ticks, nothing that can be seen without the aid of a strong glass. A very eye appealing example for sure.

PCGS 2338, NGC 1714, CAC 154. There are 54 graded in MS65+ at PCGS, and this date is quite scarce any finer. The most recent PCGS/CAC example to sell in auction realized \$3,360 in the 2018 ANA auction; prior to that, the last one sold in July 2016 for \$3,174. The current Collectors Universe value is listed at \$3,300. Keep in mind a PCGS/CAC MS66 last sold for \$9,900. This represents a great coin for the collector, worthy of a strong bid.

LOT 467
\$20 1920 PCGS MS64 CAC

The 1920 double eagle is a MAJOR condition rarity in the series. While somewhat scarce in MS64, there are just two in MS65 at PCGS, so we suspect that there must be a lot of resubmissions in the MS64 and MS64+ grades.

This is not your typical lifeless, dull MS64! This is a really choice and original example with great orange-gold patina over highly lustrous surfaces. Well struck and very clean. The eye appeal is amazing for one of these!

PCGS 1040, NGC 411, CAC 87. The most recent PCGS/CAC coin to sell realized \$4,290 in our March 2018 Premier Session sale and we sold one in our February 2018 Premier Session for \$4,620. The current PCGS Price Guide value is listed at \$5,250 and keep in mind that anything finer will be significantly more expensive; PCGS/CAC MS64+s selling in the \$8,700 to \$10,800 range and remember that the last MS65 sold in our Regency Auction 25 (January 2018) for \$188,000! This impressive very CHOICE 1920 double eagle will be a welcome addition to your set!

\$20 1922 PCGS MS65+ CAC

A high end, pleasing GEM that is EXCESSIVELY RARE any finer! Medium orange gold with deeper reddish accents are seen when this lustrous beauty is rotated in a light. Sharply struck, and devoid of any serious bag marks or other signs of significant contact. The eye appeal is high-end!

PCGS 1602, NGC 524, CAC 29. PCGS has graded 40 in MS65+ and just 8 in MS66 finer. The last CAC-approved coin to sell in auction was in April 2017, which realized \$12,925. Keep in mind a PCGS/CAC MS66 (if you can find one) will cost over \$38,000! This beautiful

GEM presents an awesome opportunity for the advanced collector.

\$20 1922-S PCGS MS64+ CAC

Nearly full GEM MS65 quality. Prices would be sky high if all 22-S \$20's in MS64 could look this awesome.

Both sides have marvelous surfaces that offer an ultra thick, frosty, satin luster. The surfaces appear clean-although if you use a strong glass you will find some pinpoint ticks scattered around. The surfaces have stunning original yellow gold color. There are NO discolorations or spots. Miss Liberty and the details are nicely struck with full definition. The eye appeal is fantastic!

PCGS 437, NGC 35, CAC 42. PCGS has graded 54 in MS64+. The last PCGS/CAC example to sell in auction realized \$8,813 in the 2017 ANA auction; prior to that we sold one in our September 2016 Regency Auction for \$12,338. It should be noted in FULL PCGS MS65 a piece would cost about \$50,000-if you can even find one! Bound for a high end set of Saints; we expect strong bidding here-good luck!

LOT 470**\$20 1924 PCGS MS65+ CAC**

What a HIGH END example, we have seen coins graded MS66 that do not look this nice! A strong luster and bold two tone gold look stands out with a vibrant mint brilliance. Sharply struck devices and smooth, defect free fields are very attractive.

The last PCGS/CAC example realized \$1,870 in our December 2018 Premier Session auction, and clearly this coin is deserving of a premium bid! Prior to that, recent examples have sold for as much as \$2,400. A delight for any gold bug!

**LOT 471****\$20 1924-S PCGS****MS64 CAC**

FROM THE
PROSPECT
COLLECTION

Legend Rare Coin Auctions is proud to offer this KEY DATE Saint. Prior to the 1950s when a small grouping was found in Europe, the 1924-S was considered one of the RAREST dates in the series with about a half dozen thought to exist, despite a mintage of over 2.9 million.

If you look at the famed collections of the 1940s like Dunham, Bell, Flanagan, Atwater, and World's Greatest Collections, all were missing a 24-S. By the mid-1960s, a hundred or so examples came out of European holdings. Today, the date is still a KEY issue; PCGS CoinFacts estimates 700 Mint State coins survive in all grades, mostly MS60-MS63. It is indeed quite RARE in MS64 and excessively so in GEM grades. The vast majority were stored in Treasury vaults and melted in the late 1930s under FDR's gold recall order.

The presently offered coin is a real prize and truly of high-end quality for the grade! Indeed, the initial eye appeal is that of a GEM. It is beautifully lustrous with boldly rolling cartwheels that enliven the two-tone golden coloration on both sides. The surfaces have rich orange-gold that blends to yellow-gold and hints of rose-gold. Typical for the date, there is some weakness in strike, most notably on the Capitol Dome, the torch, and Liberty's wind-blown tresses. You can look for hours at this impressive near-GEM with a powerful glass, and see nothing but the tiniest trace amount of minor contact. The eye appeal is truly spectacular for the grade, and this coin is wonderfully original and ultra-high end for the grade; certainly one of the nicest examples this cataloger has seen in a very long time!

PCGS 116, NGC 117, CAC 23. With just 20 coins graded finer at PCGS, we are certain that the MS64 population includes at least some duplication. We cannot trace this particular coin to any auction, but the most recent PCGS/CAC coin sold in auction for \$25,850 in October 2016. Prior to that, these were generally selling in the \$16,500-\$21,000 range. We sold two different MS64+ PCGS/CAC and a non-CAC example in the last four years, all realizing between \$37,000 and \$45,000; the presently offered coin has a truly spectacular look that we would rank close to those. A PCGS/CAC MS65 is a \$150,000+ rarity, so this is one of the best coins you will see. If you are working on a set of Saints, you need to bid on this beauty!

\$20 1926 TDO, FS-101. PCGS MS66+ CAC

Tied for SECOND FINEST for the DATE, and tied for FINEST of the Tripled Die obverse variety. Roger Burdette estimates that about 10% of all 1926 \$20s are of the tripled die obverse variety. The tripling is most evident around the date and the ASG monogram.

Extremely lustrous possessing a blazing golden glow with a bold vibrance throughout. In addition, there are brilliant, swirling cartwheels that smoothly roll over the extremely clean surfaces. The devices are sharply struck with full definition throughout. The eye appeal is gorgeous!

For the variety: PCGS 17, NGC 5. There are only 2 in 66+ with NONE FINER. For the date: PCGS 910, NGC 439, CAC 70. There are 27 in MS66+ for the date, with only five in MS67 finer. The last MS66+ CAC to sell in auction realized \$7,931 back in February 2014.

No MS66+ TDO has ever sold in auction. This SUPERB GEM is worthy of an advanced collection of double eagles and should see very active bidding for sure!

**LOT 476****25C 1893 ISABELLA. PCGS MS67+ CAC**

Without any hesitation, we label this remarkable piece a full blown MONSTER! It really does border on full MS68 quality.

The surfaces are pristine-even when using a strong glass. Typically, these do come hacked up and really drab. A strong luster glows from all over. Mother Nature summoned all her helpers and created one MONSTER TONED color scheme here. We consider the colors to be a 10 of Northern Lights quality (the wild dollars we sold two years ago). Both sides are deep but electric blue/green/deep violet/tangerine that open into smaller soft white centers. Every single detail is so stuck up and stands out so bold you do not need a glass to see any of the details. The eye appeal is just jaw dropping crazy!

PCGS 49, NGC 53, CAC 33. PCGS has graded only 7 in MS67+. We feel there are few other MS67+ that can compare. With that in mind and knowing the last MS68 sold for \$47,000 in 2014, we KNOW this piece will bring really strong money-maybe even a record price! Be prepared! Using this piece to start a full Commem or Type set will only add value as every time you see it, you will say WOW!

**LOT 477****50C 1937-D ARKANSAS. PCGS MS67+ CAC**

Among the FINEST graded survivors of a low 5,005 mintage, there are only two are graded finer at PCGS.

The surfaces are SUPERB in terms of technical and aesthetic qualities. Frosty satin luster blooms with a strong brilliance. Delicate toning traces its way around the rims on both sides adding to the spectacular visual allure.

PCGS 40, NGC 17, CAC 21. There are 7 graded in MS67+ with just two coins in MS68 finer. The current Collector's Universe value is listed at \$4,500 and the only PCGS/CAC example sold in the 2014 FUN sale for \$4,113. Keep in mind that the last MS68 sold for nearly \$26,000 in February 2016. 50C 1938 BOONE. PCGS MS67+ CAC

A simply SUPERB Boone that is bested by just a single coin at PCGS. Satiny smooth surfaces have a bold, flawless frosty luster. Sharply struck and very high end in terms of technical and visual quality. Untoned except for a touch of the slightest toning at the rim. A very scarce issue, with just 2,100 originally distributed and excessively RARE so fine!

PCGS 48, NGC 7, CAC 16. Only 7 coins are graded 67+ with a single MS68+ graded finer. The most recent MS67+ sold in June 2014 for \$4,994; prior to that, one sold in August 2013 for \$9,635. The current PCGS Price Guide value is listed

Here is a wonderfully original GEM that borders on SUPERB quality. A low mintage issue, with just 5,005 struck, and very few surviving in such a pristine state of preservation. Frosty mint luster gleams in the fields, enlivening the smooth surfaces and richness of the rim toning.

PCGS 180, NGC 77, CAC 58. PCGS has graded 16 in 66+. The most recently sold example sold in June 2017 for \$1,293 and there was one that sold in the 2015 FUN auction for \$2,820. The current PCGS Price Guide value is listed at \$1,650. There are 22 graded finer, none higher than 67+. Bound for a great set of classic commems.

**LOT 482****50C 1928 HAWAIIAN. PCGS MS66**

One of the KEY issues in the Classic Commemorative type set, the 1928 Hawaiian half dollar had a net mintage of 9,958 and this Premium GEM has a bold visual allure. Totally original, with a delicate pearly iridescent dusting with a strong, mint brilliance. Sharply struck and wonderfully preserved, there are some only minor toning flecks seen on the reverse. The eye appeal is strong for a date that usually has a thick yellow toning from humid storage at the Bank of Hawaii. This is a high end and clean example that will delight any commemorative collector.

PCGS 110, NGC 65. The most recent non-CAC coin sold for \$5,050 in an August 2018 internet auction. The current PCGS Price Guide value is listed at \$5,500. VERY RARE any finer, this is a great coin for any commemorative set.

**LOT 483****50C 1936 LONG ISLAND. PCGS MS67 CAC**

Long Island halves were distributed in cardboard holders, and when left unmolested for long periods, the coins that remained in these old holders obtained beautiful multicolored toning.

This impressive SUPERB GEM is from our September 2015 Regency Auction, where we described it as:

"Deep iridescent rainbow toning with exceptional swaths of green, lemon, and crimson around both sides! The toning is far and away richer than usually encountered and this coin does not have the tab outline that often interrupts the rainbow flow. Quality, color, and grade, all the factors that combine to make this one exceptional."

PCGS 85, NGC 56, CAC 70. There are only 13 coins graded finer at PCGS, all MS67+. This SUPERB GEM sold for \$2,938 in the above cited sale. Since then we have sold one in December 2015 for \$3,760 and one in June 2017 for \$3,600. This beauty should realize a price around that level! Bound for a special set of classic commemoratives!

This is not your typical dull, lackluster Missouri! Sharply struck devices stand out with the aid of highly frosted fields. A light dusting of golden-tan and olive-gold toning graces the surfaces of both the obverse and reverse and when rolled in a light, traces of delicate powder blue and lilac come out in the devices. The surfaces are especially clean and very attractive - this coin is **PQ!**

PCGS 52, NGC 38, CAC 14.

Just three coins, all graded MS66+ are graded finer at PCGS! The last PCGS/CAC MS66 sold in auction back in September 2015 for \$5,640 and prior to that one sold in October 2014 for \$8,225 and \$10,350 in July 2009. The current Collectors Universe value of \$5,500 is too low for a CAC coin, and keep in mind that the sole CAC-approved 66+ sold for \$70,500 in October 2015! This is a real prize for the advanced Registry Set collector and this is bound for a very high end set!

50C 1935-S TEXAS. PCGS MS67+ CAC

Among the top examples graded at PCGS, this gorgeous SUPERB GEM is totally worthy of the lofty grade assigned by PCGS. Stunning golden toning on the obverse has traces of olive and pleasing pinkish-rose at the rims. Frosty luster gleams all over the sharply struck devices and smooth, flawless surfaces. The eye appeal is amazing.

PCGS 140, NGC 94, CAC 86. PCGS has graded 13 in MS67+ with just 2 finer. There are 7 price records in 67+ graded by PCGS/CAC, the average price is \$2,819, with the typical example selling in the \$1,700-\$2,200 range, and the current Collector's Universe value is listed at \$2,000. Keep in mind any of the 68s, will cost well into the five figures, and none have appeared in auction for nearly four years, each likely impounded in important collections, so this may be the finest available to advanced collectors. Worthy of a high end set for sure.

LOT 487

50C 1926 SESQUICENTENNIAL. PCGS MS65+ CAC

A beautifully toned GEM example of this popular and important condition rarity in the classic commemorative series. While 141,120 pieces were struck, they do not survive in great quantity in MS65 or finer grades.

Even fewer have killer original toning. Lustrous surfaces are smooth and defect free. A wealth of golden-russet, lavender-pewter, and olive-tan color is brought out by the satiny mint luster. For a type that normally comes pancake flat and without any sort of strong eye appeal, this example is a very happy exception!

PCGS 393, NGC 291, CAC 94. In MS65+, PCGS has graded 20 pieces, the most recent of which sold for \$3,000 in the 2019 FUN auction and one sold for \$3,525 in our July 2018 Regency Auction. Prior to that one sold for \$7,500 in April 2018. The current PCGS Price Guide value is \$4,500. Only a dozen examples are graded finer at PCGS, all MS66. We sold a CAC approved example for \$22,325 in our December 2017 Regency Auction. This one will see considerable bidding when it crosses the block, the eye appeal is SUPERB!

PCGS 0, NGC 9, CAC 2. There was only one example in PL we can trace, selling for \$2,820 in a December 2018 auction and it was NOT CAC approved. This is a really neat coin that has a high end and unique look for sure!

G\$1 1903 LA PURCHASE, MCKINLEY. PCGS MS66 CAC
 Totally original and very pleasing! Satiny lustrous surfaces have a beautiful honey orange gold at the rims, lightening to a lighter gold hue in the centers. Die polish noted on the obverse and a small die crack at the lower reverse give this coin its character.

PCGS 509, NGC 342, CAC 171. The PCGS Price Guide lists the value as \$1,300. The most recent PCGS CAC coin to sell at auction realized \$1,195 in December 2018, however a pair of CAC stickered coins were auctioned for \$1,920 in April 2018. In our opinion, the quality and appeal of this coin are likely to prove the PCGS price to be conservative.

OUR ESTIMATES

The estimates you see published in this catalog are based on **HAMMER**. Keep in mind that a coin could be either low or high end for the grade, have stunning color or be dull, all of which radically affect a coin's value. Yes, there can be huge price differences within a grade, and we offer estimates as a guide so Collector's can have a better idea of value. One thing we will never do is offer low ball estimates in order to claim stronger sales.

These published estimates represent what Legend Rare Coin Auctions determines to be an approximate high wholesale value for the coin. The numbers are based upon current market values, similar trades, auction prices, published prices, and a consideration of the coin's quality. There is no guarantee that the estimated prices are minimums or are exactly what you can expect to get if you attempt to resell them wholesale.

We always advise you to view the coins you are interested in and calculate what you'll pay using as much information as possible. If you have any questions, please feel free to ask us. We are here to help you!

\$50 1915-S PANAMA-PACIFIC. ROUND. PCGS MS65 CAC

We LOVE these huge coins and we can never get enough of them. When they are really GEM's and are fairly priced you absolutely need to buy them!

We consider this coin to be a very high end and exceptional GEM! Looking at this coin over and over we see ZERO imperfections of any size, anywhere. The surfaces possess all that wonderful "Pan Pac texture". The luster is bold and shows off the even and totally original gold color. There are NO spots or stains anywhere. All of the details are clean and are fully struck. The eye appeal is just gorgeous!

One of the lowest mintage coins in all of American Numismatics, only 483 were released, as few collectors were willing to pay \$100 for them at the time of issue.

PCGS 25, NGC 54, CAC 19. The last one to sell in auction brought \$188,000 in the 2017 FUN auction; indeed that was the ONLY regular MS65 with CAC approval to ever sell. We sold the only MS65+ CAC for \$205,625 in our October 2015 Regency Auction. Even a NON CAC PCGS coin sold for \$174,000 in the August 2018 ANA auction. These are actually one of the few types of coins that have had a steady upward value trend for decades. The popularity for TRUE GEM pieces has always been off the charts and is still strong today! Legend Rare Coin Auctions is pleased to offer one of the biggest and coolest coins ever minted. You really feel the value with one of these!

R-5 (31-75 minted). A Capped Head of Liberty with 3 stars, Standard Silver reverse. Struck in silver with a reeded edge.

Sharply struck up on both sides, this GEM is dusted with beautiful iridescent blue, peach-gold over watery mirrored fields.

PCGS 1, NGC 5. Prior to this GEM selling in our August 2018 Premier Session for \$2,145, the most recent NGC coin to sell was back in April 2010 - that is over eight years ago! That coin brought \$2,300. A Standard Silver pattern like this is a great "entry" level pattern for someone to embark on this wonderful specialty.

\$1 1869 J-764. PCGS PR65 CAM

This very RARE R-7- (7-12 minted) Seated Liberty "die trial" ranks among the very FINEST known. Struck from the regular issue proof dies in aluminum with a reeded edge. Presumably this coin was once part of a complete Proof Set in aluminum, and perhaps 7-12 exist in all grades, (combined, PCGS and NGC have graded 6 in all grades).

A wealth of CAMEO contrast is created by the deep, bold mirrors that beam from all over. The devices are fully frosted, contrasting beautifully with the mirrors. Untoned and vibrant with strong mirrors on both sides, contrasting wonderfully

against the frosted devices. There is some softness to the strike in the centers, typical of the type.

PCGS 3, NGC 0. The only one to ever sell in auction was in Stack's November 2009 Anniversary Sale, lot 1737 for \$14,950 (this is NOT that coin). None have been graded finer at PCGS in any designation, making this among the best of the type. Here is an example of how cheap these are: in PR65 CAM a regular 1869 dollar (mintage 600) is worth about the same as this ultra rare pattern. Perhaps this will inspire a look at the value of patterns!

LOT 496
25C 1870 J-916. PCGS PR67 CAM CAC
Ex Simpson Collection.

This is an extremely RARE Standard Silver pattern quarter, rated R-7+ (4-6 minted). Barber's portrait of Liberty wears a tiara with no stars. Struck in aluminum with a reeded edge.

What an amazing SUPERB GEM! Clearly the FINEST extant example of this VERY RARE Judd number! The mirrors are deep and watery and beam from all over. The surfaces, save for a small area of roughness in the planchet in the obverse right field (mint made), are FLAWLESS! Miss Liberty and the details are sharply struck and have a thick frosty texture. The eye appeal is excellent!

PCGS 1, NGC 0, CAC 1. This is the FINEST J-916 known. In fact, overall in ANY Aluminum Pattern design there are very few PR67's. There is a \$10,000 Collectors Universe Value, but of course, NONE have ever sold in auction. Opportunity knocks loud here!

PCGS# 800009 | ESTIMATE: \$8,000+

LOT 497

\$1 1870 J-1017.

PCGS PR63 BN

This is a totally FRESH example of this ultra popular Pattern dollar type. Longacre's famed Seated Indian Princess design adorns the obverse and is paired with the regular Proof die of 1870. Considered to be R-7-, with about a dozen known, struck in copper with a plain edge.

The mirrored copper surfaces have a bold, hard, flashy finish.

They offer a wonderful mixture of iridescent overtones that range from the fiercely vibrant to more muted and subdued, consisting of olive, rose, lilac, magenta, teal, sky-blue, tan, and gold shades. Indeed, we really don't see any "brown." The mirrors, especially on the reverse, are flashy and bring out the amazing colors and sharpness of the strike. This CHOICE example is totally original and fresh to the market, consigned to us raw from an old collection; it is highly unlikely that anyone has seen this coin in at least 40 years!

PCGS 2, NGC 0. The most recent example to sell realized \$8,813 in the 2015 ANA Auction and was the first time that coin had sold since 1995! There has not been a PCGS PR64 BN sold in auction since 1992! Clearly, this RARE Judd number does not come up for sale very often! Take advantage of the opportunity this presents for you!
